Any person operating a motor vehicle with a commercial registration so constructed or which may be so loaded that the operator is prevented from having a free and unobstructed view of the highway immediately to the rear and at the left side of the

same shall, by means of such mirror, make frequent observations of the approach of vehicles from the rear. When operating at below the posted speed limits and when so approached or overtaken, the operator of such motor vehicle shall drive to the extreme right of the traveled way as promptly as safety will permit, giving the vehicle approaching from the rear opportunity to pass. Violation of any provision of this section shall be an infraction. (1949 Rev., S. 2446; February, 1965, P.A. 448, S. 11; P.A. 75-577, S. 56, 126; P.A. 90-263, S. 64, 74.) History: 1965 act added the word "left" in the first and second sentences, changed the duty of constant observation to one of frequent observations, removed the words "in safety" from the end of the last sentence and deleted a penalty provision; P.A. 75-577 provided that violation of section is an infraction; P.A. 90-263 substituted "motor vehicle with a commercial registration" for "commercial motor vehicle". See Sec. 14-230 re driving in right-hand lane. See Sec. 14-285 re use of mirrors by vehicles other than motor vehicles. Allegation that driver did not keep a constant observation of approach of vehicles from rear is sufficient to raise issue of compliance with statute. 119 C. 595, 596. Requires driver to keep such a regularly recurring observation of mirror as will make him aware of vehicles approaching in rear. 122 C. 216. Cited. 129 C. 13; 134 C. 644. Cited. 30 CA 263.

2024 Connecticut General Statutes Title 14 - Motor Vehicles. Use of the Highway by Vehicles. Gasoline Chapter 246 - Motor Vehicles Section 14-99f. - Windshield. Obstruction of view.

(a) Each motor vehicle shall be equipped with a windshield of a type prescribed by section 14-100 and a windshield cleaner or wiper in effective working order located directly in front of the operator while in use on the highway. The windshield shall be reasonably free of defects and accumulations, inside and out, of snow, ice, condensation and dirt. The provisions of this subsection shall not apply to a motorcycle or a vehicle designed by the manufacturer for nonhighway operation without a windshield. (b) No person shall operate a motor vehicle required to be equipped with such a windshield if the windshield is in a condition to interfere with an unobstructed view of the highway. (c) No article, device, sticker or ornament shall be attached or affixed to or hung on or in any motor vehicle in such a manner or location as to interfere with the operator's unobstructed view of the highway or to distract the attention of the operator. (d) Violation of any provision of this section shall be an infraction. (P.A. 84-429, S. 36; P.A. 99-268, S. 4; P.A. 00-169, S. 22.) History: P.A. 99-268 amended Subsec. (a) to delete exemption for certain farm vehicles; P.A. 00-169 revised effective date of P.A. 99-268 but without affecting this section. See Sec. 14-99g re use of tinted or reflectorized windows and obstruction of view. See Sec. 14-100 re safety glass requirement. Cited. 30 CA 263. Subsec. (c): To constitute a violation of Subsec., there must be more than a hypothetical possibility that driver's vision would be obstructed or that driver would be distracted, and police officer did not articulate any reasonable belief that Subsec. was being violated. 297 C. 829. The hanging of an object from a rearview mirror is not a per se infraction under Subsec., and Subsec. requires proof of interference with an operator's unobstructed view or the operator's distraction. 111 CA 482.

No person may place, install, affix or apply any transparent material on the front windshield or the side or rear windows of any motor vehicle if such material alters the color or reduces the light transmittance of such windshield or side or rear windows, except as provided in subsection (c) of this section. Any person required for medical reasons to be shielded from direct rays of the sun or any person operating a motor vehicle belonging to such person or in which such person is a usual passenger shall be exempt from the provisions of this subsection. The sticker shall be of a type which is pressure-sensitive, self-destructive upon removal, and shall not exceed one square inch in size. Prior to shipping or making any such material available in this state, for installation in a motor vehicle, the manufacturer shall apply to the Commissioner of Motor Vehicles for approval and registration of its tinted material and the sticker which is to be used in the identification and certification of compliance with the light transmission and reflectance standards established under this section. The commissioner shall not approve any tinted material or sticker unless the manufacturer demonstrates that the material and sticker comply with the provisions of this section. The manufacturer shall include with each delivery of tinted material in this state for installation in a motor vehicle a sticker, approved by the commissioner, with written instructions indicating the proper location for placement of such sticker. Such regulations shall include provision for a periodic inspection of air pollution control equipment and compliance with or waiver of exhaust emission standards or compliance with or waiver of on-board diagnostic standards or other standards defined by the Commissioner of Energy and Environmental Protection and approved by the Administrator of the United States Environmental Protection Agency, compliance with or waiver of, air pollution control system integrity standards defined by the Commissioner of Energy and Environmental Protection and compliance with or waiver of purge system standards defined by the Commissioner of Energy and Environmental Protection. Such regulations may provide for an inspection procedure using an on-board diagnostic information system for all 1996 model year and newer motor vehicles. Such regulations shall apply to all motor vehicles registered or which will be registered in this state, and to all motor vehicles sold by a dealer licensed in this state as required by subsection (n) of this section, except: (1) Vehicles having a gross weight of more than ten thousand pounds; (2) vehicles powered by electricity; (3) bicycles with motors attached; (4) motorcycles; (5) vehicles operating with a temporary registration; (6) vehicles manufactured twenty-five or more years ago; (7) new vehicles at the time of initial registration; (8) vehicles registered but not designed primarily for highway use; (9) farm vehicles, as defined in subsection (q) of section 14-49; (10) diesel-powered type II school buses; (11) a vehicle operated by a licensed dealer or repairer either to or from a location of the purchase or sale of such vehicle or for the purpose of obtaining an official emissions or safety inspection; (12) vehicles that have met the inspection requirements of section 14-103a and are registered by the commissioner as composite vehicles; (13) electric bicycles, as defined in section 14-1; or (14) electric foot scooters, as defined in section 14-1. On and after July 1, 2002, such regulations shall exempt from the periodic inspection requirement any vehicle four or less model years of age, beginning with model year 2003 and the previous three model years, provided that such exemption shall lapse upon a finding by the Administrator of the United States Environmental Protection Agency or by the Secretary of the United States Department of Transportation that such exemption causes the state to violate applicable federal environmental or transportation planning requirements. Notwithstanding any provisions of this subsection, the commissioner may require an initial emissions inspection and compliance or waiver prior to registration of a new motor vehicle. If the Commissioner of Energy and Environmental Protection finds that it is necessary to inspect motor vehicles which are exempt under subdivision (1) or (4) of this subsection, or motor vehicles that are four or less model years of age in order to achieve compliance with federal law concerning emission reduction requirements, the Commissioner of Motor Vehicles may adopt regulations, in accordance with the provisions of chapter 54, to require the inspection of motorcycles, designated motor vehicles having a gross weight of more than ten thousand pounds or motor vehicles four or less model years of age. (d) (1) No motor vehicle subject to the inspection requirements of this section shall be operated upon the highways of this state unless such vehicle has been presented for inspection in accordance with a schedule for inspection and compliance as established by the commissioner. The commissioner shall grant waivers from compliance with standards for vehicles which fail any required inspection and require an unreasonable cost of repair to bring the vehicle into compliance. The commissioner may determine compliance of a vehicle that has failed an emissions retest by means of a complete physical and functional diagnosis and inspection of the vehicle, in accordance with the provisions of 40 CFR Part 51.360, showing that no additional emissions-related repairs are needed. An extension of time, not to exceed the period of inspection frequency, may be

granted to obtain needed repairs on a vehicle in the case of economic hardship of the owner. Only one such extension may be granted for any vehicle. (2) On and after July 1, 2022, until July 1, 2024, inclusive, the commissioner shall grant an extension of time for a vehicle which fails any required inspection to obtain needed repairs, provided any motor vehicle dealer or repairer licensed under the provisions of section 14-52, certifies, in writing, that the part needed to fix a problem associated with the vehicle's engine is delayed due to market conditions. Any extension of time granted pursuant to the provisions of this subdivision shall be valid for a period of one hundred eighty days from the date of the certification provided by such dealer or repairer. (3) The commissioner may design a sticker to be affixed to the windshield of each vehicle which shall bear the date of expiration of the assigned inspection period on both sides. The commissioner may also design a sticker to be affixed to the windshield of each vehicle that is exempt from the requirements of this chapter, which sticker shall bear the date, if any, on which such vehicle is no longer exempt and is required to be presented for inspection. As used in this section, "unreasonable cost of repair" means cost of repair in excess of the amounts required to be expended by Title 40, Part 51.360 of the Code of Federal Regulations, as amended. (e) In order to provide for emissions inspection facilities, the commissioner may enter into a negotiated inspection agreement or agreements, notwithstanding chapters 50, 58, 59 and 60, with an independent contractor or contractors, to provide for the leasing, construction, equipping, maintenance or operation of a system of official emissions inspection stations in such numbers and locations as may be required to provide vehicle owners reasonably convenient access to inspection facilities. The commissioner may employ such system and the services of such contractor or contractors to conduct safety inspections as provided by section 14-16a, subsection (g) of section 14-12 and section 14-103a. Such contractor or contractors, with the approval of the commissioner, may operate inspection stations at suitable locations owned or operated by other persons, firms or corporations, including retail business establishments with adequate facilities to accommodate and to perform inspections on motor vehicles. The commissioner is prohibited from entering into an inspection agreement with any independent contractor who: (1) Is engaged in the business of maintaining or repairing vehicles in this state, except that the independent contractor shall not be precluded from maintaining or repairing any vehicle owned or operated by the independent contractor; or (2) does not have the capability, resources or technical and management skill to adequately conduct, equip, operate and maintain a sufficient number of official emissions inspection stations. All persons employed by the independent contractor in the performance of an inspection agreement are deemed to be employees of the independent contractor and not of this state. The inspection agreement or agreements authorized by this section shall be subject to other provisions as follows: (A) Minimum requirements for staff, equipment, management and hours and place of operation of official emissions inspection stations including such additional testing facilities as may be established and operated in accordance with subsection (g) of this section; (B) reports and documentation concerning the operation of official emissions inspection stations and additional testing facilities as the commissioner may require; (C) surveillance privileges for the commissioner to ensure compliance with standards, procedures, rules, regulations and laws; and (D) any other provision deemed necessary by the commissioner for the administration of the inspection agreement. Nothing in the inspection agreement shall require the state to purchase any asset or assume any liability if such agreement is not renewed. (f) (1) The commissioner may authorize and appoint any motor vehicle dealer or repairer that is licensed in accordance with the provisions of subpart (D) of part III of chapter 246 and that has the qualifications established by the commissioner to conduct emissions inspections in a designated area of its licensed premises and to report the results thereof to the Department of Motor Vehicles, provided such licensee signs a statement that such licensee understands the provisions of this section and regulations adopted under authority of this section, understands the necessity to comply with administrative and technical directives and advisories that the commissioner issues and understands that any failure by such licensee to comply with this section, the regulations or the directives or advisories constitutes grounds for the commissioner to suspend or revoke the authority for such licensee to conduct inspections. (2) Each such licensee shall conduct an emissions inspection of any registered motor vehicle requiring such an inspection at any time during its normal and posted hours of operation or, at the discretion of the commissioner, at a predetermined or appointed time, when such motor vehicle is presented for inspection. No such licensee shall charge any fee for the inspection except the fee authorized by subsection (k) of this section. The results of each emissions inspection performed in accordance with this subsection shall be evidenced by a written vehicle inspection report, containing such information and certification by the inspecting licensee as the commissioner shall prescribe. The licensee shall furnish a copy of such inspection report to the operator of the motor vehicle at the time of completion of the inspection. (3) No such licensee may be appointed by the commissioner nor may any such licensee conduct any inspection unless the licensee has in its employ one or more certified emissions inspectors and repair technicians. Such inspectors and technicians shall conduct all inspections and related emissions repair work and shall meet the training and certification requirements in 40 CFR Part 51.367 and of the regulations adopted by the commissioner in accordance with this subsection. (4) The commissioner may suspend or revoke the authority to conduct emissions inspections by any such licensee that is authorized to conduct emissions inspections if the licensee fails to comply with the provisions of this section, regulations adopted under authority of this section, or administrative or technical directives or advisories that the commissioner issues. (5) The commissioner shall adopt regulations, in accordance with chapter 54, to establish the qualifications for such licensees to be authorized and appointed to conduct emissions inspections, and to establish standards and procedures for such inspections, reporting requirements by such licensees and training and certification requirements for inspectors and repair technicians. (g) The independent contractor or contractors retained by the state in accordance with the provisions of subsection (e) of this section may conduct emissions inspections at one or more facilities owned or operated by a motor vehicle dealer or dealers, licensed in accordance with section 14-52. No such inspection facility located on the premises of a licensed dealer shall be operated without the prior approval of the commissioner. The operation of each such facility shall be subject to such procedures and requirements, to be followed by the contractor and the licensee, as may be prescribed by the terms

and conditions of the contract entered into in accordance with the provisions of subsection (e) of this section, and in regulations as may be adopted by the commissioner in accordance with chapter 54. The state shall not be a party to, or assume or incur any liability of any kind under, any agreement entered into between the independent contractor and any dealer in furtherance of the provisions of this subsection. The contract or contracts entered into by the state in accordance with the provisions of subsection (e) of this section shall provide for indemnification of the state with respect to the operation of any such inspection facility located at a motor vehicle dealership, in the same manner and to the same extent as the operation of an official emissions inspection station. (h) In order to provide for management and oversight of emissions inspection facilities established in accordance with subsection (e) of this section and to establish and maintain necessary electronic data capture and reporting systems for such facilities and for licensed dealers and repairers who may be authorized to perform inspections in accordance with the provisions of subsection (f) of this section, the commissioner may enter into a negotiated personal service agreement or agreements, in accordance with the provisions of chapter 55a, with any qualified person, firm or corporation. The responsibilities of any such contractor retained by the commissioner shall include, but need not be limited to, the following: (1) Review and analysis of data from all official emissions inspections performed, and provision to the commissioner of recommendations to improve the quality and integrity of such data, (2) provision of program information and standards to inspection facilities and locations, (3) provision to the commissioner of regular reports, assessments and recommendations to maintain or improve the effectiveness, efficiency, quality and integrity of such inspection operations, and (4) identification of measures to enhance public convenience, and compliance with the inspection requirements. No such contractor retained in accordance with the provisions of this subsection may be licensed as, or have any financial interest in any firm engaged in the business of selling or repairing motor vehicles, or may be a provider of emissions inspection equipment or facilities to the state. (i) The commissioner may license an owner or operator of a fleet of motor vehicles which are subject to emissions inspection pursuant to subsection (c) of this section or section 14-164i, to establish a fleet emissions inspection station, provided that the fleet owner or operator conforms with regulations for fleet emissions inspection stations adopted by the commissioner which shall specify the classes or other characteristics of vehicles eligible for inspection at such stations. (j) The commissioner may establish a program for the on-road testing of motor vehicles subject to this chapter. The program shall test not less than one-half of one per cent of the subject fleet state-wide or twenty thousand vehicles, whichever is less, per inspection cycle under conditions of highway operation in order to provide information concerning the emission performance of such in-use vehicles. Testing may be performed by means of remote sensing devices, or roadside pullovers followed by tailpipe emissions testing using a suitable, portable device and recording system. Owners of vehicles that have previously been through scheduled periodic inspection and passed, and are found by on-road testing to be high emitters, in accordance with the standards established under subsection (b) of this section and the regulations adopted under subsection (c) of this section, may be notified that their vehicles are required to pass an out-of-cycle follow-up inspection at an inspection station. Notification may be made by mailing in the case of remote sensing on-road testing or through immediate notification if roadside pullovers are used. The commissioner may use the services of the independent contractor or contractors to implement the on-road testing program. If a method of roadside pullovers is used in the program, such method shall be employed with due regard to traffic safety considerations and performed with the assistance of inspectors of the Department of Motor Vehicles or members of state or municipal police forces. (k) (1) The commissioner, with approval of the Secretary of the Office of Policy and Management, shall establish, and from time to time modify, the inspection fees, not to exceed twenty dollars for each biennial inspection or reinspection required pursuant to this chapter for inspections performed at official emissions inspection stations. Such fees shall be paid in a manner prescribed by the commissioner. If the costs to the state of the emissions inspection program, including administrative costs and payments to any independent contractor, exceed the income from such fees, such excess costs shall be borne by the state. Any person whose vehicle has been inspected at an official emissions inspection station shall, if such vehicle is found not to comply with any required standards, have the vehicle repaired and have the right within sixty consecutive calendar days to return such vehicle to the same official emissions inspection station for one reinspection without charge, provided, where the sixtieth day falls on a Sunday, legal holiday or a day on which the commissioner has established that special circumstances or conditions exist that have caused emissions inspection to be impracticable, such person may return such vehicle for reinspection on the next day. The commissioner shall assess a late fee of twenty dollars against the owner of a motor vehicle that has not presented such motor vehicle for an emissions inspection within thirty days following the expiration date of the assigned inspection period, or that has not presented such motor vehicle for a reinspection within sixty days following a test failure, or both. The commissioner may waive such late fee when it is proven to the commissioner's satisfaction that the failure to have the vehicle inspected within thirty days of the assigned inspection period or during the sixty-day reinspection period was due to exigent circumstances. If ownership of the motor vehicle has been transferred, the new owner shall have such motor vehicle inspected within thirty days of the registration of such motor vehicle. The commissioner may specify a longer period for all new owners to achieve compliance after a transfer of ownership if circumstances require closure or limited operations of the Department of Motor Vehicles or emissions inspection stations. After the expiration of such thirty-day period, or the period specified by the commissioner, the commissioner shall require the payment of the late fee specified in this subdivision. If the thirtieth day falls on a Sunday, legal holiday or a day on which the commissioner has established that special circumstances or conditions exist that have caused emissions inspection to be impracticable, such vehicle may be inspected on the next day and no late fee shall be assessed. (2) If the commissioner authorizes a licensed dealer or repairer to conduct emissions inspections of 1996 model year and newer vehicles required by this chapter, the commissioner may authorize such licensee to charge a fee, not to exceed twenty dollars for each biennial inspection or reinspection. (3) Upon the registration of each new motor vehicle subject to the inspection requirements of this chapter, or of each motor vehicle that is four or less model years of age that has not been registered previously in this state, the

commissioner may issue a sticker indicating the exempt status of such motor vehicle and the date on which the motor vehicle is scheduled to be presented for inspection. Any such sticker that may be issued shall be displayed on the motor vehicle in accordance with subsection (d) of this section. On and after July 1, 2002, the commissioner shall charge a fee of forty dollars in addition to any other fees required for such registration. All receipts from the payment of such fee shall be deposited in the Special Transportation Fund. (l) The commissioner may acquire in the name of the state by purchase, lease, gift, devise or otherwise any special equipment, tools, materials or facilities needed to adequately administer, investigate or enforce the provisions of this chapter. (m) A person shall not in any manner represent any place to be an official emissions inspection station unless such station has been established and is operated in accordance with the provisions of this section. (n) No motor vehicle dealer licensed under section 14-52 shall sell any motor vehicle unless such motor vehicle (1) is in compliance with subsections (c) and (d) of this section and the regulations adopted by the commissioner, and (2) has passed an emissions inspection conducted in accordance with said subsections and regulations. No person, firm or corporation shall operate or allow to be operated any motor vehicle that has not been inspected and found to be in compliance with the provisions of subsections (c), (d) and (i) of this section and the regulations adopted by the commissioner. Operation in violation of said subsections or the regulations adopted by the commissioner shall be an infraction for each violation, except that the fine for a first violation shall be fifty dollars. The commissioner may deny the issuance of registration to the owner of a motor vehicle, or the renewal of registration to any such owner, or suspend or revoke any registration that has been issued, if such motor vehicle is not in compliance with the inspection requirements of this chapter, or such owner has failed to pay any fee required by the provisions of this chapter. (b) Unless a bond is filed as provided in section 14-176, a distinctive certificate of title shall be issued for a vehicle last previously registered in another state or country the laws of which do not require that lienholders be named on a certificate of title to perfect their security interests. The certificate shall contain the legend "This vehicle may be subject to an undisclosed lien" and may contain any other information the commissioner prescribes. If no notice of a security interest in the vehicle is received by the commissioner within four months from the issuance of the distinctive certificate of title, the commissioner shall, upon application and surrender of the distinctive certificate, issue a certificate of title in ordinary form. (c) The certificate of title shall contain forms for assignment and warranty of title by the owner and for assignment and warranty of title by a dealer, and may contain forms for applications for a certificate of title by a transferee, the naming of a lienholder and the assignment or release of the security interest of a lienholder. (d) A certificate of title issued by the commissioner is prima facie evidence of the facts appearing on it. In any criminal proceeding, a certified copy of a certificate of title shall be prima facie evidence as to the ownership of a motor vehicle. (e) A certificate of title for a vehicle is not subject to garnishment, attachment, execution or other judicial process, but this subsection does not prevent a lawful levy upon the vehicle. (f) The commissioner shall place a legend on any new or replacement certificate of title in accordance with the requirements of section 14-16c, 14-172, 14-178, 14-179 or 42-179. The commissioner shall place a legend on any new or replacement certificate of title that the commissioner issues concerning the mileage on a motor vehicle in accordance with the requirements of the Federal Odometer Act, Sections 32701 to 32711, inclusive, Title 49, United States Code, and any federal regulation adopted under the authority of said act. The commissioner may adopt regulations, in accordance with the provisions of chapter 54, to provide for the placement of additional legends on any certificate of title, concerning the condition of any motor vehicle or the status of the title to any motor vehicle, including legends to indicate that a motor vehicle has been rebuilt or damaged by flood, or that a bond has been posted to obtain the title, as provided in section 14-176. Such regulations, as may be adopted by the commissioner, shall provide for an opportunity for a hearing, in accordance with the provisions of chapter 54 and section 14-194, for any person aggrieved by any action, omission or decision of the commissioner made pursuant to this subsection. The bond shall be in an amount equal to twice the value of the vehicle as determined by the commissioner and conditioned to indemnify any prior owner and lienholder and any subsequent purchaser of the vehicle or person acquiring any security interest in it, and their respective successors in interest, against any expense, loss or damage, including reasonable attorney's fees, by reason of the issuance of the certificate of title of the vehicle or on account of any defect in or undisclosed security interest upon the right, title and interest of the applicant in and to the vehicle. Any such interested person has a right of action to recover on the bond for any breach of its conditions, but the aggregate liability of the surety to all persons shall not exceed the amount of the bond. 2024 Connecticut General Statutes Title 14 - Motor Vehicles. Use of the Highway by Vehicles. Gasoline Chapter 248 - Vehicle Highway Use Section 14-218a. - Traveling unreasonably fast. Establishment of speed limits.

(a)(1) No person shall operate a motor vehicle upon any public highway of the state, or road of any specially chartered municipal association or any district organized under the provisions of chapter 105, a purpose of which is the construction and maintenance of roads and sidewalks, or on any parking area as defined in section 14-212, or upon a private road on which a speed limit has been established in accordance with this subsection, or upon any school property, at a rate of speed greater than is reasonable, having regard to the width, traffic and use of highway, road or parking area, the intersection of streets and weather conditions. (2) The Office of the State Traffic Administration may determine speed limits which are reasonable and safe on any state highway, bridge or parkway built or maintained by the state, and differing limits may be established for different types of vehicles, and may erect or cause to be erected signs indicating such speed limits. (3) Except as provided in subsection (c) of this section and section 14-307a, the traffic authority of any town, city or borough may establish speed limits on streets, highways and bridges or in any parking area for ten cars or more or on any private road wholly within the municipality under its jurisdiction; provided such limit on streets, highways, bridges and parking areas for ten cars or more shall become effective only after application for approval thereof has been submitted in writing to the Office of the State Traffic Administration and a certificate of such approval has been forwarded by the office to the traffic authority; and provided such signs giving notice of such speed limits shall have been erected as the office directs, provided the erection of such signs on any private road shall be at the expense of the owner of such road. The presence of such signs adjacent to or on the highway or parking area for ten cars or more shall be prima facie evidence that they have been so placed under the direction of and with the approval of the office. Approval of such speed limits may be revoked by the office at any time if said office deems such revocation to be in the interest of public safety and welfare, and thereupon such speed limits shall cease to be effective and any signs that have been erected shall be removed. (4) Any speed in excess of a speed limit established in accordance with this section or section 14-307a, other than speeding as provided for in section 14-219, shall be prima facie evidence that such speed is not reasonable, but the fact that the speed of a vehicle is lower than such speed limit shall not relieve the operator from the duty to decrease speed when a special hazard exists with respect to pedestrians or other traffic or by reason of weather or highway conditions. (b) (1) Except as provided in subdivision (2) of this subsection, the Office of the State Traffic Administration shall establish a speed limit not to exceed sixty-five miles per hour on each multiple lane, limited access highway. The office shall establish speed limits that are suitable for each such highway, taking into consideration relevant factors including design, population of area and traffic flow. (2) The Commissioner of Transportation may establish the speed limit on limited access highways during a weather event or an emergency, provided the commissioner erects electronic signs indicating such speed limit. (c) (1) The traffic authority of any town, city or borough may establish, modify and maintain speed limits on streets, highways and bridges or in any parking area for ten cars or more or on any private road wholly within the municipality under its jurisdiction without approval from the Office of the State Traffic Administration, provided: (A) The municipality, by vote of its legislative body, or in the case of a

municipality in which the legislative body is a town meeting, its board of selectmen, permits the traffic authority to assume responsibility and authority for the establishment, modification and maintenance of the speed limits on all streets, highways and bridges and in parking areas for ten cars or more or on any private road wholly within the municipality under its jurisdiction. Such permission is not required if such legislative body or board of selectmen is also the traffic authority; (B) The traffic authority notifies the office in writing that the traffic authority is permitted under subparagraph (A) of this subdivision and intends to assume such responsibility and authority; (C) The traffic authority establishes, modifies and maintains the speed limits on all streets, highways and bridges and in parking areas for ten cars or more or on any private road wholly within the municipality under its jurisdiction; (D) The traffic authority conducts an engineering study described in subdivision (3) of this subsection; and (E) The traffic authority notifies the office of each change to a speed limit on such street, highway, bridge and parking area wholly within the municipality under its jurisdiction so the office may maintain a state-wide inventory of speed limits. Any speed limit approved by the office pursuant to the provisions of subsection (a) of this section shall remain in effect until modified by a traffic authority. (2) (A) The traffic authority shall not establish or reduce a speed limit lower than twenty-five miles per hour unless (i) the speed limit is in a pedestrian safety zone pursuant to section 14-307a, or (ii) the engineering study described in subdivision (3) of this subsection finds that a speed limit lower than twenty-five miles per hour is reasonable. (B) The traffic authority shall not reduce a speed limit by more than ten miles per hour without approval from the municipality, by vote of its legislative body, or in the case of a municipality in which the legislative body is a town meeting, its board of selectmen, if such legislative body or board of selectmen is not also the traffic authority. (C) If the traffic authority reduces a speed limit by more than ten miles per hour, the traffic authority shall erect reduced speed limit ahead signs in accordance with the standards contained in the Federal Highway Administration's Manual on Uniform Traffic Control Devices for Streets and Highways, as amended from time to time. (D) On any street or highway that runs into an adjoining municipality, a traffic authority shall not reduce the speed limit within one thousand feet of the boundary of the adjoining municipality by more than ten miles per hour from the speed limit on such road in the adjoining municipality without (i) approval of the adjoining municipality, by vote of its legislative body, or in the case of a municipality in which the legislative body is a town meeting, its board of selectmen, and (ii) the approval required under subparagraph (B) of this subdivision. (E) If a traffic authority reduces the speed limit on any street or highway that runs into an adjoining municipality between one thousand feet and one mile of the boundary of the adjoining municipality by more than ten miles per hour from the speed limit on such road in the adjoining municipality, the traffic authority shall provide written notice of the reduced speed limit to the adjoining municipality. (3) Prior to establishing or modifying a speed limit pursuant to the provisions of subdivision (1) of this subsection, the traffic authority shall conduct an engineering study in accordance with the Federal Highway Administration's Manual on Uniform Traffic Control Devices for Streets and Highways, as amended from time to time, and other generally accepted engineering principles and guidance. The study shall be completed by a professional engineer licensed to practice in this state and shall consider factors, including, but not limited to, pedestrian activity, type of land use and development, parking and the record of traffic accidents in the jurisdiction of the traffic authority. (4) The Office of the State Traffic Administration may adopt regulations, in accordance with the provisions of chapter 54, to implement the provisions of this subsection. (d) Any person who operates a motor vehicle at a greater rate of speed than is reasonable, other than speeding, as provided for in section 14-219, shall commit the infraction of traveling unreasonably fast. 2024 Connecticut General Statutes Title 14 - Motor Vehicles. Use of the Highway by Vehicles. Gasoline Chapter 248 - Vehicle Highway Use Section 14-219a. - Parking area defined.

Section 14-219a is repealed. (1961, P.A. 379, S. 1; P.A. 77-340, S. 5; P.A. 84-429, S. 78.)

2024 Connecticut General Statutes Title 14 - Motor Vehicles. Use of the Highway by Vehicles. Gasoline Chapter 248 - Vehicle Highway Use Section 14-219b. - Limitation of municipal liability.

Nothing in section 14-218a, subsection (a) of section 14-222 or subsection (a) of section 14-227a shall be construed to impose any liability upon any municipality as a result of its establishing a speed limit upon any private road within its jurisdiction as provided by section 14-218a. (1969, P.A. 450, S. 5; P.A. 77-340, S. 6.) History: P.A. 77-340 replaced references to Sec. 14-219 with references to Sec. 14-218a.

2024 Connecticut General Statutes Title 14 - Motor Vehicles. Use of the Highway by Vehicles. Gasoline Chapter 248 - Vehicle

Highway UseSection 14-219c. - Use of speed monitoring devices to support a conviction.

A prima facie presumption of accuracy sufficient to support a conviction under section 14-219 will be accorded to a radar, speed monitoring laser, vascar device or any other speed monitoring device approved by the Commissioner of Emergency Services and Public Protection only upon testimony by a competent police officer that: (1) The police officer operating the radar, laser, vascar device or other device has adequate training and experience in its operation; (2) the radar, laser, vascar device or other device was in proper working condition at the time of the arrest, established by proof that suggested methods of testing the proper functioning of the device were followed; (3) the radar, laser, vascar device or other device was used in an area where road conditions provide a minimum possibility of distortion; (4) if moving radar was used, the speed of the patrol car was verified; and (5) the radar, laser, vascar device or other device was expertly tested within a reasonable time following the arrest, and such testing was done by means which do not rely on the internal calibrations of such radar, laser, vascar device or other device. (P.A. 79-609, S. 3; P.A. 92-141, S. 2, 3; P.A. 94-189, S. 13; P.A. 11-51, S. 134.) History: P.A. 92-141 added references to lasers, vascar devices or other speed monitoring devices approved by the commissioner of public safety; P.A. 94-189 amended Subdiv. (4), eliminating the reference to "laser, vascar device or other device" since only when moving radar is used is the speed of the patrol car a factor; pursuant to P.A. 11-51, "Commissioner of Public Safety" was changed editorially by the Revisors to "Commissioner of Emergency Services and Public Protection", effective July 1, 2011. Statute does not set out a test for admissibility of laser readings; purpose of statute is to provide a presumption of accuracy for laser readings when state satisfies the 5 conditions contained in statute. 70 CA 223. Statute refers to the accuracy of radar readings and does not purport to create any prima facie presumptions with respect to the accuracy of a patrol car's speedometer. 37 CS 601. Court held to be reasonable in time test for accuracy conducted 3 weeks after the arrest. 39 CS 313.

(a) No person shall operate a motor vehicle at a speed lower than forty miles per hour on any limited access divided highway and no person shall operate a motor vehicle on any other highway at such a slow speed as to impede or block the normal and reasonable movement of traffic except, in either case, when reduced speed is necessary for safe operation or in an emergency, or in compliance with the law or the direction of an officer. The provisions of this section shall not apply to (1) maintenance vehicles or equipment of the state or any municipal highway department, or to such vehicles or equipment of a contractor under contract with any such department while engaged in maintenance operations; (2) any motor vehicle with a commercial registration which while traveling on any limited access divided highway is unable to maintain the minimum speed limit of forty miles per hour due to the gradient, or to any such vehicle which while traveling on any other highway is being driven at such a slow speed as to obstruct or endanger following traffic, provided the operator thereof employs flashing lights on such motor vehicle. (b) The operator of any motor vehicle having a gross weight of more than twenty-five thousand pounds shall also employ flashing lights when the vehicle is traveling on a limited access divided highway and maintaining a speed higher than forty miles per hour but lower than the speed of the traffic on the highway due to the gradient. (c) Violation of any provision of this section shall be an infraction. (1957, P.A. 136; 1967, P.A. 875; 1971, P.A. 618, S. 1; P.A. 75-577, S. 68, 126; P.A. 84-278; P.A. 90-263, S. 66, 74.) History: 1967 act set minimum speed of 40 on limited access divided highways; 1971 act excluded from provisions commercial vehicles unable to maintain speed on grades and vehicles using flashing lights; P.A. 75-577 added statement that violation of provisions is an infraction; P.A. 84-278 divided section into Subsecs. and added new language in Subsec. (b), requiring operators of certain commercial motor vehicles to use flashing lights while traveling faster than 40 miles per hour but slower than the speed of traffic due to the gradient; P.A. 90-263 amended Subsec. (a)(2) to substitute phrase "motor vehicle with a commercial registration" for "commercial motor vehicle" and to delete other references to "commercial" motor vehicle. Requirement that there be a written request to charge on legal principle involved in a statute (Practice Book, section 250) is especially applicable to this section. 154 C. 381. Cited. 30 CA 742.

Such permit shall include reasonable restrictions and may require the temporary installation and use of such additional lighting equipment as such traffic authority deems to be essential for the safety of the persons being transported from one-half hour after sunset to one-half hour before sunrise or whenever smoke or weather conditions render it impossible to see at least two hundred feet ahead of such vehicle. Violation of any provision of this section shall be an infraction. (1953, S. 1379d; P.A. 75-577, S. 69, 126; P.A. 85-174, S. 1, 2.) History: P.A. 75-577 added statement that violation of provisions is an infraction; P.A. 85-174 eliminated the limitation on the permit to one round trip per day and provided that the permit shall include reasonable restrictions.

subsection (a) of this section, evidence respecting the amount of alcohol or drug in the defendant's blood or urine at the time of the alleged offense, as shown by a chemical test of the defendant's breath, blood or urine, shall be admissible and competent provided: (1) The defendant was afforded a reasonable opportunity to telephone an attorney prior to the performance of the test and consented to the taking of the test upon which such analysis is made; (2) a true copy of the report of the test result was mailed to or personally delivered to the defendant within twenty-four hours or by the end of the next regular business day, after such result was known, whichever is later; (3) the test was performed by or at the direction of a police officer according to methods and with equipment approved by the Department of Emergency Services and Public Protection and was performed in accordance with the regulations adopted under subsection (d) of this section; (4) the device used for such test was checked for accuracy in accordance with the regulations adopted under subsection (d) of this section; (5) an additional chemical test of the same type was performed at least ten minutes after the initial test was performed or, if requested by the police officer for reasonable cause, an additional chemical test of a different type was performed, including a test to detect the presence of a drug or drugs other than or in addition to alcohol, provided the results of the initial test shall not be inadmissible under this subsection if reasonable efforts were made to have such additional test performed in accordance with the conditions set forth in this subsection and (A) such additional test was not performed or was not performed within a reasonable time, or (B) the results of such additional test are not admissible for failure to meet a condition set forth in this subsection; and (6) evidence is presented that the test was commenced within two hours of operation. In any prosecution under this section it shall be a rebuttable presumption that the results of such chemical test establish the ratio of alcohol in the blood of the defendant at the time of the alleged offense, except that if the results of the additional test indicate that the ratio of alcohol in the blood of such defendant is ten-hundredths of one per cent or less of alcohol, by weight, and is higher than the results of the first test, evidence shall be presented that demonstrates that the test results and the analysis thereof accurately indicate the blood alcohol content at the time of the alleged offense. (c)Evidence of blood alcohol content. In any prosecution for a violation of subdivision (1) of subsection (a) of this section, reliable evidence respecting the amount of alcohol in the defendant's blood or urine at the time of the alleged offense, as shown by a chemical analysis of the defendant's blood, breath or urine, otherwise admissible under subdivision (1) of subsection (b) of this section, shall be admissible only at the request of the defendant. (d)Testing of blood, breath and urine. The Commissioner of Emergency Services and Public Protection shall ascertain the reliability of each method and type of device offered for chemical testing of blood, of breath and of urine and certify those methods and types which the commissioner finds suitable for use in testing of blood, breath and urine, respectively, in this state. The Commissioner of Emergency Services and Public Protection shall adopt regulations, in accordance with chapter 54, governing the conduct of chemical tests, the operation and use of chemical test devices, the training and certification of operators of such devices and the drawing or obtaining of blood, breath or urine samples as the commissioner finds necessary to protect the health and safety of persons who submit to chemical tests and to insure reasonable accuracy in testing results. Such regulations shall not require recertification of a police officer solely because such officer terminates such officer's employment with the law enforcement agency for which certification was originally issued and commences employment with another such agency. (e)Evidence of refusal to submit to test or evaluation. (1) In any criminal prosecution for a violation of subsection (a) of this section, evidence that the defendant refused to submit to a blood, breath or urine test or the nontestimonial portion of a drug influence evaluation requested in accordance with section 14-227b shall be admissible provided the requirements of subsection (b) of said section have been satisfied. If a case involving a violation of subsection (a) of this section is tried to a jury, the court shall instruct the jury as to any inference that may or may not be drawn from the defendant's refusal to submit to such a test or evaluation. (2) In any prosecution for a violation of subdivision (1) of subsection (a) of this section in which it is alleged that the defendant's operation of a motor vehicle was impaired, in whole or in part, by consumption of cannabis, as defined in section 21a-420, the court may take judicial notice that the ingestion of cannabis (A) can impair a person's ability to operate a motor vehicle; (B) can cause impairment of motor function, reaction time, tracking ability, cognitive attention, decision-making, judgment, perception, peripheral vision, impulse control or memory; and (C) does not enhance a person's ability to safely operate a motor vehicle. (f)Reduction, nolle or dismissal prohibited. If a person is charged with a violation of the provisions of subsection (a) of this section, the charge may not be reduced, nolle or dismissed unless the prosecuting authority states in open court such prosecutor's reasons for the reduction, nolle or dismissal. Court rejected defendant's claim that statute is void for vagueness because an ordinary person has no ascertainable method for measuring his or her own blood alcohol level. 48 CA 635. Because defendant was charged with violation of both Subdivs. (1) and (2) of Subsec. (a), intoxilyzer results are admissible without defendant's request and are necessary to prove a violation of Subsec. (a)(2) pursuant to Subsec. (c). 51 CA 4. Detention at roadside sobriety checkpoint did not constitute unreasonable seizure or violate defendant's due process rights. 56 CA 252. Pursuant to Sec. 54-193(b), charged violations of section were subject to a 1-year limitations period because they were not punishable by a term of imprisonment of more than 1 year. 61 CA

90. There was substantial evidence that police had probable cause to believe that plaintiff had violated section where plaintiff had slurred speech, bloodshot eyes, smelled of alcohol, admitted he had been drinking beer and police found empty beer bottles in automobile; administration of field sobriety tests and subsequent results are not required by statute and are not dispositive in finding probable cause to arrest for driving while intoxicated. 62 CA 571. Nothing in section prohibits evidence of consciousness of guilt based on defendant's refusal to take a breath test being considered in prosecution for assault in the second degree with a motor vehicle under Sec. 53a-60d. 63 CA 433. Arresting officer properly permitted to offer expert testimony on defendant's intoxication. 68 CA 119. To convict defendant of operating motor vehicle while under the influence of drugs pursuant to section, the state must prove beyond a reasonable doubt that defendant operated his motor vehicle on a public highway while under the influence of intoxicating liquor or drugs or both. 79 CA 657. Section, as applied to defendant, does not violate ex post facto clause because it did not result in a second punishment for previous convictions, but rather enhanced current conviction on the basis of defendant's status as repeat offender; section does not violate such clause given that defendant was effectively put on notice of changes to statute, and therefore he is precluded from relying on previous 5-year look back period to prove that state's burden of proof was reduced or that he was deprived of a defense. 80 CA 589. Because all the evidence submitted to court was consistent with court's finding that defendant had been operating a motor vehicle while under the influence of intoxicating liquor, court had sufficient evidence to convict defendant of that offense. 93 CA 200. Defendant was ineligible for pretrial alcohol education program pursuant to Sec. 54-56g(f) because she was the holder of a commercial driver's license at the time she was charged with violating section. 110 CA 836. Legislature intended blood alcohol content evidence to be based solely on chemical testing and its admissibility to be contingent on the satisfaction of strict statutory criteria, e.g., the performance of multiple chemical tests administered by qualified law enforcement personnel within two hours of defendant's operation of the vehicle; permitting evidence in this behavioral prosecution case of a blood alcohol content derived from a subjective interpretation of defendant's performance on standard field sobriety tests, without using any of the approved methods and procedures, does great violence to the intent of this section. 177 CA 651. Where sample of blood was taken from defendant when he was unconscious in a hospital and could not consent, the results of the test of his blood are not admissible in evidence since such taking was in violation of his constitutional rights and was not authorized by this section or Sec. 14-227b. 26 CS 40. Intent to move a vehicle not an element of operation of a motor vehicle while under the influence in violation of section. 24 CA 467. Cited. 25 CA 282; 27 CA 461; 29 CA 455; 30 CA 742; 33 CA 590; 34 CA 189; Id., 201; 36 CA 463; 40 CA 420; 46 CA 633. Proof of operation on public highway is question of fact and defendant Commissioner of Motor Vehicles made reasonable factual finding of such operation in case in which plaintiff was found seated in the driver's seat with seat belt on in his car on the shoulder of an interstate highway and the engine of the car was running. 48 CA 552. A person operates a motor vehicle when in the vehicle he intentionally does any act or makes use of any mechanical or electrical agency which alone or in sequence will set in motion the motive power of the vehicle. 50 CA 34. Defendant who was found unconscious behind wheel of car while engine was running could be deemed to have operated the vehicle for purposes of sustaining a conviction under section. 51 CA 782. Where defendant was found intoxicated, in the vehicle with the engine running and in a position to control the vehicle's movement, conviction under section was upheld. 60 CA 551. Evidence that defendant failed field sobriety tests and testimony of state toxicologist was sufficient to sustain conviction under section. 71 CA 497. It is inconceivable that legislature's broad umbrella of protection would insulate intoxicated persons from drunk driving laws pursuant to Subsec. because the parking area did not have zoning approval for 10 or more spaces; thus, a 9 space parking lot that regularly accommodates and is used by 10 or more cars satisfies requirements of

statute. 76 CA 716. For purposes of finding violation under Subdiv. (1), the state of being under the influence of intoxicating liquor is not a fact on which the state is required to present expert testimony. 84 CA 519. A conviction under Subdiv. (1) is not inconsistent with an acquittal under Subdiv. (2). 98 CA 847. Defendant's action of inserting key into vehicle ignition is an act which alone or in sequence set in motion the vehicle's motive power and constituted operation of a motor vehicle within the meaning of Subsec. 102 CA 241. Trial court properly allowed defendant's statements as to his alcohol consumption and the results of field sobriety tests; police officer did not lack a reasonable, articulable suspicion to continue his investigation. 110 CA 41. Statute does not require the state to prove that defendant driver actually had difficulty driving the motor vehicle because of intoxicating liquor or drugs. 111 CA 315. Defendant's conviction for a violation of both Subdivs. (1) and (2) violated his right to be free of double jeopardy because they provide for different methods of proof of the same offense. *Id.*, 466. Definition of "motor vehicle" in Sec. 14-212 applies and includes a moped. 112 CA 190. Court properly rejected defense allegation that proof of intoxication was caused solely by involuntary exposure to kerosene fumes in vehicle. 118 CA 556. Blood serum test results using a weight of alcohol to volume of blood ratio rather than a weight of alcohol to weight of blood ratio was sufficient to establish elevated blood alcohol content as defined in Subsec. 159 CA 137. Subsec. (b): Cited. 208 C. 812. Court declined "to formulate or adopt a behavioral definition of driving while impaired". 14 CA 216. Cited. 15 CA 58. Chemical analysis evidence of alcohol level not required to be reported as a percentage of weight and can be reported by volume and equipment that performed test must be approved by Department of Public Safety but is not required to satisfy criteria of regulations. 99 CA 563. State is required to establish as foundation for admissibility of chemical analysis evidence that test was performed with equipment approved by Department of Public Safety; it does not require that device satisfy criteria set forth in regulations. 106 CA 189. When evidence of amount of alcohol or drug in a defendant's blood or urine is excluded under section, then evidence of ratio, dependent upon amount, should also be excluded. 164 CA 406. Subdiv. (5) contains condition precedent to introduction of evidence concerning amount of alcohol in defendant's system as shown by chemical analysis of breath, i.e. that he be afforded additional chemical test. 34 CS 679. Requirements of this Subsec. apply only to prosecutions for violations of Subsec. (a), not to prosecutions under Sec. 53a-58a. 35 CS 511. Subdiv. (1): Defendant did not lack legal capacity to consent to the test merely because he was under a Probate Court conservatorship of his person and estate. 3 Conn. Cir. Ct. 47. Subdiv. (4): Defendant's claim that syringe used by physician to extract blood sample was a device used for the test and therefore had to be checked for accuracy had no merit. *Id.*, 48. Subdiv. (4): Device referred to in Subdiv. is analysis equipment and not equipment used to collect blood sample. 5 Conn. Cir. Ct. 326. Subsec. (c): Cited. 180 C. 252. Rebuttable presumption as a permissive inference discussed. 41 CA 874. "Rebuttable presumption" under statute defined as a "permissive inference". 48 CA 391. Based on the stipulated facts and inferences thereon, trial court reasonably concluded that the urine tests were commenced within 2 hours of operation as required by section. 51 CA 790. Although jury instructions used rebuttable presumption language of statute, such instructions were harmless since court also instructed jury re reasonable inferences and provided examples. 71 CA 179. Subsec. (d): Does not proscribe admission of evidence that fails to satisfy regulatory requirements. 263 C. 390. Use of alcohol testing device measuring weight of alcohol per volume of breath rather than weight of alcohol per weight of blood as required by regulation did not require preclusion of test results, because Subsec. permits testing other than blood testing and does not require that testing device comply with regulatory requirements. 105 CA 59. Subsec. (e): Court's instruction that jury "may make any reasonable inference" was permissible with respect to defendant's refusal to submit to a Breathalyzer test. 84 CA 519. Where trial court repeatedly explained to jury that consciousness of guilt was a permissive inference that it could draw only if it determined that defendant had refused to submit to breath test, court's instruction was well within parameters of section; defendant had no constitutional right to counsel when asked to submit to a breath test, and evidence of defendant's refusal to submit to test was properly admitted despite defendant's request to speak to counsel at time of proposed breath test. 118 CA 654. Subsec. (f): Not unconstitutionally vague under U.S. Constitution as applied to defendant. 41 CA 7. Jury was not misled when trial judge's instructions identified a permissive inference and substantially complied with statutory language; applicability of possible negative inference not limited to violation of Subsec. (a)(1). 63 CA 433. Subsec. (g): Trial court has clear duty under Subsec. to adjudicate second part of two part information in all cases in which information filed. 271 C. 115. Is constitutional and does not violate defendant's right to have a jury decide questions of fact as the question of whether New York's and Connecticut's drunk driving statutes are substantially similar is a question of law properly left to the court. 276 C. 503. The term "substantially the same" does not require the essential elements of the out of state statute to be the same in substance, but rather requires the basic and necessary parts of the crime in the out of state statute to be the same to a considerable degree. 346 C. 238. Imposition of enhanced penalties for third time offense under Subsec. requires only third violation of Subsec. (a), and does not require previous conviction as second time offender. 90 CA 177. Enhanced penalties apply to a subsequent conviction only if the earlier conviction occurred before date of the conduct underlying subsequent violation. 118 CA 725. Statute does not require that prior convictions take place at separate times to trigger imposition of enhanced penalties; defendant's claim of improper conviction as third time offender rather than second time offender because her two prior convictions were entered on the same day was unavailing. 140 CA 347. Subdiv. (3): Certified records of prior convictions that indicated defendant's name, date of birth, operator's license number and address were sufficient evidence of prior convictions for purposes of Subdiv. 146 CA 701. Court case abstract without the case disposition and fingerprint card is, as a matter of law, insufficient evidence of prior conviction for defendant to be charged as a third time offender. 156 CA 792. Legislature clearly has instructed that one must look to the current revision of Subsec. (a)(1) or (a)(2) to determine if the prior conviction in any other state is substantially the same under for purposes of this Subsec. 204 CA 1. Subsec. (h): Subdiv. (3): Enhanced penalties apply to third conviction when only one of two prior convictions occurred within 5 years of the present conviction. 210 C. 573. Cited. 234 C. 918. Subdiv. (3) imposes enhanced penalties on those whose third violation of Sec. 14-227a(a) occurs within the 5-year period,

regardless of when that conviction occurs; judgment of Appellate Court in 38 CA 8 reversed. 236 C. 18. Person sentenced to mandatory minimum sentence not entitled to "good time credit" or "employment credit". 17 CA 827. Administrative suspension of driver's license by Department of Motor Vehicles and prosecution by the court of underlying offense of driving while intoxicated does not violate separation of powers provision of state constitution. 51 CA 4. Statute providing for imposition of enhanced penalties when a person is convicted of a third offense of operating a motor vehicle while under the influence of intoxicating liquor within ten years of prior conviction of the same offense does not require that the third conviction be within 10 years of all prior convictions. 70 CA 565. Subsec. (j): Requirement of a search warrant does not eliminate consent as a means of securing test results. 65 CA 634. Subsec. (k): Medical record was properly admitted as evidence re results of blood alcohol test; absence of specific admissibility standards in regulations indicates that commissioner, having been specifically authorized by legislature, determined no specific rules or procedures were necessary for samples collected and analyzed for medical diagnostic testing. 138 CA 420. Subsec. (l): Cited. 42 CA 589. Does not govern admissibility of blood alcohol tests taken at out-of-state hospitals and is permissive in nature. 57 CA 484. Court satisfied that hospital's internal policy of having registered nurse draw blood from patients who are admitted and fact that emergency room was staffed with two registered nurses show that requirements of Subsec. have been met. 61 CA 90.

2024 Connecticut General Statutes Title 14 - Motor Vehicles. Use of the Highway by Vehicles. Gasoline Chapter 248 - Vehicle Highway Use Section 14-227b. - Implied consent to test operator's blood, breath or urine and to nontestimonial portion of drug influence evaluation. Testing procedures. License suspension. Hearing.

(a) Any person who operates a motor vehicle in this state shall be deemed to have given such person's consent to: (1) A chemical test of such person's blood, breath or urine; and (2) a nontestimonial portion of a drug influence evaluation conducted by a drug recognition expert. If such person is a minor, such person's parent or parents or guardian shall also be deemed to have given their consent for such test or evaluation. As used in this section, "motor vehicle" includes a snowmobile and all-terrain vehicle, as such terms are defined in section 14-379. (b) (1) A police officer who has placed a person under arrest for a violation of section 14-227a, 14-227m or subdivision (1) or (2) of subsection (a) of section 14-227n may request that such person submit to a blood, breath or urine test at the option of the police officer, a drug influence evaluation conducted by a drug recognition expert, or both, after such person has been (A) apprised of such person's constitutional rights; (B) afforded a reasonable opportunity to telephone an attorney prior to the performance of such test or evaluation; (C) informed that evidence of any refusal to submit to such test or evaluation shall be admissible in accordance with subsection (e) of section 14-227a and may be used against such person in any criminal prosecution, except that refusal to submit to the testimonial portions of a drug influence evaluation shall not be considered evidence of refusal of such evaluation for purposes of any criminal prosecution; and (D) informed that such person's license or operating privilege may be suspended in accordance with the provisions of this section if (i) such person refuses to submit to such test or the nontestimonial portion of a drug influence evaluation, (ii) such person submits to such test and the results of such test indicate that such person has an elevated blood alcohol content, or (iii) the officer concludes, through investigation, that such person was operating a motor vehicle under the influence of intoxicating liquor or any drug, or both. (2) If the person refuses to submit to any test or drug influence evaluation, the test or evaluation shall not be given, except if the person refuses or is unable to submit to a blood test, the police officer shall designate another test to be taken. If a person submits to a breath test and the police officer, for reasonable cause, requests an additional chemical test of a different type to detect the presence of a drug or drugs other than or in addition to alcohol, the officer may administer such test, except that if such person refuses or is unable to submit to a blood test, the officer shall designate a urine test to be taken. The police officer shall make a notation upon the records of the law enforcement unit, as defined in section 7-294a, that such officer informed the person that such person's license or operating privilege may be suspended if (A) such person refused to submit to such test or nontestimonial portion of a drug influence evaluation; (B) such person submitted to such test and the results of such test indicated that such person had an elevated blood alcohol content; or (C) the officer concludes, through investigation, that such person was operating a motor vehicle under the influence of intoxicating liquor or any drug, or both. (c) If the person arrested refuses to submit to such test or nontestimonial portion of a drug influence evaluation or submits to such test, commenced within two hours of the time of operation, and the results of such test indicate that such person has an elevated blood alcohol content, the police officer, acting on behalf of the Commissioner of Motor Vehicles, shall immediately revoke and take possession of the motor vehicle operator's license or, if such person is not licensed or is a nonresident, suspend the operating privilege of such person, for a twenty-four-hour period. The police officer shall prepare a report of the incident and shall mail or otherwise transmit in accordance with this subsection the report and a copy of the results of any chemical test to the Department of Motor Vehicles within six business days. The report shall contain such information as prescribed by the Commissioner of Motor Vehicles and shall be subscribed and sworn to under penalty of false statement as provided in section 53a-157b by the arresting officer. If the person arrested refused to submit to such test or evaluation, the report shall be endorsed by a third person who witnessed such refusal. The report shall set forth the grounds for the officer's belief that there was probable cause to arrest such person for a violation of section 14-227a or 14-227m or subdivision (1) or (2) of subsection (a) of section 14-227n and shall state that such person had refused to submit to such test or evaluation when requested by such police officer to do so or that such person submitted to such test, commenced within two hours of the time of operation, and the results of such test indicated that such person had an elevated blood alcohol content. A drug influence evaluation need not be commenced within two hours of the time of operation. The Commissioner of Motor Vehicles may accept a police report under this subsection that is prepared and transmitted as an electronic record, including electronic signature or signatures, subject to such security procedures as the commissioner may specify and in accordance with the provisions of sections 1-266 to 1-286, inclusive. In any hearing conducted

pursuant to the provisions of subsection (g) of this section, it shall not be a ground for objection to the admissibility of a police report that it is an electronic record prepared by electronic means. (d) If a police officer who has placed a person under arrest for a violation of section 14-227a or 14-227m or subdivision (1) or (2) of subsection (a) of section 14-227n does not request that such person submit to a blood, breath or urine test under subsection (b) of this section, or obtains results from a test administered under subsection (b) of this section that indicate that the person does not have an elevated blood alcohol content, such officer shall: (1) Advise such person that such person's license or operating privilege may be suspended in accordance with the provisions of this section if such police officer concludes, through investigation, that such person was operating a motor vehicle under the influence of intoxicating liquor or any drug, or both; and (2) Submit a report to the commissioner in accordance with the procedure set forth in subsection (c) of this section and, if such report contains the results of a blood, breath or urine test that does not show an elevated blood alcohol content, such report shall conform to the requirements in subsection (c) of this section for reports that contain results showing an elevated blood alcohol content. In any report submitted under this subdivision, the officer shall document (A) the basis for the officer's belief that there was probable cause to arrest such person for a violation of section 14-227a or 14-227m or subdivision (1) or (2) of subsection (a) of section 14-227n, and (B) whether the officer concluded, through investigation, that the person was operating a motor vehicle under the influence of intoxicating liquor or any drug, or both. With such report, the officer may submit other supporting documentation indicating the person's intoxication by liquor or any drug, or both. If the officer concludes, through investigation, that the person was operating a motor vehicle under the influence of intoxicating liquor or any drug, or both, the officer shall immediately revoke and take possession of the motor vehicle operator's license or, if such person is not licensed or is a nonresident, suspend the operating privilege of such person for a twenty-four-hour period. (e) (1) Except as provided in subdivision (2) of this subsection, upon receipt of a report submitted under subsection (c) or (d) of this section, the commissioner may suspend any operator's license or operating privilege of such person effective as of a date certain, which date certain shall be not later than thirty days from the later of the date such person received (A) notice of such person's arrest by the police officer, or (B) the results of a blood or urine test or a drug influence evaluation. Any person whose operator's license or operating privilege has been suspended in accordance with this subdivision shall automatically be entitled to a hearing before the commissioner to be held in accordance with the provisions of chapter 54 and prior to the effective date of the suspension. The commissioner shall send a suspension notice to such person informing such person that such person's operator's license or operating privilege is suspended as of a date certain and that such person is entitled to a hearing prior to the effective date of the suspension and may schedule such hearing by contacting the Department of Motor Vehicles not later than seven days after the date of mailing of such suspension notice. (2) Upon receipt of a report that (A) the person's arrest involved an accident resulting in a fatality, or (B) the person has previously had such person's operator's license or operating privilege suspended under the provisions of section 14-227a, 14-227m or 14-227n during the ten-year period preceding the present arrest, the commissioner may suspend any operator's license or operating privilege of such person effective as of the date specified in a notice of such suspension to such person. A person whose operator's license or operating privilege has been suspended in accordance with this subdivision shall automatically be entitled to a hearing before the commissioner, to be held in accordance with the provisions of chapter 54. The commissioner shall send a suspension notice to such person informing such person that such person's operator's license or operating privilege is suspended as of the date specified in such suspension notice, and that such person is entitled to a hearing and may schedule such hearing by contacting the Department of Motor Vehicles not later than seven days after the date of mailing of such suspension notice. Any suspension issued under this subdivision shall remain in effect until such suspension is affirmed under subsection (f) of this section or such operator's license or operating privilege is reinstated in accordance with subsection (h) of this section. (f) If such person does not contact the department to schedule a hearing, the commissioner shall affirm the suspension contained in the suspension notice for the appropriate period specified in subsection (i) of this section. (g) (1) If such person contacts the department to schedule a hearing, the department shall assign a date, time and place for the hearing, which date shall be prior to the effective date of the suspension, except that, with respect to a person whose operator's license or operating privilege is suspended in accordance with subdivision (2) of subsection (e) of this section, such hearing shall be scheduled not later than thirty days after such person contacts the department. At the request of such person, the hearing officer or the department and upon a showing of good cause, the commissioner may grant one or more continuances. (2) A hearing based on a report submitted under subsection (c) of this section shall be limited to a determination of the following issues: (A) Did the police officer have probable cause to arrest the person for operating a motor vehicle while under the influence of intoxicating liquor or any drug, or both; (B) was such person placed under arrest; (C) did such person (i) refuse to submit to such test or nontestimonial portion of a drug influence evaluation, or (ii) submit to such test, commenced within two hours of the time of operation, and the results of such test indicated that such person had an elevated blood alcohol content; and (D) was such person operating the motor vehicle. (3) A hearing based on a report submitted under subsection (d) of this section shall be limited to a determination of the following issues: (A) Did the police officer have probable cause to arrest the person for operating a motor vehicle while under the influence of intoxicating liquor or any drug, or both; (B) was such person placed under arrest; (C) was such person operating a motor vehicle under the influence of intoxicating liquor or any drug, or both; and (D) was such person operating the motor vehicle. (4) In a hearing under this subsection, the results of the test, if administered, shall be sufficient to indicate the ratio of alcohol in the blood of such person at the time of operation, provided such test was commenced within two hours of the time of operation. The fees of any witness summoned to appear at a hearing under this subsection shall be the same as provided by the general statutes for witnesses in criminal cases. Notwithstanding the provisions of subsection (a) of section 52-143, any subpoena summoning a police officer as a witness shall be served not less than seventy-two hours prior to the designated time of the hearing. (5) In a hearing based on a report submitted under subsection (d)

of this section, evidence of operation under the influence of intoxicating liquor or any drug, or both shall be admissible. Such evidence may include, but need not be limited to, (A) the police officer's observations of intoxication, as documented in a report submitted to the commissioner under subsection (d) of this section; (B) the results of any chemical test administered under this section or a toxicology report certified by the Division of Scientific Services within the Department of Emergency Services and Public Protection; (C) hospital or medical records obtained in accordance with subsection (j) of this section or by the consent of the operator; (D) the results of any tests conducted by, or the report of, an officer trained in advanced roadside impaired driving enforcement; or (E) reports of drug recognition experts. (h) If, after a hearing under subdivision (2) of subsection (g) of this section, the commissioner finds in the negative on any one of the issues specified in subparagraph (A), (B), (C) or (D) of said subdivision, the commissioner shall reinstate such license or operating privilege. If, after a hearing under subdivision (3) of subsection (g) of this section, the commissioner finds in the negative on any one of the issues specified in subparagraph (A), (B), (C) or (D) of said subdivision, the commissioner shall reinstate such license or operating privilege. If, after such hearing under subdivision (2) or (3) of subsection (g) of this section, the commissioner does not find on any one of said issues in the negative or if such person fails to appear at such hearing, the commissioner shall affirm the suspension contained in the suspension notice for the appropriate period specified in subsection (i) of this section. The commissioner shall render a decision at the conclusion of such hearing and send a notice of the decision by bulk certified mail or by personal delivery, as defined in section 4-166, to such person. The notice of such decision sent by bulk certified mail or by personal delivery to the address of such person as shown by the records of the commissioner shall be sufficient notice to such person that such person's operator's license or operating privilege is reinstated or suspended, as the case may be. A notice of the decision shall only be transmitted by personal delivery if the operator has consented, in writing, to such personal delivery. (i) (1) The commissioner shall suspend the operator's license or operating privilege of a person who did not contact the department to schedule a hearing, who failed to appear at a hearing, or against whom a decision was issued, after a hearing, pursuant to subsection (h) of this section, as of the effective date contained in the suspension notice, for a period of forty-five days. As a condition for the restoration of such operator's license or operating privilege, such person shall be required to install an ignition interlock device on each motor vehicle owned or operated by such person and, upon such restoration, be prohibited from operating a motor vehicle unless such motor vehicle is equipped with a functioning, approved ignition interlock device, as defined in section 14-227j, for the longer of either (A) the period prescribed in subdivision (2) of this subsection for the present arrest and suspension, or (B) the period prescribed in subdivision (1), (2) or (3) of subsection (g) of section 14-227a or subdivision (1), (2) or (3) of subsection (c) of section 14-227m or subdivision (1) or (2) of subsection (c) of section 14-227n for the present arrest and conviction, if any. (2) (A) A person twenty-one years of age or older at the time of the arrest who submitted to a test and the results of such test indicated that such person had an elevated blood alcohol content, or was found to have been operating a motor vehicle under the influence of intoxicating liquor or any drug, or both based on a report filed pursuant to subsection (d) of this section, shall install and maintain an ignition interlock device for the following periods: (i) For a first suspension under this section, six months; (ii) for a second suspension under this section, one year; and (iii) for a third or subsequent suspension under this section, two years; (B) a person under twenty-one years of age at the time of the arrest who submitted to a test and the results of such test indicated that such person had an elevated blood alcohol content, or was found to have been operating a motor vehicle under the influence of intoxicating liquor or any drug, or both based on a report filed pursuant to subsection (d) of this section, shall install and maintain an ignition interlock device for the following periods: (i) For a first suspension under this section, one year; (ii) for a second suspension under this section, two years; and (iii) for a third or subsequent suspension under this section, three years; and (C) a person, regardless of age, who refused to submit to a test or nontestimonial portion of a drug influence evaluation shall install and maintain an ignition interlock device for the following periods: (i) For a first suspension under this section, one year; (ii) for a second suspension under this section, two years; and (iii) for a third or subsequent suspension, under this section, three years. (3) Notwithstanding the provisions of subdivisions (1) and (2) of this subsection, a person whose motor vehicle operator's license or operating privilege has been permanently revoked upon a third offense pursuant to subsection (g) of section 14-227a or subsection (c) of section 14-227m shall be subject to the penalties prescribed in subdivision (2) of subsection (i) of section 14-111. (j) Notwithstanding the provisions of subsections (b) to (i), inclusive, of this section, any police officer who obtains the results of a test of a blood sample taken from or a urine sample provided by an operator of a motor vehicle who was involved in an accident and suffered or allegedly suffered physical injury in such accident, or who was otherwise deemed by a police officer to require treatment or observation at a hospital, shall notify the commissioner and submit to the commissioner a written report if such results indicate that such person had an elevated blood alcohol content, or any quantity of an intoxicating liquor or any drug, or both, in such person's blood, and if such person was arrested for violation of section 14-227a or 14-227m or subdivision (1) or (2) of subsection (a) of section 14-227n. The report shall be made on a form approved by the commissioner containing such information as the commissioner prescribes, and shall be subscribed and sworn to under penalty of false statement, as provided in section 53a-157b, by the police officer. The commissioner may, after notice and an opportunity for hearing, which shall be conducted by a hearing officer on behalf of the commissioner in accordance with chapter 54, suspend the motor vehicle operator's license or operating privilege of such person for the appropriate period of time specified in subsection (i) of this section and require such person to install and maintain an ignition interlock device for the appropriate period of time prescribed in subsection (i) of this section. Each hearing conducted under this subsection shall be limited to a determination of the following issues: (1) Whether the police officer had probable cause to arrest the person for operating a motor vehicle while under the influence of intoxicating liquor or drug, or both; (2) whether such person was placed under arrest; (3) whether such person was operating the motor vehicle; (4) whether (A) the results of the analysis of the blood or urine of such person indicate that such person had an elevated blood alcohol content, or (B) the person

was operating a motor vehicle under the influence of intoxicating liquor or any drug, or both; and (5) in the event that a blood sample was taken, whether the blood sample was obtained in accordance with conditions for admissibility and competence as evidence as set forth in subsection (k) of section 14-227a. If, after such hearing, the commissioner finds on any one of the said issues in the negative, the commissioner shall not impose a suspension. The fees of any witness summoned to appear at the hearing shall be the same as provided by the general statutes for witnesses in criminal cases, as provided in section 52-260. (k) The provisions of this section shall apply with the same effect to the refusal by any person to submit to an additional chemical test as provided in subparagraph (E) of subdivision (1) of subsection (b) of section 14-227a. (l) The provisions of this section shall not apply to any person whose physical condition is such that, according to competent medical advice, such test would be inadvisable. (m) Notwithstanding the provisions of this section, when a person is required, pursuant to this section, to install and maintain an ignition interlock device or is prohibited, pursuant to this section, from operating a motor vehicle except under the condition that such device is installed and maintained on such vehicle, such requirement and condition shall cease to apply to such person upon any of the following conditions being met in the case of an arrest for a violation of section 14-227a, 14-227m or subdivision (1) or (2) of subsection (a) of section 14-227n (1) for which the only intoxicating substance detected is cannabis: (A) All charges resulting from such alleged violation are withdrawn, nolleed or dismissed; (B) the person has been acquitted of any charges resulting from such alleged violation; or (C) any conviction of such person based upon any charges resulting from such alleged violation is vacated, overturned or erased, or (2) for which the person was convicted for such violation, alcohol was detected as an intoxicating substance for such violation and such person has received an absolute pardon for each such conviction. Upon the ceasing of the application of such requirement and condition upon such person, the commissioner shall provide written notification to the person indicating that such requirement and condition has ceased to apply to such person. The provisions of this subsection shall not affect any other requirement or condition applied to such person. (n) The state shall pay the reasonable charges of any physician who, at the request of a law enforcement unit, as defined in section 7-294a, takes a blood sample for purposes of a test under the provisions of this section. (o) For the purposes of this section, "elevated blood alcohol content" means (1) a ratio of alcohol in the blood of such person that is eight-hundredths of one per cent or more of alcohol, by weight, (2) if such person is operating a commercial motor vehicle, a ratio of alcohol in the blood of such person that is four-hundredths of one per cent or more of alcohol, by weight, or (3) if such person is less than twenty-one years of age, a ratio of alcohol in the blood of such person that is two-hundredths of one per cent or more of alcohol, by weight. (p) The Commissioner of Motor Vehicles shall adopt regulations, in accordance with chapter 54, to implement the provisions of this section. History: 1965 act added provision re implied consent of parents or guardian of minor; 1967 acts required state to pay charges of physician who takes blood sample at police department's request, required arrested person to be informed of constitutional rights, required that three conditions be met for suspension or revocation of license rather than that single condition, i.e. that person was operating vehicle, be met and made provisions inapplicable if charge nolleed or changed; P.A. 75-205 included reference to urine tests and to operation of vehicle under influence of drug or both drug and alcohol; P.A. 80-438 specified that judge rather than court or jury is responsible for making finding and added provision re finding in case where charge nolleed or changed, allowed suspension or revocation for maximum of 6 months rather than upon terms and conditions of commissioner and deleted previous provision excluding nolleed or changed charge; P.A. 81-446 added the provisions that the license of any person who refuses to submit to test shall be automatically suspended for 90 days, that police officer shall file a written report of such refusal, and that any person whose operating privilege has been suspended in accordance with this section shall be entitled to an immediate hearing before the commissioner; P.A. 82-403 amended Subsec. (b) by replacing the provision that a license will be suspended "for a period of ninety days" with "in accordance with the provisions of subsections (d) and (e) of this section", amended Subsec. (c) by adding "resulting in erratic driving, a motor vehicle violation or a motor vehicle accident", amended Subsec. (d) by specifying its provisions concerned "a first" refusal, made Subsec. (e) a part of Subsec. (d) and added a new Subsec. (b) to authorize the police officer to designate which test the arrested person shall take, to provide that if the person refuses or is unable to submit to a blood test the police officer shall designate the breath or urine test, to require the police officer to inform the person that evidence of refusal to submit to a test will be admissible and may be used against him in a criminal prosecution and to require the police officer to make a record that he informed the person that refusal to take the test would cause suspension of his driver's license, amended Subsec. (d) to increase from 90 days to 6 months the period of license suspension upon a first refusal, and amended Subsec. (f) to change its applicability from a person who refuses to take a test for the "second or subsequent" time to a person whose license has previously been suspended for a refusal, who has previously been found guilty of operating under the influence or who has previously participated in the pretrial alcohol education system; P.A. 85-596 amended Subsec. (b) to add requirement of affording an operator a reasonable opportunity to telephone an attorney prior to the performance of the test and inserted a new Subsec. (g) re the applicability of the provisions of the section to a refusal to submit to an additional test and

relettered the remaining Subsecs. accordingly; P.A. 89-314 extensively revised section by making the provisions applicable to any person who is arrested for manslaughter in the second degree with a motor vehicle or assault in the second degree with a motor vehicle and to any person who submits to a test or analysis where the results of such test or analysis indicate that at the time of the alleged offense the ratio of alcohol in the blood of such person was 0.10% or more of alcohol, by weight, by amending Subsec. (c) to require the arresting police officer "acting on behalf of the commissioner of motor vehicles" to "take possession" of the license or "suspend" the nonresident operating privilege for 24 hours, issue a temporary operator's license or nonresident operating privilege valid for the period commencing 24 hours after issuance and ending 35 days after the date such person received notice of his arrest, prepare a report of the incident and mail the report together with a copy of the completed temporary license form, any operator's license and a copy of the results of any chemical test or analysis to the department of motor vehicles within 3 business days, and require that the report be made by the police officer before whom such refusal was made "or who administered or caused to be administered such test or analysis", by amending Subsec. (d) to replace provisions requiring the commissioner upon receipt of a report of a first refusal to suspend a license for 6 months with provisions requiring the commissioner upon receipt of a report to suspend the license "effective as of a date certain, which date shall be not later than thirty-five days after the date such person received notice of his arrest by the police officer" and to add provisions requiring the commissioner to send the person a suspension notice and specifying the contents of such notice, by deleting Subsec. (g), (h) and (i) as Subsecs. (i), (j) and (k), respectively, and by adding Subsec. (l) re regulations; P.A. 90-263 amended Subsec. (f) to require that fees of witnesses summoned to appear at the hearing be the same as provided by the general statutes for witnesses in criminal cases; P.A. 93-371 eliminated the requirement that the test results indicate an elevated blood alcohol ratio "at the time of the alleged offense" by deleting that phrase where appearing, amended Subsec. (c) to require the test or analysis be commenced within two hours of the time of operation and require the report to be "subscribed" and sworn to under penalty of false statement by "the arresting officer" rather than by "the police officer before whom such refusal was made or who administered or caused to be administered such test or analysis", amended Subsec. (f) to authorize the granting of a continuance "at the request of such person or the hearing officer", provide in Subdiv. (3) that part of the issue to be determined is whether the test or analysis was commenced within two hours of the time of operation and added provision requiring evidence be presented that the test results and analysis thereof indicate the blood alcohol content at the time of operation when the additional test indicates the blood alcohol ratio is 0.12% or less and is higher than the results of the first test and amended Subsec. (g) to authorize the commissioner to send a notice of his decision by "bulk" certified mail and replace "Unless a continuance is granted to such person" with "Unless a continuance of the hearing is granted", effective July 1, 1993 (Revisor's note: Towards the end of Subsec. (f) the phrase "twelve-hundredths of one per cent or less of alcohol, by weight," was changed editorially by the Revisors to "twelve-hundredths of one per cent or less of alcohol, by weight," for consistency); P.A. 94-189 amended Subsec. (B) as Subpara. (C), to revised Subsec. (i)(2) by replacing provision that specified a uniform suspension period of one year with provisions of Subparas. Question of whether police have a reasonable and articulable suspicion to justify investigative stop is outside scope of the 4 issues to be considered at a license suspension hearing conducted pursuant to statute. 252 C. 38. Defendant's being found intoxicated and asleep with key inserted in the ignition in the on position is sufficient evidence of operation of a motor vehicle. 281 C. 604. Suspension of driver's license is not a criminal conviction, therefore continued criminal prosecution under Sec. 14-227a did not violate defendant's federal and state constitutional rights against double jeopardy; neither definition of “conviction” under Sec. 14-1 nor administrative suspension under section forecloses future proceedings against defendant for the same offense. 290 C. 634. Finding that plaintiff refused to submit to breath analysis valid where plaintiff had provided sufficient breath for previous test and was warned his failure to blow would constitute a refusal. 47 CA 509. Without legislative action to enlarge the scope of a license suspension hearing beyond the 4 issues specified in Subsec. (f), noncompliance with Subsec. (b) is irrelevant in such a proceeding. Id., 839. Court rejected defendant's claim that statute is void for vagueness because an ordinary person has no ascertainable method for measuring his or her own blood alcohol level. 48 CA 635. Where arrested person refuses to take breath test, statute requires presence of 3 persons: the arresting officer, person charged and a third party witness who may or may not be the same person who took the arresting officer's oath. 54 CA 62. Analysis provided for under section assumes a test for which results are obtained. 60 CA 455. Plaintiff was not operating motor vehicle within section's meaning because, at the time the officer approached, plaintiff was not doing any act, manipulating any machinery or making use of any mechanical or electrical agency that alone or in sequence would set in motion the vehicle's motive power. 92 CA 365. Determination that plaintiff refused to submit to a chemical alcohol test was supported by evidence that within 2 hours of operation of the motor vehicle, police officer asked plaintiff 3 times whether he would submit to testing and plaintiff did not consent but, rather, conditioned his decision to submit, and section does not permit an operator to rescind a refusal to submit to a chemical analysis of his or her blood, breath or urine. 156 CA 516. The extent of the errors and discrepancies in A-44 form far surpassed mere scrivener's errors and undermined the exhibit's reliability as a whole such that admitting such form as an exhibit in hearing under section was an abuse of discretion. 164 CA 616; judgment reversed, see 330 C. 651. Prior to statute, refusal of accused, while in custody, to submit samples of body fluids, unaccompanied by words or acts in the nature of admissions by conduct, was held inadmissible. 22 CS 321. Cir. Ct. 34, 46. Driver did not have fifth amendment right to consult with counsel before deciding whether to take breath test and failure of statute to require police officer to inform driver that his Miranda rights did not extend to taking a breath test did not deprive him of due process under fourteenth amendment. 53 CA 391. Failure to warn completely as required by statute renders suspension of license contrary to law. 40 CS 505. Reference to actual suspension period not required in warning to be given to operator. Id., 512. Subsec. (c): Written report required by section may be admissible at administrative suspension hearing even if officer originating report was not currently certified to administer breath analysis tests. 229 C. 31. Incident report that was completed and mailed by arresting officer after three-day statutory deadline

was inadmissible in license suspension hearing absent officer testimony; court erred in determining that statutory requirement was directory rather than mandatory. 348 C. 778. Report of refusal to take breath test properly admitted into evidence in administrative proceeding where plaintiff, arresting officer and testing officer were present during testing and arresting officer swore to report form in capacity as arresting officer and as witness to the refusal; court properly determined there was substantial evidence to support commissioner's finding of refusal by conduct where plaintiff failed to comply with officer's repeated instructions as to how test should be performed, improperly blew into Intoxilyzer and subsequently refused to blow into Intoxilyzer again. 61 CA 213. Refusal to take breath test can occur through conduct as well as expressed refusal. 70 CA 76. Watching refusal to submit to test via closed circuit television does not constitute "witnessing such refusal". 101 CA 674. The time requirement in Subsec. for police officer to mail report and test results within three business days is a matter of convenience rather than a matter of substance and, therefore, is directory. 210 CA 109. Subsec. (d): Before suspending a license, commissioner is not required to find that subject understood consequences of refusal to submit to chemical testing. 200 C. 1. License suspension hearing must be limited to the 4 issues set forth. 204 C. 507. Scope of administrative hearing clearly limited. Id., 521. Subsec. Subsec. (o): Appellate Court's implicit determination in 99 CA 563 that the Intoxilyzer's method of measuring blood alcohol content—extrapolating weight-by-weight measurement from weight-by-volume measurement—complies with the "by weight" directive in Sec. 14-227a(a), also applies to the same directive in this Subsec. 51 CS 452.

Highway UseSection 14-233. - Passing on right.

The driver of a vehicle may overtake and pass upon the right of another vehicle only when conditions permit such movement in safety and under the following conditions: (1) When the vehicle overtaken is making or has signified the intention to make a left turn; (2) when lines of vehicles traveling in the same direction in adjoining traffic lanes have come to a stop or have reduced their speed; (3) upon a one-way street free from obstructions and of sufficient width for two or more lines of moving vehicles; (4) upon a limited access highway or parkway free from obstructions with three or more lanes provided for traffic in one direction. Such movement shall not be made by driving off the pavement or main-traveled portion of the highway except where lane designations, signs, signals or markings provide for such movement. Violation of any provision of this section shall be an infraction. (1955, S. 1387d; 1957, P.A. 258; February, 1965, P.A. 448, S. 20; P.A. 75-577, S. 76, 126.) (a) The Office of the State Traffic Administration may determine those portions of any state highway where overtaking and passing or driving to the left of the highway would be especially hazardous and may by appropriate signs or markings on the highway indicate the beginning and end of such zones. A local traffic authority, as defined in section 14-297, may, in accordance with standards approved by the Office of the State Traffic Administration, determine and designate such no-passing zones on highways under its jurisdiction. When such signs or markings are in place and clearly visible to an ordinarily observant person, each driver of a vehicle shall obey the directions thereof. Except as provided in subsection (b) of this section, a violation of the provisions of this section shall be an infraction. (b) The driver of a vehicle may overtake and pass, in a marked no-passing zone, pedestrians, parked or standing vehicles, animals, bicycles, electric bicycles, mopeds, scooters, electric foot scooters, vehicles moving at a slow speed, as defined in section 14-220, or obstructions on the right side of the highway, as listed in subdivision (2) of subsection (a) of section 14-230, provided such overtaking and passing may be conducted safely, with adequate sight distance and without interfering with oncoming traffic or endangering traffic, as defined in section 14-297. (a) and amended same to add exception re Subsec. (b), and added Subsec. (b) re overtaking and passing in a no-passing zone, effective July 1, 2015; P.A. 18-165 amended Subsec. (e) The driver of a vehicle intending to turn to the left within an intersection or into an alley, private road or driveway shall yield the right-of-way to any vehicle approaching from the opposite direction which is within the intersection or within the area formed by the extension of the lateral lines of the private alley, road or driveway across the full width of the public highway with which it intersects, or so close to such intersection of public highways or to the area formed by the extension of the lateral lines of said private alley, road or driveway across the full width of the public highway as to constitute an immediate hazard. (f) No person operating a vehicle who overtakes and passes a person riding a bicycle, an electric bicycle or an electric foot scooter and proceeding in the same direction shall make a right turn at any intersection or into any private road or driveway unless the turn can be made with reasonable safety and will not impede the travel of the person riding the bicycle, electric bicycle or electric foot scooter. Any stop or turn signal required by section 14-242 or 14-243 may be given either by means of the hand and arm or by a signal lamp or lamps or mechanical signal device. Hand signals shall be as follows: (1) To stop or decrease speed: Hand and arm extended downward; (2) to turn left or to leave or draw away from a curb or the edge of the highway: Hand and arm extended horizontally with forefinger pointed; (3) to turn right: Hand and arm extended upward. Each operator of a motor vehicle who makes a turn signal by means of signal lamps or mechanical signal device shall turn in the direction indicated and return such signal to the nonoperating position immediately after completing the movement for which a signal has been given. 2024 Connecticut General Statutes Title 14 - Motor Vehicles. Use of the Highway by Vehicles. Gasoline Chapter 248 - Vehicle Highway Use Section 14-245. - Intersection. Right-of-way.

As used in this section and subsection (e) of section 14-242, "intersection" means the area common to two or more highways which cross each other. Each driver of a vehicle approaching an intersection shall grant the right-of-way at such intersection to any vehicle approaching from his right when such vehicles are arriving at such intersection at approximately the same time, unless otherwise directed by a traffic officer. Failure to grant the right-of-way as provided in this section shall be an infraction. (1955, S. 1397d; 1971, P.A. 299, S. 1; P.A. 73-616, S. 11; P.A. 75-577, S. 89, 126.) History: 1971 act defined "intersection"; P.A. 73-616 deleted reference to repealed Sec. 14-246 and referred instead to Subsec. (e) of Sec. 14-242; P.A. 75-577 stated that failure to grant right-of-way is an infraction. See Sec. 14-111g re operator's retraining program. See Sec. 14-250b re obstructing intersection. See Sec. 14-295 re assessment of double or treble damages. (a) Notwithstanding the provisions of subsections (a) to (c), inclusive, of section 14-242, the operator of any school bus, when about to bring his bus to a stop to receive or discharge passengers, shall signal his intention to do so by causing the flashing signal lights to be displayed for not less than fifty feet before he brings the bus to a stop so as to be clearly visible to the operator of any oncoming or overtaking vehicle or motor vehicle, except that the operator of any school bus equipped with amber flashing signal lights shall signal such intention by causing the amber flashing signal lights to be displayed for not less than one hundred feet before he brings the bus to a stop. The operator of any school bus, having brought his vehicle to a stop, shall not open the door to receive or discharge passengers until all vehicles approaching from the front and overtaking from the rear have stopped in compliance with the indicated signal to stop. The operator of any school bus equipped with amber flashing signal lights and a stop semaphore, having brought his vehicle to a stop, shall cause the red flashing signal lights to be displayed and the stop semaphore to be extended and shall not open the door until all vehicles approaching from the front and overtaking from the rear have stopped in compliance with the indicated signal to stop. After all passengers are safely aboard or discharged and safely off the highway, the operator shall extinguish the stop lights and the operator of any school bus equipped with a stop semaphore shall withdraw the stop semaphore. (b) The operator of any school bus shall not operate the engine of any school bus for more than three consecutive minutes when the school bus is not in motion except (1) when the school bus is forced to remain motionless because of traffic conditions or mechanical difficulties over which the operator has no control, (2) when it is necessary to operate heating, cooling or auxiliary equipment installed on the school bus when such equipment is necessary to accomplish the intended use of the school bus, including, but not limited to, the operation of safety equipment, (3) when the outdoor temperature is below twenty degrees Fahrenheit, (4) when it is necessary to maintain a safe temperature for students with special needs, (5) when the school bus is being repaired, or (6) when the operator is in the process of receiving or discharging passengers on a public highway or public road. (c) Any person who violates any provision of this section shall, for a first offense, be deemed to have committed an infraction and for each subsequent offense shall be fined not less than one hundred dollars nor more than five hundred dollars. (2) A warning sign shall be posted on all school buses in which a municipal school bus violation enforcement system is installed and operated indicating the use of such system. (d) (1) Upon receipt of an evidence file from a municipal school bus violation enforcement system that captures an alleged violation of an ordinance adopted pursuant to subsection (b) of this section, a police officer or authorized municipal employee shall review such file. See Sec. 14-80(f) re use of sirens, whistles or bells as warning signal devices. The provisions of this section create an exception to Sec. 14-299(b) concerning traffic lights at intersections. 114 C. 400. If a person is preparing for a left turn at an intersection, it may not be practicable to drive to the right-hand side and a jury should be so charged; under section, sounding of the siren of the cruiser is essential to its right-of-way. 150 C. 349. Effect of statute is merely to displace the conclusive presumption of negligence that ordinarily arises from the violation of traffic rules. 189 C. 601. Cited. 41 CA 476. Though ambulance had right-of-way, driver still had duty to look to right on entering intersection. 15 CS 232. Fact that police officer in answering an emergency call had right-of-way did not excuse him from operating his car with reasonable care. 19 CS 32. Cited. 34 CS 555; 38 CS 377. Subsec. (b): Since Subdiv. (4) does not include a safe driving provision, it provides immunity to drivers of emergency vehicles from criminal liability for violating statutes governing direction of movement or turning in specific directions. 60 CA 647. Subsec. (d): Provisions require officers to exercise judgment in determining whether to pursue a fleeing motorist and therefore the duty imposed is discretionary and the phrase “due regard”, rather than mandating a particular response to specific conditions, imposes a general duty on officers to exercise their judgment and discretion in a reasonable manner. 336 C. 1. Subsec. (e): Court found that “immediate vicinity” included police car with its lights flashing while it was within 1/4 mile of vehicle in question. 108 CA 447.

(b) When traffic at an intersection is alternately directed to proceed and to stop by the use of signals exhibiting colored lights or lighted arrows, successively one at a time or in combination, only the colors green, red and yellow shall be used, except for special pedestrian-control signals carrying word legends or symbols. Such lights or arrows shall apply to drivers of vehicles and pedestrians and shall indicate the following: (1) Circular green alone: Vehicular traffic facing a green signal may proceed straight through or turn right or left unless a sign or marking at such place prohibits either such turn or straight through movement, except that such traffic shall yield the right-of-way to pedestrians and vehicles within a crosswalk or the intersection at the time such signal was exhibited; pedestrians facing the green signal, except when directed by separate pedestrian-control signals, may proceed across the highway within any marked or unmarked crosswalk. (2) Yellow: Vehicular traffic facing a steady yellow signal is thereby warned that the related green movement is being terminated or that a red indication will be exhibited immediately thereafter, when vehicular traffic shall stop before entering the intersection unless so close to the intersection that a stop cannot be made in safety; pedestrians facing a steady yellow signal, except when directed by separate pedestrian-control signals, are thereby advised that there is insufficient time to cross the roadway before a red indication is shown and no pedestrian shall then start to cross the roadway. (3) Red alone: Vehicular traffic facing a steady red signal alone shall stop before entering the crosswalk on the near side of the intersection or, if none, then before entering the intersection and remain standing until the next indication is shown; provided, on or after July 1, 1979, vehicular traffic traveling in the travel lane nearest the right hand curb or other defined edge of the roadway, unless a sign approved by the Office of the State Traffic Administration has been erected in the appropriate place prohibiting this movement, may cautiously enter the intersection to make a right turn onto a two-way street or onto another one-way street on which all the traffic is moving to such vehicle's right after such vehicle has stopped as required in this subdivision and yielded the right-of-way to pedestrians within an adjacent crosswalk and to other traffic lawfully using the intersection. Pedestrians facing a steady red signal alone, except when directed by separate pedestrian-control signals, shall not enter the roadway. (4) Green arrow: Vehicular traffic facing a green arrow signal, shown alone or in combination with another indication, may cautiously enter the intersection only to make the movement indicated by such arrow, or such other movement as is permitted by other indications

shown at the same time, but such vehicular traffic shall yield the right-of-way to pedestrians within a crosswalk and to other traffic lawfully within the intersection. (5) Whenever special pedestrian-control signals exhibiting the words "Walk" or "Don't Walk" or the image of a walking person symbolizing "Walk" or an upraised hand symbolizing "Don't Walk" are in place, such signals shall indicate as follows: "Walk" or walking person symbol: Pedestrians facing such signals may proceed across the roadway in the direction of the signal and shall be given the right-of-way by the drivers of all vehicles; "Don't Walk" or upraised hand symbol: No pedestrian shall start to cross the roadway in the direction of such signal, but any pedestrian who has partially completed crossing on the walk signal shall proceed to a sidewalk or safety island while the flashing "Don't Walk" or flashing upraised hand symbol signal is showing. (c) When an illuminated flashing red or yellow signal is used in a traffic sign or signal, it shall require obedience by vehicular traffic as follows: (1) Flashing red: When a red lens is illuminated by rapid intermittent flashes, drivers of vehicles shall stop before entering the nearest crosswalk at an intersection, or at a limit line when marked or, if none, then before entering the intersection, and the right to proceed shall be subject to the rules applicable after making a stop at a stop sign. (2) When a yellow lens is illuminated with rapid intermittent flashes, drivers of vehicles facing such signal may proceed through the intersection or past such signal only with caution. (d) Lenses of the following colors only shall be used and shall be arranged vertically in the signal face or, when necessary, horizontally, and shall conform to the following positions: When arranged vertically, red shall be located at the top, yellow shall be located directly below red and the remaining indications below the yellow in the following order: Flashing yellow, circular green, vertical arrow, left-turn arrow and right-turn arrow, as needed; when arranged horizontally, red shall be located at the left, yellow shall be located directly to the right of red and the remaining indications to the right of yellow in the following order: Flashing yellow, left-turn arrow, circular green, vertical arrow and right-turn arrow, as needed. (e) When lane-direction-control signals are placed over the individual lanes of a street or highway, vehicular traffic may travel in any lane over which a green arrow signal is shown, but shall not enter or travel in any lane over which a red X signal is shown. (f) If a traffic control signal, approved by the Office of the State Traffic Administration, is erected and maintained at a place other than an intersection, the provisions of this section shall be applicable except as to those provisions which by their nature can have no application. Any stop required shall be made at a sign or marking on the pavement indicating where the stop shall be made, but in the absence of any sign or marking, the stop shall be made at the signal. 2024 Connecticut General Statutes Title 14 - Motor Vehicles. Use of the Highway by Vehicles. Gasoline Chapter 249 - Traffic Control and Highway Safety Section 14-301. - Through ways. Stop signs.

(a) The Office of the State Traffic Administration may designate any state highway or part thereof or any bridge upon any such highway as a through way, and may, after notice, revoke any such designation. The traffic authority of any town, city or borough may designate any highway or part thereof under the control of such town, city or borough as a through way, and may, after notice, revoke any such designation. (b) No designation of a through way shall become effective as to regulation of traffic at any intersection thereon until the Office of the State Traffic Administration or such other traffic authority has caused signs to be erected at such intersections. Each such sign shall bear the word “stop”, which shall be self-illuminated at night or so placed as to be illuminated by street lights or by headlights of approaching motor vehicles, and each such sign shall be located as near as practicable to the traveled portion of the highway at the entrance to which the stop is to be made, or at the nearest line of the crosswalk thereat, and shall be clearly visible for a distance of one hundred feet along the street intersecting the through way. (c) The driver of a vehicle shall stop in obedience to a stop sign at such clearly marked stop line or lines as may be established by the traffic authority having jurisdiction or, in the absence of such line or lines, shall stop in obedience to a stop sign at the entrance to a through highway and shall yield the right-of-way to vehicles not so obliged to stop which are within the intersection or approaching so closely as to constitute an immediate hazard. (d) Nothing herein contained shall prevent said office or such traffic authority from erecting such stop signs on all corners of any intersection within its jurisdiction, and thereafter the provisions of subsection (c) of this section, relating to the stopping of motor vehicles and the right-of-way within such intersection, shall apply to the operation of motor vehicles on each of the intersecting streets. (e) The driver of a vehicle shall stop in obedience to a stop sign at a railroad crossing erected and maintained on the highway by requirement of the Commissioner of Transportation or the Office of the State Traffic Administration. The Office of the State Traffic Administration, on any state highway, or a local traffic authority, on any highway under its control, may designate intersections at which signs bearing the words “Yield” may be erected. The driver of a vehicle approaching a “Yield” sign shall, in obedience to such sign, slow down to a speed reasonable for the existing conditions, and shall yield the right-of-way to any vehicle in the intersection or approaching on another highway so closely as to constitute an immediate hazard during the time such driver is moving across or within the intersection, provided, if such driver is involved in a collision, such collision shall be deemed prima facie evidence of such driver's failure to yield the right-of-way. (1955, S. 1406d; February, 1965, P.A. 448, S. 40; P.A. 12-132, S. 33.) History: 1965 act deleted reference to state aid highway, words “right-of-way” after “Yield” and provision specifying application of collision proviso was to collisions with pedestrians or other vehicles, and changed driver's duty on approaching sign from slowing to 10 miles per hour and yielding so as to avoid collision to slowing to reasonable speed so as to avoid hazard; P.A. 12-132 replaced “State Traffic Commission” with “Office of the State Traffic Administration”, effective July 1, 2012. Subject to the provisions of this chapter, the traffic authority shall have power to designate streets as one-way streets and to place and maintain on each street intersecting a street designated as a one-way street, at or near the property line of such one-way street, appropriate signs upon or in the street; such signs, devices or marks to bear the word “one-way” with an arrow pointing in the direction that all vehicular traffic shall travel when using such designated one-way street. No person shall operate or drive any vehicle upon or through any one-way street contrary to the directions as indicated by such signs, devices or marks established under the provisions of this section. (1949 Rev., S. 2521.) See Sec. 14-111g re operator's retraining program.

(b) Prior to establishing a pedestrian safety zone, the traffic authority shall conduct an engineering study in accordance with the Federal Highway Administration's Manual on Uniform Traffic Control Devices for Streets and Highways, as amended from time to time, and other generally accepted engineering principles and guidance. The study shall be completed by a professional engineer licensed to practice in this state and shall consider factors, including, but not limited to, pedestrian activity, type of land use and development, parking and the record of traffic crashes in the area under consideration to be a pedestrian safety zone. If the study recommends the establishment of a pedestrian safety zone, the study shall also include a speed management plan and recommend actions to achieve lower motor vehicle speeds. (c) In a municipality where the Office of the State Traffic Administration approves speed limits on the streets, highways and bridges or in any parking area for ten cars or more or on any private road wholly within the municipality in accordance with section 14-218a, the traffic authority shall notify the office in writing of the establishment of any pedestrian safety zone and confirm that the requirements of this section have been satisfied. The office shall be the sole authority for establishing a pedestrian safety zone on a state highway and shall provide a written explanation of the reasons for denying any such request. (e) The Office of the State Traffic Administration may adopt regulations, in accordance with the provisions of chapter 54, to implement the provisions of this section. (P.A. 21-28, S. 7; P.A. 22-40, S. 20.) History: P.A. 22-40 amended Subsec. 2024 Connecticut General Statutes Title 14 - Motor Vehicles. Use of the Highway by Vehicles. Gasoline Chapter 249 - Traffic Control and Highway Safety Section 14-307c. - Municipal use of automated traffic enforcement safety devices. Agreements re design, installation, operation or maintenance. Ordinance. Requirements. Citations. Defenses.

(a) Any municipality may authorize the use of automated traffic enforcement safety devices at locations within school zones, pedestrian safety zones and other places in such municipality, provided (1) the municipality adopts an ordinance in accordance with the provisions of this section, and (2) the locations of such devices are identified in a plan approved by the Department of Transportation pursuant to section 14-307e. (b) The municipality may enter into agreements with vendors for the design, installation, operation or maintenance, or any combination thereof, of automated traffic enforcement safety devices. If a vendor designs, installs, operates or maintains an automated traffic enforcement safety device, the vendor's fee may not be contingent on the number of citations issued or fines paid pursuant to an ordinance adopted under this section. (c) Any ordinance adopted under this section shall specify the following: (1) That an automated traffic enforcement safety device shall be operated by an automated traffic enforcement safety device operator; (2) that the owner of a motor vehicle commits a violation of the ordinance if the person operating such motor vehicle (A) exceeds the posted speed limit by ten or more miles per hour and such operation is detected by an automated traffic enforcement safety device, or (B) fails to stop such motor vehicle when facing a steady red signal on a traffic control signal and such failure is detected by an automated traffic enforcement safety device; (3) an automated traffic enforcement safety device shall be used solely for identifying violations of the ordinance; (4) for the first thirty days after a location is equipped

with an operational automated traffic enforcement safety device, the owner of a motor vehicle allegedly committing a violation of such ordinance that is detected by such device shall receive a written warning instead of a citation, as described in subsection (i) of this section; (5) payment of a fine and any associated fee imposed for a violation of the ordinance may be made by electronic means; (6) a sworn member or employee of the municipality's police department or an employee of the municipality, as designated by the traffic authority, shall review and approve the recorded images before a citation is mailed to the owner of such motor vehicle; and (7) the defenses available to the owner of a motor vehicle allegedly committing a violation of such ordinance, which shall include, but need not be limited to, the defenses listed in subsection (j) of this section. (d) Any ordinance adopted under this section may: (1) Establish a fine to be imposed against the owner of a motor vehicle committing a violation of such ordinance, provided the amount of such fine is not more than fifty dollars for a first violation and not more than seventy-five dollars for a second or subsequent violation, and (2) impose a reasonable fee, not to exceed fifteen dollars, for the costs associated with the electronic processing of the payment of any such fine. Any funds received by a municipality from fines imposed pursuant to an ordinance adopted under this section shall be used for the purposes of improving transportation mobility, investing in transportation infrastructure improvements or paying the costs associated with the use of automated traffic enforcement safety devices in the municipality. (e) Any municipality that adopts an ordinance under this section shall also adopt the following: (1) A citation hearing procedure pursuant to section 7-152c, (2) a comprehensive safety action plan to ensure that the streets located in the municipality safely and conveniently serve road users of all ages and abilities, including pedestrians, transit users, bicyclists, persons using wheelchairs or other assistive devices and motor vehicle operators, and (3) a written policy that meets or exceeds the standards of the model privacy policy and protocol developed pursuant to subsection (a) of section 14-307d. Such municipality shall also be in compliance with any order made by the Office of the State Traffic Administration pursuant to the provisions of this chapter or any regulation adopted pursuant to said chapter by the office regarding a traffic control sign or traffic control signal at a location equipped or proposed to be equipped with an automatic traffic enforcement safety device. (f) (1) Prior to the operation of an automated traffic enforcement safety device, the municipality shall (A) install at least two conspicuous signs at a reasonable distance in advance of such location, in accordance with the Federal Highway Administration's Manual on Uniform Traffic Control Devices for Streets and Highways, as amended from time to time, notifying motor vehicle operators of such location, and (B) provide notification of such location to persons, firms or corporations that operate a mobile application that is used for navigation purposes or to provide real-time information on motor vehicle traffic. The Department of Transportation shall designate which such persons, firms or corporations shall be notified and provide technical guidance to such municipalities regarding how to provide such notification. (2) At least thirty days before the date the first automated traffic enforcement safety device becomes operational in the municipality, the municipality shall develop and implement a public awareness campaign to educate the public concerning the importance of obeying speed limits and traffic control signals and the imminent use of automated traffic enforcement safety devices in the municipality at the locations identified in the plan approved by the Department of Transportation pursuant to section 14-307e. (g) An automated traffic enforcement safety device operator shall complete training offered by the manufacturer of such device or the manufacturer's representative regarding procedures for setting up, testing and operating such device. The manufacturer or manufacturer's representative shall issue a signed certificate to the automated traffic enforcement safety device operator upon such operator's completion of the training. Such signed certificate shall be admitted as evidence in any hearing conducted pursuant to section 7-152c. (h) The municipality shall ensure each automated traffic enforcement safety device used by such municipality undergoes an annual calibration check performed at a calibration laboratory. The calibration laboratory shall issue a signed certificate of calibration after the annual calibration check. Such signed certificate of calibration shall be kept on file and admitted as evidence in any hearing conducted pursuant to section 7-152c. (i) (1) Whenever an automated traffic enforcement safety device detects and produces recorded images of a motor vehicle allegedly committing a violation of an ordinance adopted under this section, a sworn member or employee of the municipality's police department or an employee of the municipality designated by the traffic authority shall review the recorded images provided by such device. If, after such review, such member or employee determines that there are reasonable grounds to believe that a violation of the ordinance has occurred, such member or employee may issue a citation to the owner of the motor vehicle. The citation shall include the following: (A) The name and address of the owner of the motor vehicle; (B) the number plate of the motor vehicle; (C) the violation charged; (D) the location of the automated traffic enforcement safety device and the date and time of the violation; (E) a copy of or information on how to view, through electronic means, the recorded images described in this section; (F) a statement or electronically generated affirmation by the member or employee who reviewed the recorded images and determined that the motor vehicle violated the ordinance; (G) verification that the automated traffic enforcement safety device was operating correctly at the time of the alleged violation and the date of the most recent calibration check performed pursuant to subsection (h) of this section; (H) the amount of the fine imposed and how to pay such fine; and (I) the right to contest the violation and request a hearing pursuant to section 7-152c. (2) In the case of an alleged violation involving a motor vehicle registered in the state, the citation shall be mailed not later than thirty days after the identity of the owner is ascertained to the address of the owner that is in the records of the Department of Motor Vehicles. In the case of an alleged violation involving a motor vehicle registered in another jurisdiction, the citation shall be mailed not later than thirty days after the identity of the owner is ascertained to the address of the owner that is in the records of the official in the other jurisdiction issuing such registration. A citation shall be invalid unless mailed to an owner not later than sixty days after the alleged violation. (3) The citation shall be sent by first class mail. A manual or automated record of mailing prepared by the municipality's police department shall be prima facie evidence of mailing and shall be admissible in any hearing conducted pursuant to section 7-152c as to the facts contained in the citation. (j) The following defenses shall be available to the owner of a motor vehicle who is alleged to have

committed a violation of such ordinance adopted under this section: (1) The operator was driving an emergency vehicle in accordance with the provisions of subdivision (1) of subsection (b) of section 14-283; (2) the traffic control signal was inoperative, which is observable on the recorded images; (3) the violation was necessary in order for the operator to comply with an order or direction from a law enforcement officer, which is observable on the recorded images; (4) the violation was necessary to allow the passage of an authorized emergency vehicle, which is observable on the recorded images; (5) the violation took place during a period of time in which the motor vehicle had been reported as being stolen to a law enforcement unit, as defined in section 7-294a, and had not been recovered prior to the time of the violation; or (6) the automated traffic enforcement safety device was not in compliance with the calibration check required pursuant to subsection (h) of this section. (a)(1) A municipality's plan concerning the use of automated traffic enforcement safety devices in the municipality shall identify the proposed locations of such devices and include documentation that such proposed locations comply with the guidelines developed pursuant to subsection (a) of section 14-307d. The municipality shall conduct a public hearing regarding any such plan prior to submission and, by vote of its legislative body or, in a municipality where the legislative body is a town meeting, by vote of the board of selectman, shall submit such plan to the Department of Transportation, in such form as the department may prescribe. (2) Not later than sixty days after the date a plan is received by the department, the department shall determine if the plan is likely to improve traffic safety at the proposed locations and the distribution of such devices throughout the municipality is equitable, and shall approve or disapprove the plan, in whole or in part. If the department disapproves any such plan, in whole or in part, the department shall provide a written explanation of the reason for such disapproval and guidance to revise such plan for resubmission. Any such disapproval shall not preclude the submission of a revised plan. (3) The approval of a municipality's initial plan shall be valid for a period of three years from the date the first automated traffic enforcement safety device becomes operational in the municipality and, thereafter, the approval of any subsequent plan shall be valid for a period of three years from the date of approval. (b) A municipality operating automated traffic enforcement safety devices pursuant to an approved plan that has not yet expired may submit to the Department of Transportation a modification to such plan to propose the use of such devices at additional locations, in the same manner as described in subdivision (1) of subsection (a) of this section. The department shall approve or disapprove any such modification, in whole or in part, in the same manner as described in subdivision (2) of subsection (a) of this section. The approval of any such modification shall expire on the date the approved plan expires. (c) (1) A municipality that seeks to continue to use automated traffic enforcement safety devices after such expiration shall submit a subsequent plan to the Department of Transportation for approval. Such subsequent plan may include some or all of the previously approved locations for such devices and propose new locations for such devices. The municipality shall conduct a public hearing regarding such subsequent plan prior to its submission to the department and, by vote of its legislative body or, in a municipality where the legislative body is a town meeting, by vote of the board of selectman, submit to the department such plan and supporting documentation in accordance with

the guidelines issued pursuant to subsection (b) of section 14-307d. Supporting documentation for any subsequent plan shall include, but need not be limited to: (A) Evidence that the devices used by the municipality at locations identified in a prior plan improved traffic safety, (B) a description of how any proposed new locations comply with the guidelines developed pursuant to subsection (a) of section 14-307d, and (C) records that the funds received by the municipality from fines imposed pursuant to an ordinance adopted under this section were expended in accordance with the provisions of subsection (d) of section 14-307c. (2) Not later than sixty days after the date a subsequent plan and supporting documentation is received by the department, the department shall determine: (A) If the subsequent plan is likely to improve traffic safety at the proposed locations, (B) if the subsequent plan includes a location previously equipped with an automated traffic enforcement safety device, whether the use of such device improved traffic safety at such location, and (C) if the distribution of such devices throughout the municipality is equitable, and shall approve or disapprove the plan, in whole or in part. The department shall not approve any part of a plan that includes a location previously equipped with an automated traffic enforcement safety device unless the department determines the use of such device improved traffic safety at such location. (d) In no event shall a municipality use, install or operate an automated traffic enforcement safety device unless such use, installation or operation complies with the provisions of a plan approved by the Department of Transportation and the approval of such plan is effective. (a) No person, firm, corporation, state agency or municipal agency, or any combination thereof, shall build, expand, establish or operate any open air theater, shopping center or other development generating large volumes of traffic that substantially affect state highway traffic within this state, as determined by the Office of the State Traffic Administration, until such person, firm, corporation or agency has procured from said office a certificate that the operation thereof will not imperil the safety of the public, except that any development, including any development to be built in phases, without regard to when such phases are approved by the municipal planning and zoning agency or other responsible municipal agency, that contains a total of one hundred or fewer residential units shall not be required to obtain such certificate if such development is a residential-only development and is not part of a mixed-use development that contains office, retail or other such nonresidential uses, provided if any future development increases the total number of residential units to more than one hundred, and such total substantially affects state highway traffic within the state as determined by the Office of the State Traffic Administration, a certificate shall be procured from said office. (b) Except as otherwise provided in this subsection or permitted by the Office of the State Traffic Administration, no local building official shall issue a building or foundation permit to any person, firm, corporation, state agency or municipal agency to build, expand, establish or operate such a development until the person, firm, corporation or agency provides to such official a copy of the certificate issued under this section by the office. If the office determines that any person, firm, corporation or agency has (1) started building, expanding, establishing or operating such a development without first obtaining a certificate from said office, or (2) has failed to comply with the conditions of such a certificate, it shall order the person, firm, corporation or agency to (A) cease constructing, expanding, establishing or operating the development, or (B) comply with the conditions of the certificate within a reasonable period of time. Notwithstanding the provisions of this subsection, for single family home building lots within a subdivision of land, for which a certificate is required and which do not have a direct exit or entrance on, or directly abut or adjoin any state highway, no local building official shall issue a certificate of occupancy to any person, firm, corporation, state agency or municipal agency to occupy homes on such lots until the person, firm, corporation or agency provides to such official a copy of the certificate issued under this section by the office and such official confirms that the certificate conditions have been satisfied. (c) The Office of the State Traffic Administration, to the extent practicable, shall begin its review of an application prior to final approval of the proposed activity by the municipal planning and zoning agency or other responsible municipal agency. (d) In determining the advisability of such certification, the Office of the State Traffic Administration shall include, in its consideration, highway safety, bicycle and pedestrian access and safety, the width and

character of the highways affected, the density of traffic thereon, the character of such traffic and the opinion and findings of the traffic authority of the municipality wherein the development is located. The office may require improvements to be made by the applicant to the extent that such improvements address impacts to state highway safety or bicycle and pedestrian access and safety created by the addition of the applicant's proposed development or activity. If the office determines that such improvements, including traffic signals, pavement markings, channelization, pavement widening or other changes or traffic control devices, are required to handle traffic safely and efficiently, one hundred per cent of the cost thereof shall be borne by the person, firm, corporation or agency building, establishing or operating such open air theater, shopping center or other development generating large volumes of traffic, except that such cost shall not be borne by any municipal agency. The Commissioner of Transportation may issue a permit to such person, firm, corporation or agency to construct or install the changes required by the office. (e) Any person, firm, corporation or agency building, establishing or operating such open air theater, shopping center or other development generating large volumes of traffic aggrieved by any decision of the Office of the State Traffic Administration under this section may appeal therefrom in accordance with the provisions of section 4-183, except venue for such appeal shall be in the judicial district in which it is proposed to operate such establishment. The provisions of this section, except insofar as such provisions relate to expansion, shall not apply to any open air theater, shopping center or other development generating large volumes of traffic in operation on July 1, 1967. (f) Before submitting an application for any development generating large volumes of traffic pursuant to subsection (a) of this section to the Office of the State Traffic Administration, the person, firm, corporation or agency submitting such application shall attend a mandatory meeting with the Office of the State Traffic Administration and other staff from the Department of Transportation. The Commissioner of Transportation may issue a permit to such person, firm, corporation or agency to construct or install the changes required by the Office of the State Traffic Administration, in consultation with the local traffic authority. Delivery through meter. Delivery and electronic delivery tickets. Disclosure of purchaser's cost associated with retail fuel oil or propane gas. Exemptions. Penalties.

(a)(1) The standard gallon shall be the unit of measurement for all sales of gasoline, kerosene, fuel oils or similar substances sold or offered for sale for the purpose of creating power or heat. Each delivery of gasoline in a quantity of fifty gallons or more and each delivery of kerosene, fuel oil or similar substance in a quantity of five gallons or more shall be the complete contents of a vehicle tank or it shall be through a meter. Each such tank or meter shall be sealed by a sealer of weights and measures before being used. The term "vehicle tank", as used in this section, means a container, which may or may not be subdivided into two or more compartments, mounted upon a wagon or motor truck and used for the delivery of such fluids. The term "compartment" means the entire tank whenever the tank is not subdivided; otherwise it means any one of those subdivided portions of the tank which are designed to hold such fluids. Each delivery through a meter shall be delivered through a meter equipped with a numeral reset counter, a register with a zero start or an accumulative ticket printer, which meters shall print an accurate record of all deliveries in gallons and tenths. Such ticket printer shall print the gallonage reading of the meter before and after delivery is made and each ticket shall be locked in the meter between readings to prevent fraud. Except as provided in subdivision (2) of this subsection, each delivery shall be accompanied by a delivery ticket and a duplicate thereof, on which shall be distinctly expressed in ink or other indelible substance, in gallons, or gallons and tenths when so required, the quantity of such fluid so delivered, with the name of the seller and the name of the purchaser of such fluid. (2) A seller may provide an electronic version of a delivery ticket instead of a delivery ticket expressed in ink or other indelible substance, if the seller or agent of such seller and the purchaser of a fluid, described in subdivision (1) of this subsection, agree to such electronic delivery, in writing. The seller shall retain a record of each electronic delivery ticket for not less than twelve months. (3) One of such delivery or electronic delivery tickets shall be surrendered, upon demand, to the sealer of weights and measures, for inspection, and such ticket or, when the sealer desires to retain the original ticket or electronic ticket, a measure slip issued by the seller or his or her agent, shall be delivered to the purchaser or purchaser's agent or representative at the time of the delivery of such fluid. If the purchaser or purchaser's agent takes such fluid from the place of purchase, a delivery ticket showing the actual number of gallons, or gallons and tenths, delivered shall be given to the purchaser or purchaser's agent at the time of delivery. In the case of an electronic delivery ticket, the seller or agent of such seller shall transmit the electronic delivery ticket to the purchaser or purchaser's agent not more than two business days after such delivery. Delivery tickets shall bear the name or identification number of the seller's driver and shall be sequentially numbered. Copies of delivery tickets shall be retained by the seller for one year and shall be available for inspection during normal business hours. No seller, or agent of such seller, shall possess a delivery ticket which has been printed with, or an electronic delivery ticket which contains, a record of a delivery which has not occurred. The method of determining the number of gallons of any such fluid delivered shall be by measuring the same in measures that have been tested and sealed by a sealer of weights and measures. (b) No person, firm or corporation shall sell at retail fuel oil or propane gas to be used for residential heating unless all of the purchaser's costs associated with such fuel oil or propane gas, including, but not limited to, unit price and any delivery surcharge, are disclosed to the purchaser, in writing, at the time the purchaser enters into a purchase contract with the seller or at the time of renewal of such contract. Such disclosures shall be made by the seller when the purchaser places an order for such fuel oil or propane gas if there is no contract between the seller and purchaser. (c) The provisions of this section shall not apply to barge, railroad tank car, drum or slow flow meter delivery. (d) The provisions of this section requiring meters to print tenths of a gallon shall not apply to bulk plant deliveries to a reseller, or bulk delivery of gasoline to service stations for resale. On other high-speed, large volume deliveries, the Commissioner of Consumer Protection may waive the one-tenth gallon requirement, upon request. On all of these deliveries the meters shall print an accurate record in gallons. (e) Any person who, by himself or by his agent or employee, or as the employee or agent of another, violates any provision of this section shall be subject to the penalties provided in chapter 750, concerning weights and measures, or chapter 296, concerning operation of fuel supply businesses, as applicable. 2024 Connecticut General Statutes Title 14 - Motor Vehicles. Use of the Highway by Vehicles. Gasoline Chapter 253 - Bus Taxation Proration and Reciprocity Agreement Section 14-365. - Agreement.

The Bus Taxation Proration Agreement is hereby enacted into law and entered into with all jurisdictions legally joining therein in the form substantially as follows: BUS TAXATION PRORATION AND RECIPROCITY AGREEMENT Article I. Purposes and Principles SECTION 1. Purposes of Agreement. It is the purpose of this agreement to set up a system whereby any contracting state may permit owners of fleets of buses operating in two or more states to prorate the registration of the buses in such fleets in each state in which the fleets operate on the basis of the proportion of miles operated within such state to total fleet miles, as defined herein. SECTION 2. Principle of Proration of Registration. It is hereby declared that in making this agreement the contracting states adhere to the principle that each state should have the freedom to develop the kind of highway user tax structure that it determines to be most appropriate to itself; that the method of taxation of interstate buses should not be a determining factor in developing its user tax structure; and that annual taxes or other taxes of the fixed fee type upon buses, which are not imposed on a basis that reflects the amount of highway use, should be apportioned among the states, within the limits of practicality, on the basis of vehicle miles traveled within each of the states. Article II. Definitions (a) State. State shall include the states of the United States, the District of Columbia, the territories of the United States, the provinces of Canada, and the states, territories and Federal District of Mexico. (b) Contracting State. Contracting state shall mean a state which is a party to this agreement. (c) Administrator. Administrator shall mean the official or agency of a state administering the fee involved, or, in the case of proration of registration, the official or agency of a state administering the proration of registration in that state. (d) Person. Person shall include any individual, firm, copartnership, joint venture, association, corporation, estate, trust, business trust, receiver, syndicate, or any other group or combination acting as a unit. (e) Base State. Base state shall mean the state from or in which the bus is most frequently dispatched, garaged, serviced, maintained, operated, or otherwise controlled, or also in the case of a fleet bus the state to which it is allocated for registration under statutory requirements. In order that this section may not be used for the purpose of evasion of registration fees, the administrators of the contracting states may make the final decision as to the proper base state, in accordance with Article III (h) hereof, to prevent or avoid such evasion. (f) Bus. Bus shall mean any motor vehicle of a bus type engaged in the interstate transportation of passengers and subject to the jurisdiction of the Interstate Commerce Commission, or any agency successor thereto, or one or more state regulatory agencies concerned with the regulation of passenger transport. (g) Fleet. As to each contracting state, fleet shall include only those buses which actually travel a portion of their total miles in such state. A fleet must include three (3) or more buses. (h) Registration. Registration shall mean the registration of a bus and the payment of annual fees and taxes as set forth in or pursuant to the laws of the respective contracting states. (i) Proration of Registration. Proration of registration shall mean registration of fleets of buses in accordance with Article IV of this agreement. (j) Reciprocity. Reciprocity shall mean that each contracting state, to the extent provided in this agreement, exempts a bus from registration and registration fees. Article III. General Provisions (a) Effect on Other Agreements, Arrangements, and Understandings. On and after its effective date, this agreement shall supersede any reciprocal or other agreement, arrangement, or understanding between any two or more of the contracting states covering, in whole or in part, any of the matters covered by this agreement; but this agreement shall not affect any reciprocal or other agreement, arrangement, or understanding between a contracting state and a state or states not a party to this agreement. (b) Applicability to Exempt Vehicles. This agreement shall not require registration in a contracting state of any vehicles which are in whole or part exempt from registration under the laws or regulations of such state without respect to this agreement. (c) Inapplicability to Caravanned Vehicle. The benefits and privileges of this agreement shall not be extended to a vehicle operated on its own wheels, or in tow of a motor vehicle, transported for the purpose of selling or offering the same for sale to or by any agent, dealer, purchaser, or prospective purchaser. (d) Other Fees and Taxes. This agreement does not waive any fees or taxes charged or levied by any state in connection with the ownership or operation of vehicles other than registration fees as defined herein. All other fees and taxes shall be paid to each state in accordance with the laws thereof. (e) Statutory Vehicle Regulations. This agreement shall not authorize the operation of a vehicle in any contracting state contrary to the laws or regulations thereof, except those pertaining to registration and payment of fees; and with respect to such laws or regulations, only to the extent provided in this agreement. (f) Violations. Each contracting state reserves the right to withdraw, by order of the administrator thereof, all or any part of the benefits or fleet of vehicles operated in violation of any provision of this agreement. The administrator shall immediately give notice of any such violation and withdrawal of any such benefits or privileges to the administrator of each other contracting state in which vehicles of such owner are operated. (g) Cooperation. The administrator of each of the contracting states shall cooperate with the administrators of the others and each contracting state hereby agrees to furnish such aid and assistance to each other within its statutory authority as will aid in the proper enforcement of this agreement. (h) Interpretation. In any dispute between or among contracting states arising under this agreement, the final decision regarding interpretation of questions at issue relating to this agreement shall be reached by joint action of the contracting states, acting through the administrator thereof, and shall upon determination be placed in writing. (i) Effect of Headings. Article and section headings contained herein shall not be deemed to govern, limit, modify, or in any manner affect the scope, meaning, or intent of the provisions of any article or part hereof. (j) Entry into Force. This agreement shall enter into force and become binding between and among the contracting states when enacted or otherwise entered into by any two states. Thereafter, it shall enter into force and become binding with respect to any state when enacted into law by such state. If the statutes of any state so authorize or provide, such state may become party to this agreement upon the execution thereof by an executive or administrative official thereof acting on behalf of and for such state. Article IV. Proration of Registration (a) Applicability. Any owner of a fleet may register the buses of said fleet in any contracting state by paying to said state total registration fees in an amount equal to that obtained by applying the proportion of in-state fleet miles divided by the total fleet miles, to the total fees which would otherwise be required for regular registration of each and all of such vehicles in such contracting state. All fleet pro-rata registration fees shall be based upon the mileage proportions of the fleet during

the period of twelve months ending on August 31 next preceding the commencement of the registration year for which registration is sought: Except, that mileage proportions for a fleet not operated during such period in the state where application for registration is made will be determined by the administrator upon the sworn application of the applicant showing the operations during such period in other states and the estimated operations during the registration year for which registration is sought, in the state in which application is being made; or if no operations were conducted during such period a full statement of the proposed method of operation. If any buses operate in two or more states which permit the proration of registration on the basis of a fleet of buses consisting of a lesser number of vehicles than provided in Article II (g), such fleet may be prorated as to registration in such states, in which event the buses in such fleet shall not be required to register in any other contracting states if each such vehicle is registered in some contracting state, except to the extent it is exempt from registration as provided in Article III (b). If the administrator of any state determines, based on his method of the operation thereof, that the inclusion of a bus or buses as a part of a fleet would adversely affect the proper fleet fee which should be paid to his state, having due regard for fairness and equity, he may refuse to permit any or all of such buses to be included in his state as a part of such fleet. (b) Total Fleet Miles. Total fleet miles, with respect to each contracting state, shall mean the total miles operated by the fleet (1) in such state, (2) in all other contracting states, (3) in other states having proportional registration provisions, (4) in states with which such contracting state has reciprocity, and (5) in such other states as the administrator determines should be included under the circumstances in order to protect or promote the interest of his state; except that in states having laws requiring proration on the basis of a different determination of total fleet miles, total fleet miles shall be determined on such basis. (c) Leased Vehicles. If a bus is operated by a person other than the owner as a part of a fleet which is subject to the provisions of this article, then the operator of such fleet shall be deemed to be the owner of said bus for the purposes of this article. (d) Extent of Privileges. Upon the registration of a fleet in a contracting state pursuant to this article, each bus in the fleet may be operated in both interstate and intrastate operations in such state, except as provided in Article III (e). (e) Application for Proration. The application for proration of registration shall be made in each contracting state upon substantially the application forms and supplements authorized by joint action of the administrators of the contracting states. (f) Issuance of Identification. Upon registration of a fleet, the state which is the base state of a particular bus of the fleet shall issue the required license plates and registration card for such bus and each contracting state in which the fleet of which such bus is a part, operates shall issue a special identification identifying such bus as a part of a fleet which has fully complied with the registration requirements of such state. The required license plates, registration cards and identification shall be appropriately displayed in the manner required by or pursuant to the laws of each respective state. (g) Additions to Fleet. If any bus is added to a prorated fleet after the filing of the original application, the owner shall file a supplemental application. The owner shall register such bus in each contracting state in like manner as provided for buses listed in an original application and the registration fee payable shall be determined on the mileage proportion used to determine the registration fees payable for buses registered under the original application. (h) Withdrawals from Fleet. If any bus is withdrawn from a prorated fleet during the period for which it is registered or identified, the owner shall notify the administrator of each state in which it is registered or identified of such withdrawal and shall return the plates, and registration card or identification as may be required by or pursuant to the laws of the respective states. (i) Audits. The administrator of each contracting state shall, within the statutory authority of such administrator, make any information obtained upon an audit of records of any applicant for proration of registration available to the administrators of the other contracting states. (j) Errors in Registration. If it is determined by the administrator of a contracting state, as a result of such audits or otherwise, that an improper fee has been paid his state, or errors in registration found, the administrator may require the fleet owner to make the necessary corrections in the registration of his fleet and payment of fees. Article V. Reciprocity (a) Grant of Reciprocity. Each of the contracting states grants reciprocity as provided in this article. (b) Applicability. The provisions of this agreement with respect to reciprocity shall apply only to a bus properly registered in the base state of the bus, which state must be a contracting state. (c) Nonapplicability to Fleet Buses. The reciprocity granted pursuant to this article shall not apply to a bus which is entitled to be registered or identified as part of a prorated fleet. (d) Extent of Reciprocity. The reciprocity granted pursuant to this article shall permit the interstate operation of a bus and intrastate operation which is incidental to a trip of such bus involving interstate operation. (e) Other agreements. Nothing in this agreement shall be construed to prohibit any of the contracting states from entering into separate agreements with each other for the granting of temporary permits for the intrastate operation of vehicles registered in the other state; nor to prevent any of the contracting states from entering into agreements to grant reciprocity for intrastate operation within any zone or zones agreed upon by the states. Article VI. Withdrawal or Revocation Any contracting state may withdraw from this agreement upon thirty days written notice to each other contracting state, which notice shall be given only after the repeal of this agreement by the legislature of such state, if adoption was by legislative act, or after renunciation by the appropriate administrative official of such contracting state if the laws thereof empower him so to renounce. Article VII. Construction and Severability This Compact shall be liberally construed so as to effectuate the purposes thereof. The provisions of this Compact shall be severable and if any phrase, clause, sentence or provision of this Compact is declared to be contrary to the constitution of any state or of the United States or the applicability thereof to any government, agency, person or circumstance is held invalid, the validity of the remainder of this Compact and the applicability thereof to any government, agency, person or circumstance shall not be affected thereby. If this Compact shall be held contrary to the constitution of any state participating herein, the Compact shall remain in full force and effect as to the remaining party states and in full force and effect as to the state affected as to all severable matters. Prior to 1957 amendment, statute governed by a 3-year statute of limitations. 142 C. 452. It is not necessary to prove a causal connection between the sale of the intoxicating liquor and the injury; the delict defined is not the sale of liquor to create the condition of intoxication but sale to one already intoxicated. 143 C. 53. The word "sell" is used in the sense of purvey or furnish; the dispensing of food in a restaurant for consumption on the premises does not constitute a sale but rather a service; a permit to sell liquor is a matter of privilege and not of right; by engaging in the liquor business, the permittee assumes the risk of a variety of situations which could impose liability on him; it is not an unconstitutional exercise of the police power for a permittee who sells in violation of the law to be prevented from defending on the ground that the particular drink which he sold did not cause or contribute to the buyer's intoxication; the furnishing of intoxicants for a price to a group of 2 or more in one company may be considered a sale to each member of that group. 144 C. 241. 1959 act limiting recovery to \$25,000 held substantive in nature and not applicable to pending action. 149 C. 402. Requirement of written notice to seller does not require plaintiff to give a "signed" written notice. *Id.*, 405. Dram Shop Act modifies common law rule that the proximate cause of intoxication is consumption of liquor, not furnishing of it, and is restricted to its terms; history of section. 154 C. 432. There is no common law right of action in negligence against one who furnishes intoxicating liquor to another who becomes intoxicated and causes injury; however, an individual may be liable for the injurious consequences of wanton and reckless conduct in furnishing alcoholic beverages to another. 181 C. 355. Cited. 187 C. 147. To recover under statute, an essential element is proof that patron was intoxicated; to be intoxicated is something more than to be merely under the influence of, or affected to some extent by, liquor; it means an abnormal or physical condition due to the influence of intoxicating liquors, a visible excitation of the passions and impairment of the judgment, or a derangement or impairment of physical functions and energies. 196 C. 341. Dram Shop Act does not occupy the field so as to preclude a common-law action in negligence against purveyor of alcoholic beverages for service of alcoholic liquor to an adult patron who, as a result of intoxication, injures another. 262 C. 312. Intoxication under section requires both an internal effect and an external manifestation; plaintiff not entitled to judgment in his favor without proving that patron was visibly or otherwise perceptibly intoxicated when sold alcoholic liquor. 307 C. 231. Bar and restaurant owners may be liable for harm caused by employees consuming liquor on the job. 82 CA 186. To prove intoxication pursuant to section, plaintiff must present evidence showing visible or perceptible intoxication. 128 CA 794; judgment affirmed in part, see 307 C. 231. Award of interest pursuant to Sec. 52-192a for an unaccepted offer of compromise, in addition to judgment award of \$250,000 as limited by this section, did not undermine the legislative purpose of limiting recoverable damages under Dram Shop Act. 136 CA 805. Under former section, 1-year limitation period under statute enumerating classes of torts did not apply. 18 CS 224. Corporation is liable as seller; history of section reviewed. *Id.*, 271. (a) For the purposes of this section, the "filing date" of an application means the date upon which the department, after approving the application for processing, mails or otherwise delivers to the applicant a placard containing such date. (b) (1) Any person desiring a liquor permit or a renewal of such a permit shall make an affirmed application therefor to the Department of Consumer Protection, upon forms to be furnished by the department, showing the name and address of the applicant and of the applicant's backer, if any, the location of the club or place of business which is to be operated under such permit and a financial statement setting forth all elements and details of any business transactions connected with the application. Such application shall include a detailed description of the type of live entertainment that is to be provided. A club or place of business shall be exempt from providing such detailed description if the club or place of business (A) was issued a liquor permit prior to October 1, 1993, and (B) has not altered the type of entertainment provided. The application shall also indicate any crimes of which the applicant or the applicant's backer may have been convicted. Applicants shall submit documents, only upon initial application, sufficient to establish that state and local building, fire and zoning requirements and local ordinances concerning hours and days of sale will be met, except that local building and zoning requirements and local ordinances concerning hours and days of sale shall not apply to a cafe permit issued under subsection (d) or (h) of section 30-22a. The State Fire Marshal or the marshal's certified designee shall be responsible for approving compliance with the State Fire Code at Bradley International Airport. Any person desiring a permit provided for in section 30-33b shall file a copy of such person's license with such application if such license was issued by the Department of Consumer Protection. The department may, at its discretion, conduct an investigation to determine whether a permit shall be issued to an applicant. (2) The applicant shall pay to the department a nonrefundable application fee, which fee shall be in addition to the fees prescribed in this chapter for the permit sought. An application fee shall not be charged for an application to renew a permit. Notice of any such change shall be given to the department and the permit shall be endorsed to show correct ownership. When any partnership changes by reason of the addition of one or more persons, a new application with new fees shall be required. The remonstrants shall designate one or more agents for service, who shall serve as the recipient or recipients of all notices issued by the department. At any time prior to the issuance of a decision by the department, a remonstrance may be withdrawn by the remonstrants or by such agent or agents acting on behalf of such remonstrants and the department may cancel the hearing or withdraw the case. The decision of the department on such application shall be final with respect to the remonstrance. The provisions of this subsection shall not apply to festival permits issued under section 30-37t. (e) The department may renew a permit that has expired if the applicant pays to the department a nonrefundable late fee pursuant to subsection (c) of section 21a-4, which fee shall be in addition to the fees prescribed in this chapter for the permit applied for. The notice of delinquency shall identify the delinquent retailer, and state the amount due and the date of the expiration of the thirty-day credit period. A notice of delinquency identifying a retailer who does not file a response within such ten-day period shall have the same effect as a notice of delinquency given by order of the chairman or such chairman's designee. Any such permit so transferred may be renewed by such transferee under the provisions of section 30-14a. Except as provided in subdivision (1) of this subsection, a person shall be deemed to acquire an interest in a retail permit if an interest is owned by such person, such person's spouse, children, partners, or an estate, trust, or corporation controlled by such person or such person's spouse, children, or any combination thereof. The provisions of this subsection shall apply to any such interest without regard to whether such interest is a controlling interest. Declaratory judgment determining statute to be unconstitutional on ground that its purpose was to benefit one segment of permit holders while restricting another segment overruled since all persons having an interest in the subject matter were not made parties or given reasonable notice thereof. (a) Every permit for the sale of alcoholic liquor shall specify the town and the particular building or place in such town in which such liquor is to be sold, and shall not authorize any sale in any other place or building. Such permit shall also be made revocable in terms for any violation of any of the provisions of this chapter. (c) For alcoholic liquor other than beer, each manufacturer, wholesaler and out-of-state shipper permittee shall post with the department, on a monthly basis, the bottle, can and case price of any brand of goods offered for sale in Connecticut, which price when so posted shall be the controlling price for such manufacturer, wholesaler or out-of-state permittee for the month following such posting. For purposes of this subsection, “family brand” means a group of different products belonging to a single brand that are marketed under a parent brand. Family brand cases shall be assembled and packaged by the supplier or by a third party, on behalf of the supplier, and shall not be assembled by the wholesaler. If any person disobeys such process or, having appeared in obedience thereto, refuses to answer any pertinent question put to him by the department or its authorized agent or to produce any records and papers pursuant thereto, the department or its agent may apply to the superior court for the judicial district of Hartford or for the judicial district wherein the person resides or wherein the business has been conducted, setting forth such disobedience to process or refusal to answer, and the court shall cite such person to appear before the court to answer such question or to produce such records and papers and, upon his refusal so to do, shall commit such person to a community correctional center until he testifies, but not for a longer period than sixty days. Notwithstanding the serving of the term of such commitment by any person, the department may proceed with such inquiry and examination as if the witness had not previously been called upon to testify. Officers who serve subpoenas issued by the department or under its authority and witnesses attending hearings conducted by it under this section shall receive like fees and compensation as officers and witnesses in the courts of this state to be paid on vouchers of the department on order of the Comptroller. (b) (1) Any permittee or any servant or agent of a permittee who sells or delivers alcoholic liquor to any minor or any intoxicated person, or to any habitual drunkard, knowing the person to be such a habitual drunkard, shall be subject to the penalties of section 30-113. (2) Any person who sells, ships, delivers or gives alcoholic liquor to a minor, by any means, including, but not limited to, the Internet or any other on-line computer three thousand five hundred dollars or imprisoned not more than eighteen months, or both. (3) The provisions of this subsection shall not apply (A) to a sale, shipment or delivery made to a person over age eighteen who is an employee or permit holder under section 30-90a and where such sale, shipment or delivery is made in the course of such person's employment or business, (B) to a sale, shipment or delivery made in good faith to a minor who practices any deceit in the procurement of an identity card issued in accordance with the provisions of section 1-1h, who uses or exhibits any such identity card belonging to any other person or who uses or exhibits any such identity card that has been altered or tampered with in any way, or (C) to a shipment or delivery made to a minor by a parent, guardian or spouse of the minor, provided such parent, guardian or spouse has attained the age of twenty-one and provided such minor possesses such alcoholic liquor while accompanied by such parent, guardian or spouse. (4) Nothing in this subsection shall be construed to burden a person's exercise of religion under section 3 of article first of the Constitution of the state in violation of subsection (a) of section 52-571b. (c) (1) A permittee or permittee's agent or employee may perform a transaction scan to check the validity of a driver's license or identity card presented by a cardholder as a condition for selling, giving away or otherwise distributing alcoholic

liquor to the cardholder. (2) If the information deciphered by the transaction scan performed under subdivision (1) of this subsection fails to match the information printed on the driver's license or identity card presented by the cardholder, or if the transaction scan indicates that the information so printed is false or fraudulent, neither the permittee nor any permittee's agent or employee shall sell, give away or otherwise distribute any alcoholic liquor to the cardholder. (3) Subdivision (1) of this subsection does not preclude a permittee or permittee's agent or employee from using a transaction scan device to check the validity of a document presented as identification other than a driver's license or an identity card, if the document includes a bar code or magnetic strip that may be scanned by the device, as a condition for selling, giving away or otherwise distributing alcoholic liquor to the person presenting the document. (d) (1) No permittee or permittee's agent or employee shall electronically or mechanically record or maintain any information derived from a transaction scan, except the following: (A) The name and date of birth of the person listed on the driver's license or identity card presented by a cardholder; and (B) the expiration date and identification number of the driver's license or identity card presented by a cardholder. (3) No permittee or permittee's agent or employee shall sell or otherwise disseminate the information derived from a transaction scan to any third party for any purpose, including, but not limited to, any marketing, advertising or promotional activities, except that a permittee or permittee's agent or employee may release that information pursuant to a court order. (4) Nothing in subsection (c) of this section or this subsection relieves a permittee or permittee's agent or employee of any responsibility to comply with any other applicable state or federal laws or rules governing the sale, giving away or other distribution of alcoholic liquor. (5) Any person who violates this subsection shall be subject to any penalty set forth in section 30-55. (e) (1) In any prosecution of a permittee or permittee's agent or employee for selling alcoholic liquor to a minor in violation of subsection (b) of this section, it shall be an affirmative defense that all of the following occurred: (A) A cardholder attempting to purchase or receive alcoholic liquor presented a driver's license or an identity card; (B) a transaction scan of the driver's license or identity card that the cardholder presented indicated that the license or card was valid; and (C) the alcoholic liquor was sold, given away or otherwise distributed to the cardholder in reasonable reliance upon the identification presented and the completed transaction scan. (2) In determining whether a permittee or permittee's agent or employee has proven the affirmative defense provided by subdivision (1) of this subsection, the trier of fact in such prosecution shall consider that reasonable reliance upon the identification presented and the completed transaction scan may require a permittee or permittee's agent or employee to exercise reasonable diligence and that the use of a transaction scan device does not excuse a permittee or permittee's agent or employee from exercising such reasonable diligence to determine the following: (A) Whether a person to whom the permittee or permittee's agent or employee sells, gives away or otherwise distributes alcoholic liquor is twenty-one years of age or older; and (B) whether the description and picture appearing on the driver's license or identity card presented by a cardholder are those of the cardholder.
