- (2) Upon completion of the conversion of overhead electric or communication service facilities on privately owned lots and parcels within a district, the utility shall file with the public authority a verified statement of the costs of the conversion of such service facilities of each landowner in the district. **2023 Oregon Revised Statutes Volume : 19 - Utilities, Vehicle Code, Watercraft, Aviation Chapter 758 - Utility Rights of Way and Territory Allocation; Cogeneration Section 758.282 - Immunity of electric utility for pruning or removing vegetation in certain cases.**

(1) An electric utility is immune from any civil liability for pruning or removing vegetation that is growing on property on which electric facilities are located, or growing on property that is adjacent to property on which electric facilities are located, if the pruning or removal is consistent with policies of the Public Utility Commission relating to the pruning or removal of vegetation, or is consistent with a local ordinance or resolution applicable to the property that relates to the pruning or removal of vegetation, and:

- (a) The vegetation has come in contact with or caused damage to electric facilities; or
- (b) Pruning or removing the vegetation is necessary to protect life or property or to restore electric service.

(2) ORS 105.810 and 105.815 do not apply to any claim against an electric utility based on the pruning or removal of vegetation growing on property on which electric facilities are located, or growing on property that is adjacent to property on which electric facilities are located. (1) An electric utility is immune from any civil liability for pruning or removing vegetation that is growing on property on which electric facilities are located, or growing on property that is adjacent to property on which electric facilities are located, if the pruning or removal is consistent with policies of the Public Utility Commission relating to the pruning or removal of vegetation, or is consistent with a local ordinance or resolution applicable to the property that relates to the pruning or removal of vegetation, and any of the following apply:

(a) The vegetation to be pruned or removed is hanging over electric facilities or growing in such close proximity to overhead electric facilities that the vegetation constitutes an electrical hazard under any electrical safety code adopted by the Public Utility Commission or constitutes a danger under state or federal health and safety codes to a person working on the facilities or with access to the facilities.

(b) The vegetation to be removed is diseased, dead or dying or is close enough to electric facilities that pruning or removal of the vegetation is necessary to avoid contact between the vegetation and electric facilities. A determination under this paragraph must be made by a qualified forester or arborist if a local ordinance or resolution requires that such determinations be made by a qualified forester or arborist.

(c) The vegetation is of such size, condition and proximity to electric facilities that the vegetation can reasonably be expected to cause damage to electric facilities in the future. A determination under this paragraph must be made by a qualified forester or arborist if a local ordinance or resolution requires that such determinations be made by a qualified forester or arborist.

(2) The limitation on liability provided by this section does not apply unless the electric utility has provided notice to owners of the property where the vegetation is located. Notice may be provided by posting a flyer in a conspicuous location on the property where the vegetation is located. The flyer must:

- (a) Indicate that the electric utility intends to prune or remove vegetation on the property;
- (b) Include a brief statement of the nature of the work to be performed and the reason the work is needed;
- (c) Include an estimate of the time period during which the work will occur; and

(d) Provide information on how the electric utility can be contacted.

(3) The limitation on liability provided by this section does not apply unless the pruning or removal complies with rules adopted by the Public Utility Commission relating to pruning or removal. In adopting rules, the commission shall give consideration to the American National Standard for Tree Care Operations adopted by the American National Standards Institute. [2001 c.420 §3]

**2023 Oregon Revised Statutes Volume : 19 - Utilities, Vehicle Code, Watercraft, Aviation Chapter 758 - Utility Rights of Way and Territory Allocation; Cogeneration Section 758.302 - Application for exclusive service territory; hearing on application; notice.**

(1) A water utility may apply to the Public Utility Commission for an order designating an area as an exclusive service territory for the water utility. The commission may designate as an exclusive service territory any area that on the date of application is being served in an adequate manner by the applicant and is not being served by any other water provider.

(2) In addition to the area described in subsection (1) of this section, a private water utility may apply for inclusion in an exclusive service territory designated for the private water utility any area adjacent to the area described in subsection (1) of this section if:

(a) The applicant plans to extend service to the adjacent area in the six months immediately following the date of the application;

(b) The adjacent area is not being served by any other water provider; and

(c) The applicant demonstrates that it is more economical and feasible to provide services to the adjacent area by an extension of the applicant's existing facilities than by an extension of the facilities of another water provider or community water supply system.

(3) An application under this section must be made on forms provided by the commission, contain all information required by commission rule and include a copy of the notice of the filing to be given to all customers of record. The applicant shall, within 30 days after filing an application under this section, give notice of the filing in the manner provided by subsection (5) of this section.

(4) Within 30 days after the filing of an application under this section, the commission shall give notice of the filing to all other water providers in the areas adjacent to the area described in the application.

(5)(a) A notice given pursuant to this subsection shall be given:

(A) By mail or electronic mail to all customers of record of the water utility in the area described in the application;

(B) By press release to news media local to the area described in the application; and

(C) By publication in one or more newspapers of general circulation in the area described in the application at least once weekly for two successive weeks.

(b) The notice must describe the area of the proposed exclusive service territory and the general rate impact to existing customers.

(6) If the commission, on its own motion, chooses, or if any customer or customers of the water utility request a hearing on the application within 30 days of the date notice is given under subsection (3) of this section, the commission shall hold a hearing. The commission shall give notice of the time and place of the hearing in the manner provided by subsection (5) of this section. If the hearing is held by reason of a customer's request, the commission shall give notice of the hearing within 30 days after the request is received by the commission. The hearing shall be held at a place within or conveniently accessible to the area described in the application.

(7) The commission may make such investigations relating to an application under this section as the commission deems proper, including physical examination and evaluation of the facilities and systems of the applicant, estimates of their operating costs and revenues, and studies of such other information as the commission deems relevant.

(8) The commission shall enter an order granting or denying an application for an exclusive service territory under this section. The order must contain findings of fact supporting the order. The commission may grant an application subject to such conditions and limitations as the commission deems appropriate.

(9) ORS 756.500 to 756.610 govern the conduct of hearings under this section and any appeal of the commission's order.

(10) If the commission considers competing applications under subsection (2) of this section to extend exclusive service to the same area, there is a disputable presumption that applicants have an equal ability to extend, improve, enlarge, build, operate and maintain existing or proposed facilities. **2023 Oregon Revised Statutes Volume : 19 - Utilities, Vehicle Code, Watercraft, Aviation Chapter 758 - Utility Rights of Way and Territory Allocation; Cogeneration Section 758.305 - Exclusive service territories.**

(1) Designated service territories of a water utility approved by the Public Utility Commission shall be exclusive. A water utility or community water supply system shall not provide water utility service within the designated exclusive service territory of another water utility without the express approval of the commission.

(2) A water utility shall serve only customers within its designated exclusive service territory and shall serve all applicants for service within its designated territory. The water utility may refuse service only as provided by commission rule.

(3) Upon petition by the water utility for an order, or by the commission on its own motion, a designated service territory may be expanded to include unserved areas. In reviewing a petition, the commission shall consider at least the current ability of the water utility to serve the expanded area, the demand for service in the expanded area, the impact on existing customers and the availability of alternative service. The commission may take other factors into consideration as prescribed by commission rule. Notice and hearing of the proposed expansion shall be given as provided in ORS 758.302.

(4) Upon petition by the water utility or a customer of the utility for an order, or by the commission on its own motion, a designated exclusive service territory may be decreased upon a showing that the water utility is not providing adequate service to its customers or does not have the capacity to serve the designated area. Notice of the proposed decrease of service territory shall be given as provided in ORS 758.302. [1999 c.695 §6]

(1) The rights acquired by the designation of an exclusive service territory may be assigned or transferred only with the approval of the Public Utility Commission after a finding that the assignment or transfer is in the public interest. However, a hearing is not required if at least 75 percent of the affected customers agree to the proposed assignment or transfer.

(2) An order designating an exclusive service territory shall not be construed to confer any property right. However, upon the death of an applicant under an approved designation, the executor or administrator shall continue operating the water utility for the purpose of transferring such rights for a period not to exceed two years from the date of death.

(3) The territory served by a water utility under an order of the commission designating exclusive service territory shall not be altered solely as the result of a change in ownership or form of ownership. [1999 c.695 §5]

In the event a designated exclusive service territory is served by a person not authorized by the Public Utility Commission, the commission or the water utility designated by the commission to serve the area may file an action for injunctive relief in the circuit court for any county where some or all of the designated service territory is located. The action shall proceed as in an action not triable by right to a jury. Any party to the action may appeal to the Court of Appeals from the trial court's order. (1) The provisions of ORS 758.300 to 758.320 shall not be construed to restrict the powers granted to cities to issue franchises or to restrict the powers of condemnation of a municipality.

(2) The provisions of ORS 758.300 to 758.320 shall not be construed to restrict the formation of homeowners associations pursuant to ORS chapter 94, cooperatives pursuant to ORS chapter 62 or districts pursuant to ORS chapter 198 within the designated exclusive service territory of a water utility. A homeowners association, cooperative or district may petition the Public Utility Commission for an order excluding the association, cooperative or district from the exclusive service territory of a water utility. Upon a showing by the association, cooperative or district that exclusion is not detrimental to the public interest, the commission may issue an order excluding the association, cooperative or district from the exclusive service territory of a water utility.

(3) The commission shall recognize the service territories of a water utility that has an existing franchise on October 23, 1999, with a municipality as exclusive service territories. Upon application as provided in ORS 758.302, any such water utility may request an order from the commission to designate exclusive service territories in addition to those identified in the franchise agreement if the water utility is providing adequate and exclusive service to areas outside the areas identified in the franchise agreement.

(4) A district, as defined in ORS 198.010, that provides water utility service shall be exempt from the requirements of ORS 758.302. (2) Any such contracting parties may also contract in writing for the sale, exchange, transfer, or lease of equipment or facilities located within territory which is the subject of the allocation agreed upon pursuant to subsection (1) of this section. - (2) It is the goal of Oregon to:
  - (a) Promote the development of a diverse array of permanently sustainable energy resources using the public and private sectors to the highest degree possible; and
  - (b) Insure that rates for purchases by an electric utility from, and rates for sales to, a qualifying facility shall over the term of a contract be just and reasonable to the electric consumers of the electric utility, the qualifying facility and in the public interest.
- (3) It is, therefore, the policy of the State of Oregon to:
  - (a) Increase the marketability of electric energy produced by qualifying facilities located throughout the state for the benefit of Oregon's citizens; and
  - (b) Create a settled and uniform institutional climate for the qualifying facilities in Oregon. [1983 c.799 §2]

(1) A person, corporation, company or association of individuals or their lessees, trustees or receivers may not provide intrastate telecommunications service on a for-hire basis without a certificate of authority issued by the Public Utility Commission under this section.

(2) Applications for certificates of authority must be in a form prescribed by the commission and must describe the telecommunications services the applicant proposes to provide.

(3)(a) Except as provided in ORS 759.050, a certificate may not authorize any person to provide local exchange telecommunications service within the local exchange telecommunications service area of a telecommunications utility unless the utility consents, is unable to provide the service or fails to protest an application.

(b) Paragraph (a) of this subsection does not apply to any application for a certificate by a provider of shared telecommunications services.

(4) A hearing need not be held prior to issuance of a certificate of authority except upon the commission's own motion or unless the application is to authorize a person to provide local exchange telecommunications service in the local exchange telecommunications service area of a telecommunications utility and the utility protests. After hearing, the commission shall issue the certificate only upon a showing that the proposed service is required by the public interest.

(5) The commission may classify a successful applicant for a certificate as a telecommunications utility or as a competitive telecommunications services provider. If the commission finds that a successful applicant for a certificate has demonstrated that services it offers are subject to competition or that its customers or those proposed to become customers have reasonably available alternatives, the commission shall classify the applicant as a competitive telecommunications services provider. The commission shall conduct the initial classification and any subsequent review of the classification in accordance with procedures the commission may establish by rule, after hearings. The commission may attach reasonable conditions to the classification and may amend or revoke any order as provided in ORS 756.568. For purposes of this section, in determining whether telecommunications services are subject to competition or whether there are reasonably available alternatives, the commission shall consider:

(a) The extent to which services are available from alternative providers in the relevant market.

(b) The extent to which the services of alternative providers are functionally equivalent or substitutable at comparable rates, terms and conditions.

(c) Existing economic or regulatory barriers to entry.

(d) Any other factors deemed relevant by the commission.

(6) Any provider of intrastate toll service must inform customers of the service level furnished by that provider, according to rules of the commission. The commission, by rule, shall determine the level of intrastate toll service that is standard. Any provider of intrastate toll service must identify the service level the provider plans to furnish in an annual report to the commission. The commission shall revoke the certification of any provider that does not consistently furnish the service level identified in the provider's annual report. (1) Subject to subsection (6) of this section, ORS 759.180 to 759.190 do not apply to new or revised tariff schedules filed with the Public Utility Commission by telecommunications utilities or affiliated groups of telecommunications utilities serving fewer than 50,000 access lines in Oregon and not affiliated or under common control with any other kind of public utility providing service in

Oregon.

(2) Subject to subsection (6) of this section, ORS 759.375 to 759.393 do not apply to telecommunications utilities or affiliated groups of telecommunications utilities serving fewer than 50,000 access lines in Oregon and not affiliated or under common control with any other kind of public utility providing service in Oregon.

(4) Upon petition by any telecommunications utility serving fewer than 50,000 access lines in Oregon and affiliated or under common control with another public utility providing service in Oregon, and a finding that such action is consistent with the public interest, the commission by order may exempt such telecommunications utility from:

(a) ORS 759.180 to 759.190.

(b) ORS 759.375 to 759.393.

(c) ORS 759.300 to 759.360.

(6) Upon petition by the telecommunications utility or upon petition by 10 percent of the then current access line subscribers, or 500 subscribers, whichever is the lesser, of any telecommunications utility:

(a) Filed with the commission not less than 10 days prior to the proposed effective date of new or revised tariff schedules, the commission may impose all or part of the procedures of ORS 759.180 to 759.190 to any of the schedules of a telecommunications utility exempted from ORS 759.180 to 759.190 pursuant to this section.

(b) After notice and hearing and a finding that the action is required by the public interest, the commission may revoke any exemption granted pursuant to this section or impose reasonable conditions upon the continued exercise of the exemption.

The Public Utility Commission shall adopt specific rules to apply to telecommunications utilities which are exempted from certain regulation under ORS 759.040. An objective of these rules shall be to minimize the regulatory burden on these utilities to the extent this objective is feasible and consistent with the public interest. These rules shall not pertain to the statutes from which these utilities are exempted under ORS 759.040. [1991 c.658 §2]

**2023 Oregon Revised Statutes Volume : 19 - Utilities, Vehicle Code, Watercraft, Aviation Chapter 759 - Telecommunications Utility Regulation Section 759.050 - Competitive zone service regulation.**

(1) As used in this section:

(a) "Competitive zone" means a telecommunications service area within all or part of a local exchange, described both by service and territory, that has been designated a competitive zone by the Public Utility Commission under subsection (2) or (4) of this section.

(b) "Competitive zone service" means a local exchange telecommunications service that the commission has authorized to be provided within a competitive zone.

(c) "Essential function" means a functional component of a competitive zone service necessary to the provision of the service by a telecommunications provider for which there is no adequate alternative in terms of quality, quantity and price to the incumbent telecommunications utility.

(d) "Telecommunications utility" and "competitive provider" mean those entities that are classified as such by the commission under ORS 759.020. "Telecommunications provider" includes both telecommunications utilities and competitive providers.

(2)(a) Notwithstanding the provisions of ORS 759.020 (3), the commission may certify one or more persons, including another telecommunications utility, to provide local exchange telecommunications service within the local exchange telecommunications service area of a certificated telecommunications utility if the commission determines that the authorization would be in the public interest. For the purpose of determining whether the authorization would be in the public interest, the commission shall consider:

(A) The effect on rates for local exchange telecommunications service customers both within and outside the competitive zone.

(B) The effect on competition in the local exchange telecommunications service area.

(C) The effect on access by customers to high quality, innovative telecommunications service in the local exchange

telecommunications service area.

(D) Any other facts the commission considers relevant.

(b) Upon certification of a telecommunications provider under paragraph (a) of this subsection, the commission shall establish a competitive zone defined by the services to be provided by the telecommunications provider and the geographic area to be served by the telecommunications provider. Price and service competition within the meaning of ORS 759.052 may not be deemed to exist by virtue of the establishment of a competitive zone.

(c) At the time of certification of a telecommunications provider, or thereafter, the commission may impose reasonable conditions upon the authority of the telecommunications provider to provide competitive zone service within the competitive zone. Reasonable conditions include, but are not limited to, conditions:

(A) Designed to promote fair competition, such as interconnection; and

(B) Requiring contributions of the type required of a telecommunications utility on account of the provision of local exchange service, including those to the Residential Service Protection Fund or the Telecommunication Devices Access Program.

(3) Upon demand, a competitive provider of competitive zone services shall make available to the commission any information relating to competitive zone services that the commission requests. Information provided to the commission by a competitive provider under this subsection shall be confidential and may not be disclosed by the commission, except for regulatory purposes in the context of a proceeding before the commission.

(4) Upon application by a telecommunications utility and a showing of competition within its local exchange, whether or not from certificated providers, the commission may designate all or part of the local exchange a competitive zone.

(5)(a) Except with respect to telecommunications utilities that are exempt from the provisions of ORS 759.180 to 759.190, unless the commission determines that it is not in the public interest at the time a competitive zone is created, upon designation of a competitive zone, price changes, service variations and modifications of competitive zone services offered by a telecommunications utility in the zone are not subject to ORS 759.180 to 759.190 and, at the telecommunication utility's discretion, may be made effective upon filing with the commission.

(b) The price and terms of service offered by a telecommunications utility for a competitive zone service within a competitive zone may differ from that outside of the zone. However, the price for a competitive zone service within the zone may not be lower than the total service long run incremental cost, for nonessential functions, of providing the service within the zone and the charges for essential functions used in providing the service, but the commission may establish rates for residential local exchange telecommunications service at any level necessary to achieve the commission's universal service objectives. Within the zone, the price of a competitive zone service, or any essential function used in providing the competitive zone service, may not be higher than those prices in effect when the competitive zone was established, unless authorized by the commission.

(c) The commission may revoke the exemption of a telecommunications utility from ORS 759.180 to 759.190 if the commission finds that the utility has violated statutes, rules or conditions of the commission applicable to competitive zone services or that there has been a substantial change in the circumstances that prevailed at the time the competitive zone was first established.

(d) On the motion of a telecommunications provider or on its own motion, the commission may order a telecommunications utility to disaggregate and offer essential functions of the telecommunications utility's local exchange network.

(6) A decision of the commission, with respect to the terms and conditions under which competitive zone services may be offered within a competitive zone by a telecommunications utility, to authorize a competitor to provide service within the local exchange service area of a telecommunications utility or to otherwise designate a competitive zone shall be subject to judicial review, but may not be stayed other than by order of the commission, except upon a showing by clear and convincing evidence that failure to stay the decision will result in irreparable harm to the aggrieved party.

(7) The exclusive remedy of a telecommunications provider aggrieved by the prices, terms of service or practices of another provider with respect to competitive zone services within a competitive zone is to file a complaint with the commission under ORS 756.500. The commission, either upon complaint or its own motion, may permanently suspend a filing made by a provider with respect to a competitive zone service or take such other action as the commission deems appropriate, except an award for damages. A claim for damages arising from a commission decision in favor of the provider on a matter alleged in the complaint shall be brought as a separate action at law.

(8) Nothing in this section shall serve to shield any telecommunications provider of local exchange telecommunications service from state or federal antitrust laws. [1993 c.423 §3; 2005 c.232 §13; 2022 c.60 §10]

**2023 Oregon Revised Statutes Volume : 19 - Utilities, Vehicle Code, Watercraft, Aviation Chapter 759 - Telecommunications Utility Regulation Section 759.052 - Commission authority to exempt telecommunications services from regulation.**

(1)(a) Upon petition by any interested party and following notice and investigation, the Public Utility Commission may exempt in whole or in part from regulation those telecommunications services for which the commission finds that:

(A) Price or service competition exists;

(B) Telecommunications services can be demonstrated by the petitioner or the commission to be subject to competition; or

(C) The public interest no longer requires full regulation of the telecommunications services.

(b) The commission may attach reasonable conditions to an exemption made under paragraph (a) of this subsection and may amend or revoke any order as provided in ORS 756.568.

(2) Upon petition by a telecommunications utility, and after notice and hearing, the commission shall exempt a telecommunications

service from regulation if the commission finds that price and service competition exists.

(3) Prior to making the findings required by subsection (1) or (2) of this section, the commission shall consider:

(a) The extent to which services are available from alternative providers in the relevant market.

(b) The extent to which the services of alternative providers are functionally equivalent or substitutable at comparable rates and under comparable terms and conditions.

(c) Existing economic or regulatory barriers to entry.

(d) Any other factors deemed relevant by the commission.

(4) A service that is deregulated under subsection (2) of this section may be reregulated, after notice and hearing, if the commission determines an essential finding on which the deregulation was based no longer prevails, and reregulation is necessary to protect the public interest. [2005 c.232 §8]

**2023 Oregon Revised Statutes Volume : 19 - Utilities, Vehicle Code, Watercraft, Aviation Chapter 759 - Telecommunications Utility Regulation Section 759.054 - Price listing for product or service offered as part of local exchange telecommunications services.**

(1) If the Public Utility Commission determines that a product or service offered by a telecommunications utility as part of local exchange telecommunications services can be demonstrated by the utility to be subject to competition, or that a product or service is not an essential product or service, the commission may authorize the utility to file a price list with the commission.

(2) The price list shall contain the description, terms, conditions and prices of the service or product described in subsection (1) of this section. No other schedule for price listed services need be filed with the commission. The price list or any revision of the price list is not subject to the provisions of ORS 759.180 to 759.190 and shall become effective immediately upon filing with the commission unless a later date is specified.

(3) In determining whether a product or service is subject to competition, the commission shall consider:

(a) The extent to which services are available from alternative providers in the relevant market.

(b) The extent to which services of alternative providers are functionally equivalent or substitutable at comparable rates or under comparable terms and conditions.

(c) Existing economic or regulatory barriers to entry.

(d) Any other factors deemed relevant by the commission. [2005 c.232 §9]

**2023 Oregon Revised Statutes Volume : 19 - Utilities, Vehicle Code, Watercraft, Aviation Chapter 759 - Telecommunications Utility Regulation Section 759.056 - Price listing for product or service offered as part of interexchange telecommunications services.**

(1) If the Public Utility Commission determines that a product or service offered by a telecommunications utility as part of interexchange telecommunications services can be demonstrated by the utility to be subject to competition, the commission, under conditions that the commission determines are reasonable, may authorize the utility to file a price list with the commission.

(2) The price list shall contain the description, terms, conditions and prices of the service or product described in subsection (1) of this section. No other schedule for price listed services need be filed with the commission. The price list or any revision of the price list is not subject to the provisions of ORS 759.180 to 759.190 and shall become effective immediately on filing with the commission unless a later date is specified.

(3) In determining whether a product or service is subject to competition, the commission shall consider:

(a) The extent to which services are available from alternative providers in the relevant market.

(b) The extent to which services of alternative providers are functionally equivalent or substitutable at comparable rates or under comparable terms and conditions.

(c) Existing economic or regulatory barriers to entry.

(d) Any other factors deemed relevant by the commission. [2005 c.232 §10]

Within 60 days of a filing under ORS 759.052, 759.054 or 759.056, the Public Utility Commission shall either determine the appropriateness of the filing or determine that further investigation is necessary. If the commission determines that further investigation is necessary, the commission may suspend operation of the filing for a period not longer than five months from the end of the initial 60-day period. Upon a showing of good cause, any party may request extension of the suspension period for an additional three months. [2005 c.232 §11]

(1) The Public Utility Commission, by rule, shall specify information submitted to the commission by local exchange telecommunications utilities or cooperatives that is exempt from disclosure under ORS 192.311 to 192.478 as provided in this

section. In adopting rules, the commission shall consider, among other matters:

(a) Whether the information is of a type that could potentially be used to the competitive disadvantage of a local exchange telecommunications utility or cooperative.

(b) Whether the information concerns matters of a nature personal to an employee or stockholder of a local exchange telecommunications utility or an employee or member of a cooperative.

(c) Whether the information is otherwise publicly available.

(2) Information specified under subsection (1) of this section is exempt from disclosure unless the public interest requires disclosure in the particular instance.

(3) Nothing in subsection (1) of this section limits the exemptions granted to a local exchange telecommunications utility or cooperative under ORS 192.311 to 192.478. [1995 c.538 §2]

(a) "Market rate" means a price, lease rate or other form of compensation for goods or services provided by a public body, when participating in a proprietary transaction, that is comparable to the average price, lease rate or other form of compensation in the same market for the same goods or services provided by a private-sector provider.

(b) "Private business" does not include a nonprofit emergency services organization.

(c) "Public body" has the meaning given that term in ORS 174.109.

(2) A public body shall charge a private business a market rate for access to a radio tower if the private business uses the radio tower to deliver any of the following communication services for hire:

(a) Radio communications service;

(b) Radio paging; or

(c) Cellular communications service.

All forms of accounts which may be prescribed by the commission shall conform as nearly as practicable to similar forms prescribed by federal authority.

(2) Every telecommunications utility engaged directly or indirectly in any other business than that of a telecommunications utility shall, if required by the commission, keep and render separately to the commission, in like manner and form, the accounts of all such other business, in which case all the provisions of this chapter shall apply with like force and effect to the accounts and records of such other business. [1987 c.447 §8]

On or before April 1 following, such balance sheet, together with such other information as the Public Utility Commission shall prescribe, verified by an officer of the telecommunications utility, shall be filed with the commission.

(2) The commission may examine and audit any account. Items shall be allocated to the accounts in the manner prescribed by the commission. [1987 c.447 §10]

**2023 Oregon Revised Statutes Volume : 19 - Utilities, Vehicle Code, Watercraft, Aviation Chapter 759 - Telecommunications Utility Regulation Section 759.135 - Depreciation accounts; undepreciated investment allowed in rates; conditions.**

(1) Every telecommunications utility shall carry a proper and adequate depreciation account. The Public Utility Commission shall ascertain and determine the proper and adequate rates of depreciation of the several classes of property of each telecommunications utility. The rates shall be such as will provide the amounts required over and above the expenses of maintenance, to keep such property in a state of efficiency corresponding to the progress of the industry. Each telecommunications utility shall conform its depreciation accounts to the rates so ascertained and determined by the commission. The commission may make changes in such rates of depreciation from time to time as the commission may find to be necessary.

(2) In the following cases the commission may allow in rates, directly or indirectly, amounts on the utility's books of account which the commission finds represent undepreciated investment in a utility plant, including that which has been retired from service:

(a) When the retirement is due to ordinary wear and tear, casualties, acts of God, acts of governmental authority; or

(b) When the commission finds that the retirement is in the public interest. [1987 c.447 §11; 1989 c.956 §3]

(1) Every telecommunications utility shall file with the Public Utility Commission, within a time to be fixed by the commission, schedules showing all rates, tolls and charges that the utility has established and that are in force at the time for any service performed by the utility within the state, or for any service in connection with or performed by any utility controlled or operated by the utility. Schedules filed with the commission shall be open to public inspection.

(2) Every telecommunications utility shall file, with and as part of every schedule filed under subsection (1) of this section, all rules and regulations that in any manner affect the rates charged or to be charged for any service.

(3) Where a schedule of joint rates or charges is or may be in force between two or more telecommunications utilities, the schedule shall in like manner be printed and filed with the commission. [1987 c.447 §12; 2005 c.232 §15]

**2023 Oregon Revised Statutes Volume : 19 - Utilities, Vehicle Code, Watercraft, Aviation Chapter 759 - Telecommunications Utility Regulation Section 759.180 - Hearing on reasonableness of rates; procedures; exceptions.**

(1)(a) Except as provided in ORS 759.195 and 759.410 and ORS 759.052, 759.054 or 759.056, whenever any telecommunications utility files with the Public Utility Commission any rate or schedule of rates stating or establishing a new rate or schedule of rates or increasing an existing rate or schedule of rates, the commission may, either upon written complaint or upon the commission's own initiative, after reasonable notice, conduct a hearing to determine the propriety and reasonableness of the rate or schedule. The commission shall conduct the hearing upon written complaint filed by the telecommunications utility, its customer or customers, or any other proper party within 60 days of the telecommunications utility's filing. A hearing need not be held if the particular rate change is the result of an automatic adjustment clause. At the hearing the telecommunications utility shall bear the burden of showing that the rate or schedule of rates proposed to be established or increased or changed is just and reasonable.

(b) As used in this subsection, "automatic adjustment clause" means a provision of a rate schedule, authorized pursuant to ORS 759.195 (6), that provides for rate increases, decreases or both, without prior hearing, reflecting increases, decreases or both in costs incurred by a telecommunications utility and that is subject to review by the commission at least once every two years.

(2) The commission and staff may consult at any time with, and provide technical assistance to, telecommunications utilities, their customers, and other interested parties on matters relevant to utility rates and charges. If a hearing is held with respect to a rate change, the decisions of the commission shall be based on the record made at the hearing. [1987 c.447 §13; 1989 c.5 §16; 2005 c.232 §16]

**2023 Oregon Revised Statutes Volume : 19 - Utilities, Vehicle Code, Watercraft, Aviation Chapter 759 - Telecommunications Utility Regulation Section 759.182 - Rate schedules for service promotions; rules.**

(1) A telecommunications utility may file rate schedules for service promotions that are offered by the utility for the purpose of:

- (a) Increasing the use of the utility's services by present or future customers;
- (b) Preventing a decrease in the use of the utility's services by present or future customers; or
- (c) Inducing any person to use the utility's services instead of a competing provider's services.

(2) The rates charged under a service promotion by a telecommunications utility must be adequate to ensure that:

- (a) The utility will recover an amount equal to the sum of the total service long run incremental cost of providing the nonessential functions of the service and the price that is charged to other telecommunications carriers for the essential functions; and
- (b) The utility will recover the amount under paragraph (a) of this subsection during the average time that customers use the service.

(3) Notwithstanding ORS 759.190, service promotion rate schedules become effective upon filing with the Public Utility Commission.

(4) The commission shall adopt rules governing service promotion rate schedules filed under this section. [2001 c.309 §2]

Note:

759.182 was added to and made a part of 759.180 to 759.190 by legislative action but was not added to any other series. See Preface to Oregon Revised Statutes for further explanation.

**2023 Oregon Revised Statutes Volume : 19 - Utilities, Vehicle Code, Watercraft, Aviation Chapter 759 - Telecommunications Utility Regulation Section 759.185 - Suspension of rates pending hearing; time limitation; refund of revenue collected; interim rates.**

(1) The Public Utility Commission may, pending such investigation and determination, order the suspension of the rate or schedule of rates, provided the initial period of suspension shall not extend more than six months beyond the time when such rate or schedule would otherwise go into effect. If the commission finds that the investigation will not be completed at the expiration of the initial suspension, the commission may enter an order further suspending such rate or schedule for not more than three months beyond the last day of the initial suspension.

(2) This section does not prevent the commission and the telecommunications utility from entering into a written stipulation at any time extending any period of suspension.

(3) After full hearing, whether completed before or after such rate or schedule has gone into effect, the commission may make such order in reference thereto as would be proper in a proceeding initiated after such rate or schedule has become effective.

(4) If the commission is required to or determines to conduct a hearing on a rate or schedule of rates filed pursuant to ORS 759.180, but does not order a suspension thereof, any increased revenue collected by the telecommunications utility as a result of such rate or rate schedule becoming effective shall be received subject to being refunded. If the rate or rate schedule thereafter approved by the commission is for a lesser increase or for no increase, the telecommunications utility shall refund the amount of revenues received that exceeds the amount approved as nearly as possible to the customers from whom such excess revenues were collected, by a credit against future bills or otherwise, in such manner as the commission orders.

(5) The commission may, in a suspension order, authorize an interim rate or rate schedule under which the telecommunications utility's revenues will be increased by an amount deemed reasonable by the commission, not exceeding the amount requested by the telecommunications utility. An interim rate or rate schedule shall remain in effect until terminated by the commission. [1987 c.447 §14]

**Utility RegulationSection 759.190 - Notice of schedule change.**

No change shall be made in any schedule, including schedules of joint rates, except upon 30 days' notice to the Public Utility Commission. All changes shall be plainly indicated upon existing schedules, or by filing new schedules in lieu thereof 30 days prior to the time they are to take effect. However, the commission, for good cause shown, may allow changes without requiring the 30 days' notice by filing an order specifying the changes to be made and the time when they shall take effect. (1) Except as provided in subsection (6) of this section, upon petition of a telecommunications utility that provides local exchange service directly, or is affiliated with a utility that provides local exchange service, and after notice and hearing, the Public Utility Commission may authorize the utility to set rates for toll and other telecommunications services by filing a price list containing the price and terms for the service. The price list or any revision of the price list is not subject to the provisions of ORS 759.180 to 759.190 and shall become effective as determined by the commission. The commission may prescribe conditions on an authorization to establish rates by price list, including conditions relating to the sharing of revenues received by the utility that are in excess of allowances provided for in the order of authorization.

(2) Telecommunications utilities that provide telecommunications services only between exchanges and are not affiliated with a utility that provides local exchange service may establish rates by price list without special authorization from the commission.

(3) Prior to granting a petition to set rates by price list under this section, the commission shall find that pricing flexibility:

(a) Is reasonably necessary to enable the utility to respond to current and future competitive conditions for any or all telecommunications services;

(b) Will maintain the appropriate balance between the need for price flexibility and the protection of consumers;

(c) Is likely to benefit the consumers of fixed rate services; and

(d) Is unlikely to cause any undue harm to any customer class.

(4) A rate set for a service by a utility may not be lower than the long run incremental cost of providing the service.

(5) Upon its own motion the commission may fix maximum rate levels and terms of service for price listed services and for toll services on noncompetitive routes. Upon request of any affected person, the commission shall fix maximum rate levels and terms of service for price listed services not subject to competition and for toll services on noncompetitive routes.

(6) By rule, the commission shall designate local exchange services that it deems essential, and rates for such services shall be prescribed under ORS 759.180 to 759.190. The commission also may authorize automatic adjustment clauses which reflect increases, decreases, or both, in particular costs incurred by the utility. For the purposes of this subsection, "essential services" need not be essential for all classes of customers.

(7) The commission may, at any time, order a telecommunications utility to appear and establish that any of its price listed rates are just and reasonable and in conformity with the requirements of this section and the authorization to price list issued by the commission. Price listed rates shall also be subject to complaint under ORS 756.500. [Formerly 757.850; 2005 c.232 §13a]

**2023 Oregon Revised StatutesVolume : 19 - Utilities, Vehicle Code, Watercraft, AviationChapter 759 - Telecommunications Utility RegulationSection 759.200 - Inclusion of amortizations in rates; deferral of certain expenses or revenues; limitation on amounts; prohibited uses.**

(1) In addition to powers otherwise vested in the Public Utility Commission, and subject to the limitations contained in subsection (5) of this section, under amortization schedules set by the commission, a rate or rate schedule may reflect the following:

(a) Amounts lawfully imposed retroactively by order of another governmental agency; or

(b) Amounts deferred under subsection (2) of this section.

(2) Upon application of a telecommunications utility or ratepayer or upon the commission's own motion and after public notice and opportunity for comment, the commission by order may authorize deferral, for later incorporation in rates, telecommunications utility expenses or revenues, the recovery or refund of which the commission finds should be deferred in order to minimize the frequency of rate changes or the fluctuation of rate levels or to match appropriately the costs borne by and benefits received by ratepayers. The authority under this subsection is limited to the following accounts:

(a) Increases or decreases in amounts incurred by a telecommunications utility resulting from changes in jurisdictional separations approved by the Federal Communications Commission;

(b) Increases or decreases in amounts incurred by a telecommunications utility resulting from changes in depreciation rates or amortization schedules approved by the commission;

(c) Increases or decreases in amounts incurred by a telecommunications utility resulting from changes in income, excise, franchise or ad valorem taxes by the federal, state or local governments;

(d) Increases or decreases in amounts incurred by a telecommunications utility resulting from restoration of telecommunications services interrupted by floods, fires, earthquakes, storms or other acts of nature;

(e) Increases or decreases in amounts incurred by a telecommunications utility for research, development, planning and advance advertising for products and services not yet in service;

- (f) Increases or decreases in amounts incurred by a telecommunications utility for telephone plant transfers and property sales approved by the commission;
  - (g) Increases or decreases in amounts incurred by a telecommunications utility from affiliated interest contracts and transactions approved by the commission;
  - (h) Increases or decreases in amounts incurred by a telecommunications utility from attorney's fees, court settlements and court awards;
  - (i) Increases or decreases in amounts incurred by a telecommunications utility resulting from changes in accounting methods approved by the commission; and
  - (j) Increases or decreases in amounts incurred by a telecommunications utility from customer service contracts, intercompany service contracts and joint and through service arrangements.
- (3) The commission may authorize deferrals under subsection (2) of this section beginning with the date of application, together with interest established by the commission. A deferral may be authorized for a period not to exceed 12 months beginning on or after the date of application.
- (4) Unless subject to an automatic adjustment clause under ORS 759.180, amounts described in this section shall be allowed in rates only to the extent authorized by the commission in a proceeding to change rates and upon review of the utility's earnings at the time of application to amortize the deferral.
- (5) In any one year, the overall average rate impact of the amortizations authorized under this section shall not exceed three percent of the telecommunications utility's gross revenues for the preceding calendar year.
- (6) The provisions of this section may be used as a means of deferring the effect of readily identifiable and readily measurable changes in particular costs or revenues of a telecommunications utility, but shall not be used to implement a claim for an increase or decrease in the overall revenue requirement of a telecommunications utility when the amount of the change or changes would not be known until the completion of a rate case. No telecommunications utility shall charge, demand, collect or receive a greater or less compensation for any service performed by it within the state, or for any service in connection therewith, than is specified in printed rate schedules as may at the time be in force, or demand, collect or receive any rate not specified in such schedule. The rates named therein are the lawful rates until they are changed as provided in this chapter. [1987 c.447 §16]

**2023 Oregon Revised Statutes Volume : 19 - Utilities, Vehicle Code, Watercraft, Aviation Chapter 759 - Telecommunications Utility Regulation Section 759.210 - Classification of service and rates; considerations; rules.**

- (1) The Public Utility Commission shall provide for a comprehensive classification of service for each telecommunications utility. The classification may take into account the quantity used, the time when used, the purpose for which used, the existence of price competition or a service alternative, the services being provided, the conditions of service and any other reasonable consideration. Based on these considerations the commission may authorize classifications or schedules of rates applicable to individual customers or groups of customers. Each telecommunications utility is required to conform its schedules of rates to such classification. If the commission determines that a tariff filing under ORS 759.175 results in a rate classification primarily related to price competition or a service alternative, the commission, at a minimum, shall consider the following:
- (a) Whether the rate generates revenues at least sufficient to cover relevant short and long run costs of the utility during the term of the rates; and
  - (b) Whether the rate generates revenues sufficient to insure that just and reasonable rates are established for remaining customers of the telecommunications utility.
- (2) The commission may prescribe any changes in the form in which the schedules are issued by any telecommunications utility as the commission finds to be expedient. The commission shall adopt rules that allow any person who requests notice of tariff filings described under subsection (1) of this section to receive such notice. - (2) Except as provided in ORS 759.410 (8), copies of all new schedules shall be made readily accessible to the public as required by the commission 30 days prior to the time the schedules are to take effect, unless the commission prescribes a shorter time. [1987 c.447 §18; 2005 c.232 §19]

- (1) A telecommunications utility may not use revenues earned from, or allocate expenses to, that portion of the utility's business that

is regulated under this chapter in order to subsidize activities that are not regulated by this chapter.

(2) The Public Utility Commission may not require revenues or expenses from an activity that is not regulated under this chapter to be attributed to the regulated activities of a telecommunications utility.

(3) The commission may approve a telecommunications utility rate proposal for basic local service rates that utilizes revenues from other regulated services to partially cover the costs of providing basic local service. [2005 c.232 §4]

The privilege tax authorized by ORS 221.515, or other similar exactions imposed by any municipality in this state upon telecommunications utilities for use and occupancy of streets, alleys or highways, or all of them, shall be allowed as an operating expense of the affected telecommunications utilities operating in the municipality for rate-making purposes by the Public Utility Commission. The cost of such privilege tax or other similar exactions shall be charged pro rata to the users of such telecommunications utility within the municipality unless the Public Utility Commission determines on a statewide basis that such pro rata charges would be inequitable, in whole or in part, to city ratepayers or should otherwise be borne as a statewide operating expense by the telecommunications utility. [Formerly 759.105]

**2023 Oregon Revised Statutes Volume : 19 - Utilities, Vehicle Code, Watercraft, Aviation Chapter 759 - Telecommunications Utility Regulation Section 759.220 - Joint rates and classifications; procedure; considerations.**

(1) A telecommunications utility may establish reasonable through service and joint rates and classifications with other telecommunications utilities. Telecommunications utilities establishing joint rates shall establish just and reasonable regulations and practices in connection therewith and just, reasonable and equitable divisions thereof, as between the public utilities participating therein which shall not unduly prefer or prejudice any of the participating telecommunications utilities and every unjust and unreasonable rate, classification, regulation, practice and division is prohibited.

(2) The Public Utility Commission may, and shall, whenever deemed by the commission to be necessary or desirable in the public interest, after full hearing upon complaint, or upon the commission's own initiative without complaint, establish through service, classifications and joint rates, the divisions of such rates and the terms and conditions under which such through service shall be rendered. If any tariff or schedule canceling any through service or joint rate or classification without the consent of all the telecommunications utilities party thereto, or authorization by the commission is suspended by the commission for investigation, the burden of proof is upon the telecommunications utility proposing such cancellation to show that it is consistent with the public interest.

(3) Whenever, after full hearing upon complaint or upon the commission's own initiative without complaint, the commission is of the opinion that the divisions of joint rates between the telecommunications utilities are or will be unjust, unreasonable, inequitable or unduly preferential or prejudicial as between the telecommunications utilities party thereto, whether agreed upon by such telecommunications utilities or otherwise established, the commission shall, by order, prescribe the just, reasonable and equitable divisions thereof to be received by the several telecommunications utilities. In cases where the joint rate was established pursuant to the finding or order of the commission and the divisions thereto are found by the commission to have been unjust, unreasonable or inequitable, or unduly preferential or prejudicial, the commission may also by order determine what, for the period subsequent to the filing of the complaint or petition or the making of the order of investigation, would have been the just, reasonable and equitable division thereof to be received by the several telecommunications utilities and require adjustment to be made in accordance therewith.

(4) In so prescribing and determining the divisions of joint rates, the commission shall give due consideration, among other things, to:

(a) The efficiency with which the telecommunications utilities concerned are operated;

(b) The amount of revenue to pay their respective operating expenses, taxes and a fair return on their telecommunications utility property held for and used in service;

(c) The importance to the public of the services of such telecommunications utilities;

(d) Whether any particular participating telecommunications utility is an originating, intermediate or delivering utility; and

(e) Any other fact or circumstance which ordinarily would entitle one telecommunications utility to a greater or less proportion of the joint rate than another. [1987 c.447 §19]

Notwithstanding any other provision of law, ORS 759.220 applies to any unincorporated association or cooperative corporation providing intrastate telecommunications service. The application of ORS 759.220 to unincorporated associations and cooperative corporations:

(1) Does not allow the Public Utility Commission to establish terms, conditions, classifications or rates for services rendered to members of unincorporated associations or cooperative corporations;

(2) Does not make unincorporated associations or cooperative corporations subject to the commission's general powers of

regulation;

- (3) Allows the commission to regulate access charges imposed by unincorporated associations and cooperative corporations; and
- (4) Requires unincorporated associations and cooperative corporations to provide information to the commission that the commission deems necessary to establish new extended service areas. [Formerly 757.860; 2001 c.853 §1]

(1) Notwithstanding any other provision of this chapter, the Public Utility Commission shall not authorize a telecommunications utility to implement a rate schedule that includes optional measured service for business customers unless the rate for the service is sufficient to defray all costs that must be incurred to implement the service, including the costs of measuring and billing.

(2) As used in this section:

- (a) "Local exchange telephone service" means telephone service provided within the boundaries of exchange maps filed with and approved by the commission.
- (b) "Measured service" means local exchange telephone service, the rate for which is based upon the number of calls, length of calls, distance or time of day. [Formerly 757.835]

**2023 Oregon Revised Statutes Volume : 19 - Utilities, Vehicle Code, Watercraft, Aviation Chapter 759 - Telecommunications Utility Regulation Section 759.235 - Mandatory measured service rate; prohibition.**

(1) The Public Utility Commission shall be prohibited from requiring any call aggregator, telephone customer or class of customers to pay for local exchange telephone service, or any portion thereof, on a mandatory measured service basis.

(2) As used in this section:

- (a) "Call aggregator" has the meaning given that term in ORS 759.680.
- (b) "Measured service" means charging for local exchange telephone service based upon number of calls, length of calls, distance, time of day, or any combination thereof.

(3) Nothing in this section is intended to prohibit the commission from requiring telephone customers to pay on a mandatory measured service basis for:

- (a) Land, marine, or air mobile service.
- (b) Local exchange telephone service resold at a profit.
- (4) The commission shall not change boundaries of local exchange service areas nor take any other actions if such changes or actions have the effect of circumventing subsections (1) and (2) of this section. [Formerly 757.840; 1997 c.317 §1]

**2023 Oregon Revised Statutes Volume : 19 - Utilities, Vehicle Code, Watercraft, Aviation Chapter 759 - Telecommunications Utility Regulation Section 759.240 - Measuring quality of service; standards; rules.**

(1) The Public Utility Commission shall ascertain and prescribe for each kind of telecommunications utility suitable and convenient standard commercial units of service. These shall be lawful units for the purposes of this chapter.

(2) The commission shall ascertain and fix adequate and serviceable standards for the measurement of quality, pressure, initial voltage or other conditions pertaining to the supply of the service rendered by any telecommunications utility and prescribe reasonable regulations for examination and testing of such service and for the measurement thereof. It shall establish reasonable rules, regulations, specifications and standards to secure the accuracy of all meters and appliances for the measurements, and every telecommunications utility is required to carry into effect all orders issued by the commission relative thereto. (1) The Public Utility Commission may provide for the examination and testing of any and all appliances used for the measuring of any service of a telecommunications utility and may provide by rule that no such appliance shall be installed and used for the measuring of any service of any telecommunications utility until it has been examined and tested by the commission and found to be accurate.

(2) The commission shall declare and establish a reasonable fee governing the cost of such examination and test, which shall be paid to the commission by the telecommunications utility.

(3) The commission shall declare and establish reasonable fees for the testing of such appliances on the application of the customer, the fee to be paid by the customer at the time of the customer's request, but to be repaid to the customer by the commission and to be paid by the telecommunications utility if the appliance is found defective or incorrect to the disadvantage of the customer or used beyond such reasonable limit as may be prescribed by the commission.

(4) All fees collected under the provisions of this section shall be paid by the commission into the State Treasury.

(5) The commission may purchase such materials, apparatus and standard measuring instruments for the examination and tests as the commission deems necessary. [1987 c.447 §21]

## **investigation.**

- (1) A telecommunications utility may enter into a contract with any customer for the provision of a telecommunications service that the Public Utility Commission determines is a new service with limited availability, is designed to respond to a unique customer requirement or is subject to competition. Contracts shall be for a stated time period, not to exceed five years. If a contract includes competitive and noncompetitive service elements, the noncompetitive service elements shall be unbundled and priced separately from all other facilities and service elements in the contract. Such noncompetitive service elements shall be made available to all purchasers under the same or substantially the same circumstances at the same rate, terms and conditions.
- (2) The telecommunications utility shall file any contract with the commission no later than 90 days following its effective date. At the customer's request, the telecommunications utility shall file the contract at least 30 days in advance of the effective date. Notice of the filing of the contract shall be given by the commission to all persons who have filed with the commission a petition to receive such notice.
- (3) Contracts entered into under this section are not schedules of rates, tolls or charges within the meaning of ORS 759.175. A contract entered into under this section shall be enforceable by the contracting parties according to its terms, unless the contract has been rejected by the commission as provided in this section.
- (4) Notwithstanding ORS 759.175 to 759.185, the commission shall approve any contract for a telecommunications service entered into under this section if the commission finds the following:
  - (a) The telecommunications service is a new service with limited availability, is designed to respond to a unique customer requirement or is subject to competition. In making the determination of whether a service is subject to competition, the commission shall consider whether the customer might reasonably have chosen an alternative to the telecommunications utility's service.
  - (b) The contracted price for the telecommunications service is above the long run incremental costs of providing such service during the term of the contract. In making this calculation for a contract that includes both competitive and noncompetitive service elements, the commission shall consider separately whether the competitive service elements are priced above the long run incremental costs of providing such service elements.
  - (c) The contracted price for the telecommunications service includes all costs of providing such service, including the rate that would be charged by a telecommunications utility to any competitive telecommunications provider for any component essential to the competitive telecommunications provider's ability to offer the telecommunications service. The commission shall determine which components of the service shall be deemed essential and the method to include prices of those components in costs of such services.
- (5) The commission shall issue an order regarding any contract filed under subsection (2) of this section within 90 days of the filing. If the commission does not act within 90 days of the filing, the contract shall be deemed approved. If the commission disapproves the contract, it shall enter an order describing the ways in which the contract fails to meet the standards set forth in subsection (4) of this section and declaring the contract null and void. The telecommunications utility or customer may request that the commission hold a hearing to determine whether the order should continue in effect. Any such request for hearing shall be submitted to the commission not later than 15 days after the date of service of the order, and the commission shall hold the hearing not later than 60 days after receipt of such request for hearing.
- (6) Notwithstanding ORS 192.311 to 192.478, the commission shall not disclose the identity of a customer or any customer proprietary information contained in a contract filed under subsection (2) of this section without the consent of the customer and the telecommunications utility.
- (7) No contract filed under subsection (2) of this section may be automatically renewed. A contract renewal shall be treated as a new contract.
- (8) Nothing in this section shall be deemed state action for the purpose of exempting a telecommunications utility from liability for anticompetitive conduct or other unlawful practices.
- (9) Any contract executed prior to September 29, 1991, and approved by the commission is deemed lawful and shall be enforceable by the contracting parties according to its terms. A contract renewal shall be deemed a new contract.
- (10) Nothing in this section shall restrict the commission from subsequent scrutiny of the reasonableness of contracts filed under this section for ratemaking purposes.
- (11) In accordance with ORS 756.515, the commission may investigate contracts filed by a specific telecommunications utility under this section. Notwithstanding any other provision of this section, if the commission finds that contracts entered into by a telecommunications utility have not generally been in the public interest, the commission, by order, may prevent or restrict the telecommunications utility from future contracting pursuant to this section and may require the telecommunications utility to file contracts under ORS 759.175. [1991 c.527 §2]

## **2023 Oregon Revised Statutes Volume : 19 - Utilities, Vehicle Code, Watercraft, Aviation Chapter 759 - Telecommunications Utility Regulation Section 759.255 - Setting prices without regard to return on utility investment; petition; findings; conditions; application of statutes to approved plan.**

- (1) In addition to powers vested in the Public Utility Commission under ORS 759.195, and subject to the limitations contained in subsections (2) to (4) of this section, upon petition of a telecommunications utility that provides local exchange service directly, or is affiliated with a utility that provides local exchange service, the commission, after notice and hearing, may approve a plan under

which the commission regulates prices charged by the utility, without regard to the return on investment of the utility. Prices approved under the plan are not subject to the provisions of ORS 759.180 to 759.190 and shall become effective as stated in the plan.

(2) Prior to granting a petition to approve a plan under subsection (1) of this section, the commission must find that the plan is in the public interest. In making its determination the commission shall consider, among other matters, whether the plan:

- (a) Ensures prices for telecommunications services that are just and reasonable;
- (b) Ensures high quality of existing telecommunications services and makes new services available;
- (c) Maintains the appropriate balance between the need for regulation and competition; and
- (d) Simplifies regulation.

(3) If the commission approves a plan under subsection (1) of this section, the commission shall establish objectives of the plan and conditions for review of the plan during the operation of the plan. The commission may not consider return on investment of the utility when the commission establishes objectives of the plan and conditions for review of the plan during the operation of the plan.

(4) A rate for any service in the plan authorized under subsection (1) of this section may not be lower than the total service long run incremental cost, for nonessential functions, of providing the service and the charges of essential functions used in providing the service. However, the commission may allow a telecommunications utility to establish rates for residential local exchange service at any level necessary to achieve the commission's universal service objectives.

(5) If the commission approves a plan under subsection (1) of this section, the commission may waive, in whole or in part, compliance by the telecommunications utility with ORS 759.120, 759.125, 759.130, 759.135, 759.180 to 759.205, 759.215, 759.220, 759.285 and 759.300 to 759.393. (2) The service provided for in subsection (1) of this section may be implemented during the currently pending Portland EAS Region Expansion, but in no event shall such implementation occur later than November 1, 1998.

(3) Nothing in subsection (1) of this section authorizes a telecommunications utility to discontinue two-way, flat rate or measured extended area service in any exchange area where that service was provided prior to October 4, 1997. [1997 c.796 §2]

(2) The service provided for in subsection (1) of this section may be implemented during the currently pending Portland EAS Region Expansion, but in no event shall such implementation occur later than November 1, 1998, after approval by customers of the Molalla Exchange.

(3) Nothing in subsection (1) of this section authorizes a telecommunications utility to discontinue two-way, flat rate or measured extended area service in any exchange area where the service was provided prior to October 4, 1997. [1997 c.505 §2]

(1) Except as provided in ORS 759.265, no telecommunications utility or any agent or officer thereof shall, directly or indirectly, by any device, charge, demand, collect or receive from any person a greater or less compensation for any service rendered or to be rendered by it than:

- (a) That prescribed in the public schedules or tariffs then in force or established; or
- (b) It charges, demands, collects or receives from any other person for a like and contemporaneous service under substantially similar circumstances. A difference in rates or charges based upon a difference in classification pursuant to ORS 759.210 shall not constitute a violation of this paragraph.

(2) Any telecommunications utility violating this section is guilty of unjust discrimination. [1987 c.447 §46; 1989 c.5 §22; 1993 c.18 §165]

- (a) Its officers, directors, employees and members of their families;
- (b) Former employees of such telecommunications utilities or members of their families where such former employees have become

disabled in the service of such telecommunications utility or are unable from physical disqualification, including retirement, to continue in the service; or

(c) Members of families of deceased employees of such telecommunications utility.

utility unless authorized to do so by the Public Utility Commission.

(2) Every contract by any telecommunications utility for the purchase, acquisition, assignment or transfer to it of any of the stock of any other telecommunications utility by or through any person, partnership or corporation without the approval of the commission shall be void and of no effect, and no such transfer or assignment of such stock upon the books of the corporation pursuant to any such contract is effective for any purpose. **2023 Oregon Revised Statutes Volume : 19 - Utilities, Vehicle Code, Watercraft, Aviation Chapter 759 - Telecommunications Utility Regulation Section 759.385 - Contracts regarding use of utility property; filing with commission; investigation.**

(1) When any telecommunications utility doing business in this state, except a telecommunications carrier that has elected to be subject to ORS 759.405 and 759.410, enters into a contract with another corporation with relation to the construction, operation, maintenance or use of the property of the telecommunications utility in Oregon, or the use of the property of the other contracting party, or any part of the property, or for service, advice, engineering, financing, rentals, leasing or for any construction or management charges with respect to any of the property, or for the purchase of property, materials or supplies, the proposed contract shall be filed with the Public Utility Commission for investigation and approval when the telecommunications utility owns a majority of or controls directly or indirectly the voting stock of the other contracting corporations.

(2) Any proposed contract described in subsection (1) of this section shall be filed with the commission within 90 days of execution of the contract. The contract shall be deemed to be executed on the date the parties sign a written contract or on the date the parties begin to transact business under the contract, whichever date is earlier. The commission shall promptly investigate and act upon the contract in accordance with ORS 759.390 (4) and (7).

The failure or refusal of either of the parties to the proposed contract to comply with this subsection is prima facie evidence that the contract is unfair, unreasonable and contrary to public interest, and is sufficient to justify a determination and finding of the commission to that effect. A determination and finding by the commission under this subsection has the same force and effect as any other determination or order of the commission.

(4) This section applies only to transactions in which the telecommunications utility's Oregon intrastate expenditure to the affiliate is more than \$100,000. [1987 c.447 §43; 1989 c.956 §4; 1991 c.899 §1; 1999 c.809 §1; 2005 c.232 §21; 2009 c.11 §97]

(b) Every person in any chain of successive ownership of five percent or more of the voting securities of the telecommunications utility.

(c) Every corporation five percent or more of whose voting securities are owned by any person owning five percent or more of the voting securities of the telecommunications utility or by any person in any chain of successive ownership of five percent or more of the voting securities of the telecommunications utility.

(d) Every individual who is an officer or director of the telecommunications utility or of any person in any chain of successive ownership of five percent or more of the voting securities of the telecommunications utility.

(e) Every corporation that has two or more officers or two or more directors in common with the telecommunications utility.

(f) Every entity, five percent or more of which is directly or indirectly owned by a telecommunications utility.

(g) Every person that the Public Utility Commission determines as a matter of fact, after investigation and hearing, actually is exercising any substantial influence over the policies and actions of the telecommunications utility, even though the influence is not based upon stockholdings, stockholders, directors or officers to the extent specified in this section.

(h) Every person that the commission determines as a matter of fact, after investigation and hearing, actually is exercising such substantial influence over the policies and actions of the telecommunications utility in conjunction with one or more other persons with whom they are related by ownership or blood or by action in concert that together they are affiliated with the telecommunications utility within the meaning of this section even though no one of them alone is so affiliated.

(2) When any telecommunications utility doing business in this state, except a telecommunications carrier that has elected to be subject to ORS 759.405 and 759.410, enters into any contract to make any payment, directly or indirectly, to any person having an affiliated interest, for service, advice, auditing, accounting, sponsoring, engineering, managing, operating, financing, legal or other services, or enters any charge on the books of the utility, and the contract is to be recognized as an operating expense or capital expenditure in any rate valuation or any other hearing or proceeding, the contract shall be filed with the commission within 90 days of execution of the contract. The contract shall be deemed to be executed on the date the parties sign a written contract or on the date the parties begin to transact business under the contract, whichever date is earlier.

(3) When any telecommunications utility doing business in this state enters into any contract, oral or written, with any person having an affiliated interest relating to the construction, operation, maintenance, leasing or use of the property of the telecommunications

utility in Oregon, or the purchase of property, materials or supplies that is to be recognized as the basis of an operating expense or capital expenditure in any rate valuation or any other hearing or proceeding, the contract shall be filed with the commission within 90 days of execution of the contract. The contract shall be deemed to be executed on the date the parties sign a written contract or on the date the parties begin to transact business under the contract, whichever date is earlier.

(4) The commission promptly shall examine and investigate any contract submitted to the commission under subsection (2) or (3) of this section. If, after the investigation, the commission determines that it is fair and reasonable and not contrary to the public interest, the commission shall enter findings and order approving the contract and serve a copy of the findings and order upon the telecommunications utility. Following the commission's determination of fairness and reasonableness, any expenses and capital expenditures incurred by the telecommunications utility under the contract may be recognized in any rate valuation or other hearing or proceeding. If, after the investigation, the commission determines that the contract is not fair and reasonable in all its terms and is contrary to the public interest, the commission shall enter findings and order disapproving the contract and serve a copy of the findings and order upon the telecommunications utility. Except as provided in subsection (5) of this section, it is unlawful to recognize a disapproved contract for the purposes specified in this section.

(5) When any contract described in subsection (2) or (3) of this section has been filed with the commission within 90 days of execution and the commission has not entered an order disapproving the contract under subsection (4) of this section, the commission may not base its refusal to recognize any expenses or capital expenditures incurred under the contract in any rate valuation or other hearing or proceeding solely on the basis that the contract has not been approved under subsection (4) of this section.

(6) A telecommunications utility may not issue notes or loan its funds or give credit on its books or otherwise to any person having an affiliated interest, either directly or indirectly, without the approval of the commission.

(7) The action of the commission with respect to all the matters described in this section shall be by findings and order to be entered within 90 days after the matter has been submitted to the commission for consideration. An order of the commission under this section is subject to judicial review in the manner provided by ORS 756.610.

(8) This section applies only to transactions in which the telecommunications utility's Oregon intrastate expenditure to the affiliate is more than \$100,000. [1987 c.447 §44; 1989 c.956 §5; 1991 c.899 §2; 1999 c.809 §2; 2005 c.232 §22; 2005 c.638 §16a; 2017 c.312 §10]

(2) On April 1 of each year, every telecommunications utility shall file with the commission a list of affiliate contracts executed in the preceding year. The list shall consist of the names of the parties to the contracts, the dollar amounts of the contracts and the dates of execution of the contracts. [1999 c.809 §3]

An electing telecommunications carrier shall credit an equal amount on the same date in the next following year. The electing carrier shall credit to its Telecommunications Infrastructure Account an amount equal to 20 percent of the total committed amount on the same date in each of the next following two years.

(3)(a) A telecommunications carrier that elects to be subject to this section and ORS 759.410 shall expend the moneys in the telecommunications carrier's Telecommunications Infrastructure Account on a plan or plans approved by the Oregon Business Development Commission under ORS 759.430. Subject to paragraphs (c) and (d) of this subsection, the total amount of capital and other expenses associated with completing the projects shall equal the total amount of moneys available in the account.

(b) Moneys in the account shall be used primarily to ensure that rural and urban Oregonians have improved access to telecommunications technology and services. Expenditures from the account shall be used for investment in telecommunications infrastructure and deployment of new and advanced telecommunications services.

(c)(A) Within 120 days following the effective date of a telecommunications carrier's election to be regulated under this section and ORS 759.410, but not later than January 1 of the year following the effective date of a telecommunications carrier's election, and on the same date in each of the next following three years, a telecommunications carrier serving less than one million access lines in Oregon shall transfer 40 percent of the moneys most recently credited to its Telecommunications Infrastructure Account to the Connecting Oregon Communities Fund established under ORS 759.445.

(B) Within 120 days following the effective date of a telecommunications carrier's election to be regulated under this section and ORS 759.410, but not later than January 1 of the year following the effective date of a telecommunications carrier's election, and on the same date in the next following year, a telecommunications carrier serving one million or more access lines in Oregon shall transfer 70 percent of the moneys most recently credited to its Telecommunications Infrastructure Account to the Connecting Oregon Communities Fund established under ORS 759.445.

(d) Notwithstanding ORS 285A.075 (2), if the Oregon Business Development Commission determines, following notice and a public hearing, that the telecommunications carrier is not complying with plans or plan modifications approved under ORS 759.430, following notice to the telecommunications carrier and reasonable opportunity to cure any noncompliance, the Oregon Business Development Commission may require the telecommunications carrier to transfer any or all moneys remaining in the carrier's Telecommunications Infrastructure Account, and any future amounts credited to the account, to the Connecting Oregon Communities Fund established under ORS 759.445.

(4) Nothing in this section affects the authority of a city or municipality to manage the public rights of way or to require fair and reasonable compensation from a telecommunications carrier, on a competitively neutral and nondiscriminatory basis, under ORS 221.420, 221.450, 221.510 and 221.515. **2023 Oregon Revised Statutes Volume : 19 - Utilities, Vehicle Code, Watercraft, Aviation Chapter 759 - Telecommunications Utility Regulation Section 759.410 - Intent of ORS 759.410; establishing maximum and minimum price for telecommunications services; packaging services; notice of price change, new service; enforcement.**

(1) It is the intent of the Legislative Assembly that:

(a) The State of Oregon cease regulation of telecommunications carriers on a rate of return basis;

(b) Telecommunications carriers subject to rate of return regulation have the ability to opt out of rate of return regulation;

(c) A telecommunications carrier that opts out of rate of return regulation under this section and ORS 759.405 shall be subject to price cap regulation and the carrier under price cap regulation shall continue to meet service quality requirements; and

(d) Telecommunications carriers that opt out of rate of return regulation under this section and ORS 759.405 shall make payments to the state to support the use of advanced telecommunications services and to support deployment of advanced telecommunications services.

(2) A telecommunications carrier that elects to be subject to this section and ORS 759.405 shall be subject to price regulation as provided in this section and shall not be subject to any other retail rate regulation, including but not limited to any form of earnings-based, rate-based or rate of return regulation.

(3) The price a telecommunications utility that elects to be subject to this section and ORS 759.405 may charge for basic telephone service shall be established by the Public Utility Commission under ORS 759.425. Subject to ORS 759.415, the regular tariff rate of intrastate switched access and retail telecommunications services regulated by the commission, other than basic telephone service, in effect on the date the carrier elects to be subject to this section and ORS 759.405 shall be the maximum price the telecommunications carrier may charge for that service.

(4) A telecommunications carrier that elects to be subject to this section and ORS 759.405 may adjust the price for intrastate switched access or a regulated retail telecommunications service between the maximum price established under this section and a price floor equal to the sum of the total service long run incremental cost of providing the service for the nonessential functions of the service and the price that is charged to other telecommunications carriers for the essential functions. Basic telephone service

shall not be subject to a price floor.

(5) The price for a new regulated retail telecommunications service introduced by a telecommunications carrier within four years after the date the carrier elects to be subject to this section and ORS 759.405 shall be subject to a price floor test by the commission to ensure that the service is not priced below the sum of the total service long run incremental cost of providing the service for the nonessential functions of the service and the price that is charged to other telecommunications carriers for the essential functions. Beginning on the date four years after September 1, 1999, the price of a new telecommunications service shall be subject to a price floor test by the commission to ensure that the service is not priced below the total service long run incremental cost of providing the service, without regard to whether the service is considered essential or nonessential.

(6) A telecommunications carrier that elects to be subject to this section and ORS 759.405 may package and offer any of its retail telecommunications services with any other service at any price, provided the following conditions apply:

(a) Any regulated telecommunications service may be purchased separately at or below the maximum price.

(b) The price of the package is not less than the sum of the price floors of each regulated retail telecommunications service included in the package.

(c) The price of a package that is comprised entirely of regulated retail telecommunications services does not exceed the sum of the maximum prices for each of the services.

(d) The price of a package comprised of regulated and unregulated retail telecommunications services does not exceed the sum of the maximum prices established under this section for regulated services and the retail price charged by the carrier for the individual unregulated services in the package. A telecommunications carrier subject to regulation under this section shall provide notice to the commission within 30 days of a change in the price of an unregulated telecommunications service contained in the package.

(7) Nothing in this section or ORS 759.405 is intended to limit the ability of a telecommunications carrier to seek deregulation of telecommunications services under ORS 759.052.

(8)(a) Notice of a price change authorized under subsection (4) of this section, of the introduction of a new regulated telecommunications service or of the packaging of services, must be given to the commission within 30 days following the effective date of the price change, new service or packaged service. Notice of a new regulated telecommunications service shall indicate the retail price charged by the carrier for the service.

(b) The commission may investigate any price change authorized under subsection (4) of this section, the price of a new regulated telecommunications service or the price of a package of services to determine that the price complies with the provisions of this section and any other applicable law. If the commission determines that the price of the service or package of services does not comply with the provisions of this section or other applicable law, the commission may order the telecommunications carrier to take such action as the commission determines necessary to bring the price into compliance with this section or other applicable law.

(9) Nothing in this section affects the authority of a city or municipality to manage the public rights of way or to require fair and reasonable compensation from a telecommunications carrier, on a competitively neutral and nondiscriminatory basis, under ORS 221.420, 221.450, 221.510 and 221.515.

(10) Notwithstanding any other provision of this section, the commission shall establish prices for extended area service in a manner that allows a telecommunications carrier that elects to be subject to this section and ORS 759.405 to recover all costs and lost net revenues attributable to implementing new extended area service routes. The provisions of this subsection apply to telecommunications service provided on a flat or measured basis between exchanges defined by exchange maps filed with and approved by the commission. (1) In a rate proceeding brought by a telecommunications carrier that elects to be subject to ORS 759.405 and 759.410, or by the Public Utility Commission against an electing telecommunications carrier, prior to January 1, 1999, that is on appeal on September 1, 1999, a final rate for a telecommunications service implemented as a result of the final judgment and order or negotiated settlement shall become the maximum rate for purposes of ORS 759.410.

(2) A rate proceeding brought by or against an electing telecommunications carrier, after January 1, 1999, that is pending on the effective date of the carrier's election to be subject to ORS 759.405 and 759.410, shall be dismissed by the commission or by the court if on appeal, provided the carrier elects to be subject to regulation under ORS 759.405 and 759.410 within the later of:

(b) Ninety days from September 1, 1999.

(3) Notwithstanding subsection (2) of this section, the parties to a rate proceeding brought by or against an electing telecommunications carrier, after January 1, 1999, that is pending on the effective date of the carrier's election to be subject to ORS 759.405 and 759.410, may agree to continue the proceeding. (1)(a) The Public Utility Commission shall establish and implement a competitively neutral and nondiscriminatory universal service fund. The commission shall:

(A) Use the universal service fund to ensure basic telephone service is available at a reasonable and affordable rate; and

(B) Transfer from the universal service fund to the Oregon Business Development Department for deposit in the Broadband Fund established under ORS 285A.167, an amount per year that is equal to the lesser of:

(i) \$5 million; or

(ii) The remainder of moneys deposited in the universal service fund that are unobligated after making the designation required in paragraph (b) of this subsection.

(b) The commission shall designate the amount of moneys deposited annually in the universal service fund to be used to ensure basic telephone service. The amount designated under this paragraph may not exceed \$28 million per year.

(c) The commission may:

(A) Adopt rules to conform the universal service fund to section 254 of the federal Telecommunications Act of 1996 (P.L. 104-104), and to related regulations adopted by the Federal Communications Commission, to the extent that the Public Utility Commission determines conforming the rules is appropriate; and

(B) In addition to using the universal service fund to ensure basic telephone service, use the universal service fund to encourage broadband service availability and to provide support to telecommunications carriers that provide both basic telephone service and broadband service.

(2)(a) The commission shall establish the price a telecommunications utility may charge its customers for basic telephone service. The commission shall periodically review and evaluate the status of telecommunications services in the state and designate the services included in basic telephone service. The commission shall periodically review and adjust as necessary the price a telecommunications utility may charge for basic telephone service.

(b) The provisions of this subsection do not apply to the basic telephone service provided by a telecommunications utility described in ORS 759.040.

(3)(a) The commission shall establish a benchmark for basic telephone service as necessary for the administration and distribution of the universal service fund. The universal service fund shall provide explicit support to an eligible telecommunications carrier that is equal to the difference between the cost of providing basic telephone service and the benchmark, less any explicit compensation received by the telecommunications carrier from federal sources specifically used to recover local loop costs and less any explicit support received by the telecommunications carrier from a federal universal service program.

(b) The commission shall periodically review the benchmark established under paragraph (a) of this subsection and adjust the benchmark as necessary to reflect:

(A) Changes in competition in the telecommunications industry;

(B) Changes in federal universal service support; and

(C) Other relevant factors as determined by the commission.

(c) Except for a telecommunications utility described in ORS 759.040, the commission shall seek to limit the difference between the price a telecommunications utility may charge for basic telephone service and the benchmark.

(4)(a) There is imposed a universal service surcharge on the sale in this state of all:

(A) Retail telecommunications services;

(B) Retail commercial mobile radio services; and

(C) Retail interconnected voice over internet protocol services.

(b) A retail commercial mobile radio service provider shall identify the intrastate revenues subject to the universal service surcharge based on the inverse of the percentage of interstate revenues utilized for purposes of federal universal service contributions or based on any other method approved by the Public Utility Commission. A retail commercial mobile radio service provider may rely upon the sourcing rules set forth in the Mobile Telecommunications Sourcing Act (P.L. 106-252) to identify revenues attributable to Oregon.

(c) A retail interconnected voice over internet protocol service provider may identify, in accordance with federal guidelines, the intrastate revenues subject to the universal service surcharge based on any one of the following:

(A) The inverse of the interstate safe harbor percentage established by the Federal Communications Commission for interconnected voice over internet protocol service for federal universal service contribution purposes, as the interstate safe harbor percentage may be revised from time to time;

(B) A traffic study specific to the interconnected voice over internet protocol service provider that allocates revenues between federal and state jurisdictions; or

(C) Another methodology for accurately apportioning interconnected voice over internet protocol service revenues between federal and state jurisdictions.

(d) For any service provider subject to the universal service surcharge that provides, to multiple locations, shared simultaneous voice channel capacity configured to provide local dial in different states, the revenue subject to the surcharge shall be only the portion of the shared capacity in this state as identified:

(A) By information itemizing, on the billing statements provided to customers, the charges subject to the surcharge, as may be identified by individual end-user location, the total number of end users and the number of end users at each end-user location; or  
(B) If information described in subparagraph (A) of this paragraph does not exist, by the service provider's billing system books and records.

(e) Unless otherwise provided by the Public Utility Commission by rule, the universal service surcharge must be a uniform percentage of the sale of services subject to the surcharge in an amount sufficient to support the purposes of the universal service fund established under subsection (1) of this section, provided that the percentage does not exceed six percent of the sale of services subject to the surcharge.

(f) The universal service surcharge may be listed by a telecommunications carrier as a separate line item in billing statements provided to customers, as prescribed by the commission by rule or order. The commission may not prescribe whether, or the manner by which, a commercial mobile radio services provider or an interconnected voice over internet protocol services provider may list the surcharge in billing statements provided to customers.

(g) A service provider required to collect the universal service surcharge shall:

(A) Transmit amounts collected pursuant to this section to the commission in accordance with a schedule adopted by the commission; and

(B) Provide the commission with information requested by the commission as necessary for the commission to implement this section.

(5) The commission shall deposit moneys transmitted to the commission pursuant to subsection (4) of this section in the universal service fund established under subsection (1) of this section.

(6) The universal service fund established under subsection (1) of this section is separate and distinct from the General Fund. The universal service fund shall consist of all universal service surcharge moneys collected by service providers required to collect the surcharge and transmitted to the commission for deposit in the universal service fund. The universal service fund may be used only for the purposes described in this section and for payment of expenses incurred by the commission or a third party appointed by the commission to administer this section. All moneys in the universal service fund are continuously appropriated to the commission to carry out the provisions of this section. Interest on moneys deposited in the universal service fund shall accrue to the universal service fund.

(7) A pay telephone provider may apply to the commission, on a form developed by the commission, for a refund of the universal service surcharge imposed on the pay telephone provider under subsection (4) of this section for the provision of pay telephone service.

(8) Nothing in this section is intended to grant the commission the authority to impose any requirement or condition, or to exercise any regulatory authority, with respect to commercial mobile radio services or interconnected voice over internet protocol services other than as expressly provided for in this section. (1)(a) Notwithstanding ORS 285A.075 (2), the Oregon Business Development Commission shall approve plans and plan modifications for projects funded by a telecommunications carrier's Telecommunications Infrastructure Account established under ORS 759.405. Projects funded from a telecommunications carrier's Telecommunications Infrastructure Account shall be completed by the carrier and shall be substantially for the benefit of the carrier's customers. Plans approved by the commission must be consistent with the purpose of the fund as described in ORS 759.405. The commission shall give priority to projects that provide increased bandwidth between communities, route diversity and access to advanced telecommunications services in an expedited manner. The commission shall seek to ensure that an approved project is the most technically appropriate means of addressing the circumstances presented in a project plan. The commission shall review recommendations and analysis from the Connecting Oregon Communities Advisory Board established in subsection (2) of this section prior to approving a plan. Project plans may be submitted by local communities including but not limited to local governments, community institutions, citizen groups, public and private educational institutions and business groups.

(b) Under the policies and guidance of the commission, the Oregon Business Development Department shall adopt rules for the submission of project plans by telecommunications carriers and other persons, including criteria for approval of such plans. The rules shall include criteria to determine if the telecommunications carrier reasonably should be expected to make the investment based on an economic analysis of the project. Projects that are determined to meet the criteria but are not economically self-supporting or would not be undertaken in the time frame proposed shall be given priority over similar projects that would be economically self-supporting or likely would be completed in the time frame proposed. The rules shall provide for review of the economic benefits of the proposed plan to the affected community and the potential for the proposed plan to leverage other funding sources including but not limited to federal, state and private sources.

(c) The commission also shall approve expenditures from the Public Access Account of the Connecting Oregon Communities Fund established in ORS 759.445 (4).

(2) There is established within the Oregon Business Development Department the Connecting Oregon Communities Advisory Board consisting of five members appointed by the commission. The commission shall seek advice from the Governor prior to making an appointment to the advisory board.

- (a) Eastern Oregon, including Hood River County;
- (b) Central Oregon;
- (c) Southern Oregon;
- (d) Coastal Oregon; and
- (e) The Willamette Valley.

(4) Employees of the Public Utility Commission, employees of state or local government who are responsible for purchasing telecommunications services or equipment and employees of a telecommunications carrier may not be appointed to the advisory board.

(5) The advisory board shall select one of its members as chairperson and another of its members as vice chairperson, for such terms and with duties and powers necessary for the performance of the functions of those offices as the board determines.

(6) The purpose of the advisory board is to review and make recommendations to the Oregon Business Development Commission for approval of and modifications to projects funded by a telecommunications carrier's Telecommunications Infrastructure Account under this section and ORS 759.405. The advisory board shall seek advice and comment on plans submitted by a telecommunications carrier from affected local communities including but not limited to local governments, citizens and businesses. The advisory board also shall seek advice and comment from state and federal agencies when appropriate to ensure that investments will maximize statewide public benefits and are consistent with the needs and desires of the local communities. The advisory board shall consider the needs of and impact on education, health care, economic development and the delivery of state and local governmental services when evaluating a plan.

(7) The advisory board also shall review proposals submitted to the commission under ORS 759.445 (5) and make recommendations to the commission regarding approval, modification or denial of the proposals.

(8) The advisory board shall make an annual report to the Joint Legislative Committee on Information Management and Technology on the plans and activities funded under ORS 759.405 and 759.445 (5).

(9)(a) Reasonable expenses incurred by the members of the advisory board in the performance of their duties, costs of the Oregon Business Development Department directly related to providing staff to the advisory board and costs to the department for providing technical assistance to local communities shall be paid out of the Telecommunications Infrastructure Accounts created under ORS

759.405.

(b) Following the transfer of funds required under ORS 759.405 (2) and (3), a telecommunications carrier that elects to be subject to regulation under ORS 759.405 and 759.410 shall transfer from the remaining funds in its Telecommunications Infrastructure Account the following amounts to the Oregon Business Development Department to be used for the payment of expenses described in paragraph (a) of this subsection:

- (B) \$325,000 in 2001;
- (C) \$325,000 in 2002; and
- (D) \$325,000 in 2003.

(c) If more than one telecommunications carrier elects to be subject to regulation under ORS 759.405 and 759.410, the funding requirements described in paragraph (b) of this subsection shall be distributed pro rata among the electing carriers. [1999 c.1093 §31]

**Utility RegulationSection 759.450 - Minimum service quality standards; rules; customer impact indices; factors; wholesale services; improvement plan; penalties; exceptions.**

- (1) It is the intent of the Legislative Assembly that every telecommunications carrier and those telecommunications utilities and competitive telecommunications providers that provide wholesale services meet minimum service quality standards on a nondiscriminatory basis.
- (2) The Public Utility Commission shall determine minimum service quality standards that relate to the provision of retail telecommunications services to ensure safe and adequate service. Except as provided in subsections (8) and (9) of this section, minimum service quality standards adopted under this section shall apply to all telecommunications carriers. The commission by rule shall review and revise the minimum service quality standards as necessary to ensure safe and adequate retail telecommunications services.
- (3) The minimum service quality standards for providing retail telecommunications services adopted by the commission shall relate directly to specific customer impact indices including but not limited to held orders, trouble reports, repair intervals and carrier inquiry response times. In adopting minimum service quality standards, the commission shall, for each standard adopted, consider the following:
- (a) General industry practice and achievement;
  - (b) National data for similar standards;
  - (c) Normal operating conditions;
  - (d) The historic purpose for which the telecommunications network was constructed;
  - (e) Technological improvements and trends; and
  - (f) Other factors as determined by the commission.
- (4) Consistent with the federal Telecommunications Act of 1996 (Public Law 104-104), as amended and in effect on September 1, 1999, the commission may establish minimum service quality standards related to providing wholesale, interconnection, transport and termination services provided by a telecommunications carrier and those telecommunications utilities and competitive telecommunications providers that provide wholesale telecommunications services.
- (5) The commission shall require a telecommunications carrier, telecommunications utility or competitive telecommunications provider that is not meeting the minimum service quality standards to submit a plan for improving performance to meet the standards. The commission shall review and approve or disapprove the plan. If the carrier, utility or provider does not meet the goals of its improvement plan within six months or if the plan is disapproved by the commission, penalties may be assessed against the carrier, utility or provider on the basis of the carrier's, utility's or provider's service quality measured against the minimum service quality standards and, if assessed, shall be assessed according to the provisions of ORS 759.990.
- (6) Prior to commencing an action under this section and ORS 759.990, the commission shall allow a telecommunications carrier, telecommunications utility or competitive telecommunications provider an opportunity to demonstrate that a violation of a minimum service quality standard is the result of the failure of a person providing telecommunications interconnection service to meet the person's interconnection obligations.
- (7) Total annual penalties imposed on a telecommunications utility under this section shall not exceed two percent of the utility's gross intrastate revenue from the sale of telecommunications services for the calendar year preceding the year in which the penalties are assessed. Total annual penalties imposed on a competitive telecommunications provider under this section shall not exceed two percent of the provider's gross revenue from the sale of telecommunications services in this state for the calendar year preceding the year in which the penalties are imposed.
- (8) The provisions of this section do not apply to:
- (a) Radio communications service, radio paging service, commercial mobile radio service, personal communications service or cellular communications service; or
  - (b) A cooperative corporation organized under ORS chapter 62 that provides telecommunications services.
- (9) Telecommunications utilities and groups of affiliated telecommunications utilities that serve fewer than 50,000 access lines in Oregon are exempt from any minimum service quality standard adopted under this section that would require the utility or group to measure carrier inquiry response time. [1999 c.1093 §29; 2001 c.95 §1]

**2023 Oregon Revised StatutesVolume : 19 - Utilities, Vehicle Code, Watercraft, AviationChapter 759 - Telecommunications Utility RegulationSection 759.455 - Prohibited acts; commission action on allegation of violation; penalties; judicial review.**

  - (h) Fail to provide a service, product or facility in accordance with applicable contracts, and tariffs and rules of the Public Utility Commission.

    - (B) The commission may prohibit the resale of services the commission has approved for provision to a not-for-profit entity at rates below those offered to the general public.
  - (j) Provide telephone service to a person acting as a telecommunications provider if the commission has ordered the telecommunications utility to discontinue telephone service to the person.

A hearing under this subsection shall be conducted in an expedited manner consistent with the following:
- (a) The complaint shall be served upon the telecommunications carrier and filed with the commission.
  - (b) An answer or other responsive pleading to the complaint shall be filed with the commission not more than 10 days after receipt of the complaint. Copies of the answer or responsive pleading shall be served upon the complainant and upon the commission.
  - (c) A prehearing conference shall be held not later than 15 days after the complaint is filed. Hearing on the complaint shall commence not later than 30 days after the complaint is filed. If the violation continues beyond the time period specified in the commission's order, the commission on its own motion or upon the motion of an interested party may seek penalties as provided in ORS 759.990 or otherwise may seek enforcement under ORS 756.160 or 756.180, or both.
  - (4) Total annual penalties imposed on a telecommunications utility under this section and ORS 759.450 shall not exceed two percent of the utility's gross intrastate revenue from the sale of telecommunications services for the year preceding the year in which the violation occurred.
  - (5) An order of the commission under this section is subject to judicial review in the manner provided by ORS 756.610.
  - (6) The Court of Appeals shall give proceedings brought before the court under this section priority over all other matters before the court. [1999 c.1093 §38; 2005 c.638 §17; 2017 c.312 §11]

The commission shall determine how the costs of serving the customers are allocated so that the telecommunications utility, cooperative corporation or municipality will be allowed an opportunity to recover reasonable and prudent costs that exceed the costs that would have been incurred to initially construct or acquire facilities to serve customers of the territory. The determination of cost allocation by the commission must also divide the costs allowed equitably among all customers of the territory to which service is being reinstated. [2005 c.232 §26; 2009 c.124 §1]

- (b) "Contract" means an agreement between an operator service provider and a call aggregator to automatically connect users of telephones to the operator service provider when certain operator-assisted long distance calls are made.
- (c) "Operator service" includes but is not limited to billing or completion of third-number, person-to-person, collect or credit card calls.
- (d) "Operator service provider" means a person who furnishes operator service under contract with a call aggregator.

(2) Each operator service provider shall:

- (4) Neither the operator service provider nor the call aggregator shall block or prevent a telephone user's access to the user's operator service provider of choice. In order to prevent fraudulent use of its services, an operator service provider or a call aggregator may block access if the provider obtains a waiver for such purpose from the Public Utility Commission.

**2023 Oregon Revised Statutes Volume : 19 - Utilities, Vehicle Code, Watercraft, Aviation Chapter 759 - Telecommunications Utility Regulation Section 759.685 - Surcharge assessed on retail telecommunications subscribers; rules.**

(1)(a) In order to fund the program described in ORS 759.693 to 759.698, the Public Utility Commission shall develop and implement a system for assessing a surcharge in an amount not to exceed 35 cents per month against each paying retail subscriber who has telecommunications service, or who has interconnected voice over internet protocol service, with access to a telecommunications relay service. The commission shall apply the surcharge on a telecommunications circuit designated for a particular subscriber. One subscriber line must be counted for each circuit that is capable of generating usage on the line side of the switched network regardless of the quantity of customer premises equipment connected to each circuit. For providers of central office based services, the surcharge must be applied to each line that has unrestricted connection to the telecommunications relay service or, for lines that have restricted access to the telecommunications relay service, on the basis of software design. For cellular, wireless or other radio common carriers, the surcharge must be applied on a per instrument basis and only to subscribers whose place of primary use, as defined and determined under 4 U.S.C. 116 to 126, is within this state.

(b) For purposes of this subsection, the commission shall adopt by rule the definition for "interconnected voice over internet protocol service." The rule defining "interconnected voice over internet protocol service" must be consistent with the definition for "interconnected VoIP service" in 47 C.F.R. 9.3.

(2) The surcharge imposed by subsection (1) of this section does not apply to:

- (a) Services upon which the state is prohibited from imposing the surcharge by the Constitution or laws of the United States or the Constitution or laws of the State of Oregon.
- (b) Interconnection between telecommunications utilities, telecommunications cooperatives, competitive telecommunications services providers certified under ORS 759.020, radio common carriers and interexchange carriers.

(3) The commission annually shall review the surcharge and the balance in the Residential Service Protection Fund established under ORS 759.687 and may make adjustments to the amount of the surcharge to ensure that the fund has adequate resources,

provided that the fund balance does not exceed six months of projected expenses.

(4) Moneys collected pursuant to the surcharge may not be considered in any proceeding to establish rates for telecommunication service.

(5) The commission shall direct telecommunications public utilities to identify separately in bills to customers for service the surcharge imposed under this section.

(6) Notwithstanding ORS 314.835 and 314.840, the Department of Revenue may disclose information received under ORS 403.200 to 403.230 to the commission to carry out the provisions of ORS 759.693 to 759.698.

(7) The commission may disclose information obtained pursuant to ORS 759.693 to 759.698 to the department to administer the tax imposed under ORS 403.200 to 403.230. [1987 c.290 §7; 1991 c.622 §2; 1991 c.872 §8; 1993 c.231 §1; 1995 c.79 §387; 1995 c.451 §1; 2001 c.408 §2; 2011 c.78 §1; 2017 c.237 §1; 2017 c.434 §3]

**2023 Oregon Revised Statutes Volume : 19 - Utilities, Vehicle Code, Watercraft, Aviation Chapter 759 - Telecommunications Utility Regulation Section 759.687 - Residential Service Protection Fund.**

The Residential Service Protection Fund is established in the State Treasury, separate and distinct from the General Fund. Interest earned by moneys in the fund shall be credited to the fund. All moneys in the fund are appropriated to the Public Utility Commission to carry out the provisions of chapter 290, Oregon Laws 1987. [1987 c.290 §8; 1989 c.966 §74; 1991 c.622 §3; 1991 c.872 §1; 1993 c.231 §2]

Note:

Sections 2 to 6 and 16, chapter 290, Oregon Laws 1987, provide:

Sec. 2.

The Legislative Assembly declares that it is the policy of this state to assure that adequate, affordable residential telecommunication service is available to all citizens of this state. [1987 c.290 §2]

Sec. 3.

In carrying out the provisions of section 2 of this 1987 Act, the Public Utility Commission may require telecommunications public utilities to assure that time payment plans for deposits and installation charges or such other options as may be appropriate for a particular telecommunications public utility are made available. [1987 c.290 §3]

Sec. 4.

In carrying out the provisions of section 2 of this 1987 Act the Public Utility Commission may:

(1) Notwithstanding ORS 757.310, approve a different rate for local exchange residential telecommunication service for low income customers than the rate charged to other residential customers. However, any such rate is subject to all other provisions of this chapter [ORS chapter 759].

(2) Establish plans, or require telecommunications public utilities to establish plans, to educate customers regarding the options available for obtaining telecommunication services. [1987 c.290 §4]

Sec. 5.

(1) In carrying out the provisions of section 2, chapter 290, Oregon Laws 1987, the Public Utility Commission shall establish rules to prohibit the termination of local exchange residential service when such termination would significantly endanger the physical health of the residential customer.

(2) The commission shall provide by rule a method for determining when the termination of local exchange residential service would significantly endanger the physical health of the residential customer.

(3)(a) The commission shall require that each telecommunications public utility:

(A) Accept medical statements by licensed physicians, naturopathic physicians and licensed nurse practitioners as sufficient evidence of significant endangerment of health; and

(B) Establish procedures for submitting and receiving such medical statements.

(b) A medical statement submitted under this subsection shall be valid for such period as the commission, by rule, may prescribe.

(4) Rules adopted by the commission pursuant to this section shall not apply to telecommunication service other than local exchange residential service.

(5) A customer submitting a medical certificate as provided in this section is not excused from paying for telecommunication service. Customers are required to enter into a time payment agreement with the utility if an overdue balance exists. Local exchange service is subject to termination if a customer refuses to enter into or fails to abide by terms of a payment agreement.

(6) Nothing in this section prevents the termination of local exchange residential service if the telecommunications public utility providing the service does not have the technical ability to terminate toll telecommunication service without also terminating local exchange telecommunication service. [1987 c.290 §5; 2017 c.356 §104]

Sec. 6.

(1) In carrying out the provisions of section 2, chapter 290, Oregon Laws 1987, and to support broadband internet access service, the Public Utility Commission shall establish a plan to provide assistance to low income customers through differential rates or otherwise. The plan of assistance may be in addition to the available funding offered by the Federal Communications Commission. The plan established by the Public Utility Commission shall prescribe the amount of assistance to be provided and the time and manner of payment.

(2) For the purpose of establishing a plan to provide assistance to low income customers under this section, the commission shall

require all public utilities, cooperative corporations and unincorporated associations providing local exchange telecommunication service to participate in the plan, except as provided in subsection (3) of this section.

(3) In lieu of participation in the commission's plan to assist low income customers, a public utility, cooperative corporation or unincorporated association providing local exchange telecommunication service may apply to the commission to establish an alternative plan for the purposes of carrying out the provisions of section 2, chapter 290, Oregon Laws 1987, and supporting broadband internet access service for its own customers. The commission shall adopt standards for determining the adequacy of alternative plans.

(4) The commission may contract with any governmental agency to assist the commission in the administration of any assistance plan adopted pursuant to this section.

(5) As used in sections 2 to 6, chapter 290, Oregon Laws 1987, "low income customer" has the meaning given that term by the commission by rule. [1987 c.290 §6; 1991 c.622 §1; 2007 c.29 §1; 2009 c.599 §25; 2011 c.77 §1; 2013 c.29 §1; 2019 c.91 §1; 2021 c.66 §1]

Sec. 16.

(1) Sections 1, 2, 3, 4 and 15, chapter 290, Oregon Laws 1987, are repealed on January 1, 2030.

(2) Section 5, chapter 290, Oregon Laws 1987, as amended by section 104, chapter 356, Oregon Laws 2017, is repealed on January 1, 2030.

(4) Section 2, chapter 204, Oregon Laws 2005, as amended by section 359, chapter 70, Oregon Laws 2007, is repealed on January 1, 2030. [1987 c.290 §16; 1991 c.622 §4; 1997 c.481 §1; 2001 c.408 §1; 2009 c.544 §1; 2017 c.434 §4; 2021 c.66 §2]

Note:

Sections 1 and 2, chapter 204, Oregon Laws 2005, provide:

Sec. 1.

Section 2 of this 2005 Act is added to and made a part of sections 2 to 6, chapter 290, Oregon Laws 1987. [2005 c.204 §1]

Sec. 2.

(1) In carrying out the provisions of section 2, chapter 290, Oregon Laws 1987, the Public Utility Commission shall adopt rules to prohibit the termination of local exchange residential service if the termination would significantly endanger a customer, or a person in the household of the customer, who is:

(a) At risk of domestic violence, as defined in ORS 135.230;

(b) At risk of unwanted sexual contact, as defined in ORS 163.305;

(d) An elderly person, as defined in ORS 124.005, who is at risk of abuse, as defined in ORS 124.005 (1)(a), (d) or (e); or

(e) A victim of stalking, as described in ORS 163.732.

(2) A customer may establish that termination of local exchange residential service would significantly endanger the customer, or a person in the household of the customer, by providing a telecommunications public utility with an affidavit signed by the customer stating that termination would place the customer, or a person in the household of the customer, at significant risk of domestic violence, as defined in ORS 135.230, or of unwanted sexual contact, as defined in ORS 163.305. The customer must attach to the affidavit a copy of an order issued under ORS 30.866, 107.700 to 107.735, 124.005 to 124.040 or 163.738 that restrains another person from contact with the customer, or a person in the household of the customer, or a copy of any other court order that restrains another person from contact with the customer, or a person in the household of the customer, by reason of a risk described in subsection (1) of this section or by reason of stalking.

(3) The commission shall require that each telecommunications public utility establish procedures for submitting and receiving affidavits under subsection (2) of this section.

(4) This section does not apply to termination of any telecommunication service other than local exchange residential service.

(5) A customer submitting an affidavit as provided by subsection (2) of this section is not excused from paying for telecommunication service. Customers are required to enter into a reasonable payment agreement with the telecommunications public utility if an overdue balance exists. Local exchange residential service may be terminated if a customer refuses to enter into or fails to abide by the terms of a reasonable payment agreement.

(6) Nothing in this section prevents the termination of local exchange residential service if the telecommunications public utility providing the service does not have the technical ability to terminate toll telecommunication service without also terminating local exchange residential service. **2023 Oregon Revised Statutes Volume : 19 - Utilities, Vehicle Code, Watercraft, Aviation Chapter 759 - Telecommunications Utility Regulation Section 759.694 - Legislative recognition of need.**

It is recognized that a large number of people in this state, through no fault of their own, are unable to utilize telecommunication equipment due to the inability to hear or speak well enough or due to other disabilities. It is also recognized that present technology and services are available, but at significant cost, that would allow these people to utilize telecommunication equipment in their daily activities. There is, therefore, a need to make available the technology and services in the form of assistive telecommunication devices, a telecommunications relay service and communication facilitators for people who are deaf, deaf-blind, hard of hearing or speech impaired or adaptive equipment for people with disabilities at no additional cost beyond normal telephone service. The provision of assistive telecommunication devices, a telecommunications relay service, communication facilitators or adaptive equipment would allow those formerly unable to use telecommunication systems to more fully participate in the activities and programs offered by government and other community agencies, as well as in their family and social activities. The assistive telecommunication devices or adaptive equipment would be provided on a loan basis to each recipient, to be returned if the recipient moves out of the state. - (2) With the advice of the Telecommunication Devices Access Program Advisory Committee, the Public Utility Commission shall establish and administer a statewide program to purchase and distribute adaptive equipment to make telephone service generally available to persons with physical disabilities. (2) To accomplish the stimulation and preservation of maritime commerce it is necessary to establish an optional rate system whereby vessels and persons engaging the services of a licensee have the option of:

(a) Agreeing not to assert any personal liability against any licensee, trainee and organization of pilots to which the licensee or trainee belongs, and to defend, indemnify and save harmless the licensee, trainee and organization of pilots against all claims and demands arising from acts or omissions of the licensee, trainee or organization of pilots which relate, directly or indirectly, to

pilotage of the vessel; or

(b) Directing licensees in writing and in sufficient time for insurance to be procured by them, on a "trip" basis, insuring such licensees, trainees and organizations of pilots to which they belong against all claims or demands arising from or relating to, directly or indirectly, pilotage of the vessel, the premium or cost of such insurance to be included in the charges for pilotage services and paid on demand by the vessel.

(3) The Legislative Assembly hereby declares that to effect the ends and purposes listed in this section, and to maintain pilotage fees at reasonable levels on the bar and river pilotage grounds of this state, ORS 776.520, 776.530 and 776.540 are adopted. **2023 Oregon Revised Statutes Volume : 19 - Utilities, Vehicle Code, Watercraft, Aviation Chapter 776 - Maritime Pilots and Pilotage Section 776.520 - Tariffs limiting liability of licensees, trainees or organizations.**

Licensees and trainees are authorized to limit their liability and the liability of any organization of pilots to which they belong by tariffs approved by the Oregon Board of Maritime Pilots containing substantially the terms and provisions of the following form:

---

The provisions of ORS 776.510 and 776.540 hereby are incorporated into and made a part of this tariff. By reason of the option granted by ORS 776.510, the rates and charges named in this tariff do not include the cost of marine insurance insuring the licensee, trainee and any organization of pilots to which the licensee or trainee belongs, the vessel, its owners, agents or operators from the consequences of negligence or errors in judgment of the licensees, trainees or organizations of pilots.

However, upon reasonable notice to the licensees in writing from the vessel, its master, owners, agents or operators, the licensees parties hereto will procure such insurance on a "trip" basis in an amount equal to the value of the vessel and its cargo, or such other amount as may be agreed upon between the licensees and the vessel, its master, owners, agents or operators, insuring the licensees and the organizations of pilots to which they belong against all claims or demands arising from or based upon, directly or indirectly, pilotage of the vessel. The premium for such insurance shall be assessed in addition to the rates and charges specified herein.

The election of the vessel, its master, owners, agents or operators not to request licensees parties hereto to procure such insurance and thereby to elect to have the licensees parties hereto perform services on the rates and charges specified herein shall constitute a binding and irrevocable agreement on the part of the vessel, its master, owners, agents or operators to the terms and conditions of the following:

It is understood and agreed, and is the essence of the contract under which services of the licensee are tendered to and accepted by the vessel, its master, operators and owners, that:

(1) The services rendered hereunder are rendered by a licensee;

(2) The services of any individual licensee have been voluntarily accepted and are voluntarily rendered pursuant to the election authorized by ORS 776.510;

(3) Such services are advisory in nature only, the master of the vessel remaining at all times in full command of the vessel and empowered to relieve the licensee of duties;

(4) The services of the licensee and, if applicable, trainee are accepted on the express understanding that when the licensee and trainee go aboard the vessel the licensee and trainee become the servants of the vessel and its owners and operators. Except as to such personal liability and rights over as may arise by reason of the willful misconduct or gross negligence of the licensee or trainee, the master, owners and operators of the vessel expressly covenant and agree:

(a) Not to assert directly or indirectly, any personal liability against the licensee, trainee, any organization of pilots to which the licensee or trainee belongs, and any members of such organization;

(b) Not to respond in damage (including any rights over) arising out of or connected with, directly or indirectly, any damage, loss or expense sustained by the vessel, its master, owners, operators and crew, and any third parties (including cargo), even though resulting from acts or omissions of any organization of pilots to which the licensee or trainee belongs, from acts or omissions of its members, or any acts or omissions of the licensee or trainee; and

(c) To defend, indemnify and hold harmless the licensee, trainee, any organization of pilots to which the licensee or trainee belongs, and any members of such organization, from any claims whatsoever for damages, loss or expense arising out of, or connected with any acts or omissions of the licensee, trainee or organization of pilots which relate, directly or indirectly, to pilotage of the vessel;

(5) The master, owners and operators of the vessel shall not be liable to indemnify and hold harmless the licensee, trainee and any organization of pilots to an extent greater than the amount to which the liability of the vessel, its owners and operators, is limited by reason of contract, bill of lading or statute, including but not limited to, the Limitation of Liability Act (46 U.S.C. 181-189), the Harter Act (46 U.S.C. 190-195), the Carriage of Goods by Sea Act (46 U.S.C. 1300-1315), and the Federal Water Pollution Control Act (33 U.S.C. 1321); and

(6) The fees charged for the services rendered by the licensee and trainee have been computed and are assessed in accordance with and based upon the above stipulations.

(2) This section does not authorize a port to enter into the business of supplying electric energy or services, or other power service, to municipalities or to the public, or for any purpose other than the construction or operation of docks, terminals, elevators or other shipping facilities, or in any of the work ports are authorized by law to engage in.

(3) Notwithstanding subsections (1) and (2) of this section, a port may construct, acquire, own or operate, by itself or with other public or private entities, electrical generating plants, electric distribution facilities and related fuel supply and steam generation and distribution facilities. However, the electric output of such plants or systems shall not be sold or delivered, directly or indirectly, to any person or other entity located within this state other than:

(5) Except as provided in subsection (6) of this section, natural gas used to fuel the generation of electricity or energy by any port as described in subsection (3) of this section shall be purchased from or transported by an entity, if any, that is a public utility as defined in ORS 757.005 and approved by the Public Utility Commission under ORS 758.400 to 758.475 to distribute natural gas in the service territory in which the port is located.

including as a part of such development provisions for water, sewage, drainage, roads, transportation, power, communication or other similar facilities which are incidental to the development of the site;

(b) Develop the site pursuant to a comprehensive plan in a manner compatible with other uses in the area in which the industrial or research and development park is located and adopt regulations necessary to implement the plan;

A port may, in general, do such other acts and things, not mentioned by ORS 777.195 to 777.258, as tend to promote the maritime shipping, aviation and commercial interests of the port. [1971 c.728 §28 (enacted in lieu of 777.130)]

**2023 Oregon Revised Statutes Volume : 19 - Utilities, Vehicle Code, Watercraft, Aviation Chapter 777 - Ports Generally Section 777.262 - Port dredging activities; legislative findings and purpose.**

(1) The Legislative Assembly finds:

(a) That recent changes in federal law authorize the United States Army Corps of Engineers to require ports and other local communities to provide a portion of the costs of dredging harbors and channels near those communities;

(b) That port districts and communities in this state cannot afford to pay the costs necessary to continue the dredging activities that are essential to keep the major harbors and waterways navigable for larger vessels in maritime trade; and

(c) That the State of Oregon must therefore pay for the dredging activities when ports cannot, or this state must tolerate the loss of maritime trade and commerce that will inevitably result from the halt of dredging activities.

(2) Therefore, it is the purpose of this section and one purpose of ORS 777.267 to provide a method of financing all or part of the nonfederal portion of the costs of dredging activities that constitute new federally authorized navigation improvements in the ports of this state when those ports are unable to finance the activities. [1989 c.1020 §1; 2013 c.621 §3]

Note:

777.262 and 777.267 were enacted into law by the Legislative Assembly but were not added to or made a part of ORS chapter 777 or any series therein by legislative action. See Preface to Oregon Revised Statutes for further explanation.

(b) Paying the study and construction costs of other new navigation improvement projects that directly support, or provide access to, a federally authorized navigation improvement project;

(c) Paying the study and construction costs of maintenance projects related to existing federally authorized navigation improvement projects; and

(c) Bond proceeds deposited in the fund.

(3) Moneys in the fund shall be used primarily to make loans to ports for eligible projects. The authority may award a grant or provide other assistance from moneys in the fund to a port for an eligible project only if a loan is not feasible due to the financial

hardship of the port or other special circumstances, as set forth in rules adopted by the department.

(4) Eligibility for assistance from the Marine Navigation Improvement Fund shall be limited to and funded, subject to the availability of funds, in the following order of priority:

(a) Maintenance projects related to existing federally authorized navigation improvement projects.

(c) New federally authorized navigation improvement projects.

(d) Payment of portions of the cost of maintenance dredging projects undertaken with equipment owned by the State of Oregon at publicly owned ports and marinas.

(5) The authority shall limit financial assistance for construction costs under subsection (1)(a) of this section to those projects that have completed all federally required studies.

(6) The authority shall limit financial assistance for construction costs under subsection (1)(b) of this section to projects sponsored by a port, as defined in ORS 777.005 or 778.005, that meet criteria developed by the authority.

(7) The authority shall limit financial assistance for study costs under subsection (1)(b) of this section to projects that meet criteria developed by the authority.

(8) The authority shall limit financial assistance for study and construction costs under subsection (1)(c) of this section to projects that meet criteria developed by the authority. (1) For the purpose of carrying into effect any of the powers granted to ports, a port may issue and sell revenue bonds in accordance with ORS 777.560 to 777.590 without the necessity of obtaining the prior approval of the electors of the port. Proceeds from the sale of revenue bonds may be used by the port in its governmental capacity or loaned to private parties. The proceeds may be used to cover the costs incurred in issuing the bonds, and preliminary work incident to carrying out such purposes and powers, including but not limited to planning, engineering, inspection, accounting, fiscal, legal and trustee expenses, the cost of issuance of bonds, engraving, printing, advertising and other similar expenses, and to pay interest on the outstanding bonds issued for any project during the period of actual construction and for six months after the completion thereof. Revenue bonds shall not be a general obligation of the port nor a charge upon the tax revenues of the port, nor a charge upon any other revenues or property of the port not specifically pledged thereto.

(2) In addition to the powers granted by subsection (1) of this section, a port may authorize and issue revenue bonds under ORS 287A.150. [1955 c.423 §2; 1959 c.337 §1; 1971 c.728 §86; 1993 c.97 §29; 2007 c.783 §225]

(1) Revenue bonds issued under ORS 777.560 (1) shall be authorized by resolution or ordinance of the board. The resolution or ordinance shall provide for the creation of a special trust fund, authorize the appointment of a trustee to administer the fund, and obligate the port to set aside and pay into the special trust fund all, or a portion, of its nontax-derived revenues not otherwise pledged or committed for other purposes for any activity authorized by ORS 777.105 to 777.258, other than an activity under ORS 777.250 (4)(a) or (c). For a facility or facilities designated under ORS 777.250 (4)(a) or (c), no revenues other than those derived from the particular facility or facilities to be financed by the sale of the particular issue of revenue bonds then being authorized shall be pledged. The board may, in addition, pledge for the payment of the principal and interest of any issue of such bonds any property of the port not pledged for other purposes. However, with respect to revenue bonds issued to finance a facility or facilities designated under ORS 777.250 (4)(a) or (c), the board, in addition, may only pledge or mortgage such facilities including buildings, improvements or properties, and any land acquired in connection with such facilities, for the benefit of the holders of revenue bonds

issued therefor. Notice that action upon the bond resolution or ordinance will be taken at the designated meeting of the board shall be given for a period of not less than two consecutive weeks, prior to the meeting, by publication once each week in a newspaper of general circulation, published within the port or, if there be no such newspaper, in a newspaper of general circulation, published within the county.

(2) A special trust fund created by a resolution or ordinance adopted under subsection (1) of this section shall be used solely for payment of principal and interest due upon the revenue bonds issued and sold pursuant to ORS 777.560 (1), and to the payment of the costs and expenses enumerated in ORS 777.560.

(3) The resolution or ordinance may provide that if the money in the special trust fund is insufficient to pay the revenue bonds the bonds shall be payable out of any part or all of other nontax-derived revenues of the port. However, for a facility or facilities designated under ORS 777.250 (4)(a) or (c), no revenues other than those derived from the particular facility or facilities to be financed by the sale of the particular issue of revenue bonds then being authorized shall be pledged. When all bonds issued and sold pursuant to ORS 777.560 (1) and expenses thereof have been paid so that no charge remains upon the special fund, the board may, by resolution or ordinance, transfer any balance remaining in the fund to its general fund, discharge the trustee and dissolve the special fund. The trustee authorized to administer the fund may, subject to approval of the board, invest and reinvest moneys in the special fund in securities in which the State of Oregon may by law invest.

(4) ORS 777.560 to 777.590 and the provisions of the resolution or ordinance authorizing a revenue bond issue constitute a contract with the holders of the bonds, and shall be enforceable by any owner or holder of the bonds. Whenever all bonds and expenses thereof have been paid so that no charge remains upon such special fund, the board may, by ordinance, transfer any balance remaining in such fund to its general fund, discharge the trustee, if any, and dissolve the special fund. Any trustee authorized to administer the fund, may, subject to approval of the board, invest and reinvest moneys in the special fund in any security or securities in which the State of Oregon may by law invest.

  - (a) Discharges ballast water only at the location where the ballast water originated, if the ballast water is not mixed with ballast water from areas other than open sea waters;
  - (b) Does not discharge ballast water in waters of this state;
  - (c) Traverses only the internal waters of this state;

Ballast water containing oil or noxious liquid substances shall be discharged in accordance with the requirements applicable to those substances.
- (3) Nothing in this section:
  - (a) Requires an open sea or coastal exchange if the owner or operator in charge of a vessel determines that performing an open sea or coastal exchange would threaten the safety or stability of the vessel or the safety of the vessel's crew or passengers because of any extraordinary condition, including but not limited to adverse weather, vessel design limitations or equipment failure.

- (1) Except as authorized by this section, the discharge of ballast water in the waters of this state is prohibited.
- (2) An owner or operator of a vessel may discharge ballast water in the waters of this state:
  - (a) If the owner or operator has conducted a complete open sea or coastal exchange of ballast water prior to entering the waters of this state. The open sea or coastal exchange must be performed using either of the following methods:
    - (A) Flow-through exchange. A flow-through exchange occurs when an amount of ocean water equal to or exceeding three times the capacity of the vessel's ballast tank is pumped into an opening in the ballast tank while the existing ballast water is discharged through another opening.
    - (B) An empty and refill exchange. An empty and refill exchange occurs when a ballast tank is pumped empty to the point that the pump loses suction and then is refilled with ocean water.
  - (b) Without performing an open sea exchange or a coastal exchange of ballast water if:
    - (A)(i) The owner or operator reasonably believes that an exchange would threaten the safety of the vessel; or
    - (ii) The exchange is not feasible due to vessel design limitations or equipment failure; and

- (B) The vessel discharges only the amount of ballast water that is operationally necessary.
- (c) If the ballast water is discharged in a manner consistent with standards and procedures adopted by the Environmental Quality Commission under subsection (4) of this section.
- (3) An owner or operator who discharges ballast water in the waters of this state under subsection (2)(b) of this section is subject to the reporting requirements under ORS 783.640.
- (4)(a) The Environmental Quality Commission may adopt by rule standards and procedures that the commission considers necessary to carry out the provisions of ORS 783.625 to 783.640. The standards and procedures must minimize the risk of introducing aquatic invasive species into the waters of this state and must be based on the availability of treatment technology. Rules adopted under this subsection include, but are not limited to:
  - (A) Standards for the discharge of ballast water into the waters of this state and appropriate timelines for the implementation of the standards. In adopting the standards, the commission shall consider the extent to which treatment technology is feasible, practicable and commercially available, or expected to be available, by the proposed implementation timelines.
  - (B) Emergency response procedures for managing high-risk ballast water. The rules must define high-risk ballast water in light of the source of the water and other applicable factors. The procedures must establish notification and consultation requirements, as well as feasible alternative ballast water management strategies.
  - (C) Procedures for implementing alternative ballast water management strategies for the exemptions specified in subsection (2)(b) of this section.
  - (D) Procedures for implementing alternative ballast water management strategies for vessels with empty ballast tanks that enter the waters of this state.

(9) The provisions of the vehicle code described in this subsection relating to the operation of vehicles refer exclusively to operation of vehicles upon highways and the ocean shore which has been or may hereafter be declared to be a state recreation area, except where the vehicle code specifically provides otherwise. This subsection applies to the provisions of the vehicle code relating to abandoned vehicles, vehicle equipment, regulation of vehicle size, weight and load, the manner of operation of vehicles and use of roads by persons, animals and vehicles.

(10) All reciprocity and proportional registration agreements, arrangements and declarations relating to vehicles, in force and effect on August 22, 1969, shall continue in force and effect until specifically amended or revoked as provided by law or by such arrangements or agreements.

(11) It is hereby declared to be the policy of this state:

(a) To provide maximum safety for all persons who travel or otherwise use the public highways of this state;

(c) To discourage repetition of criminal acts by individuals against the peace and dignity of the state and its political subdivisions and to impose increased and added deprivation of the privilege to operate motor vehicles upon habitual offenders who have been convicted repeatedly of violations of traffic laws.

**2023 Oregon Revised Statutes Volume : 19 - Utilities, Vehicle Code, Watercraft, Aviation Chapter 801 - General Provisions and Definitions for Oregon Vehicle Code Section 801.040 - Authority to adopt special provisions.**

This section describes circumstances where special provisions are made concerning the authority of cities, counties or other political subdivisions in relation to some portion of the vehicle code. This section is not the only section of the vehicle code that applies to such authority and shall not be interpreted to affect the vehicle code except as specifically provided in this section. The following limits are partial or complete as described:

(1) No county, municipal or other local body with authority to adopt and administer local police regulations under the Constitution and laws of this state shall enact or enforce any rule or regulation in conflict with the provisions of the vehicle code described in this subsection except as specifically authorized in the vehicle code. This subsection applies to the provisions of the vehicle code relating to abandoned vehicles, vehicle equipment, regulation of vehicle size, weight and load, the manner of operation of vehicles and use of roads by persons, animals and vehicles.

(2) Except as provided in ORS 822.230 and this subsection, no city, county or other political subdivisions shall regulate or require or issue any registration, licenses, permits or surety bonds or charge any fee for the regulatory or surety registration of any person required to obtain a certificate from the Department of Transportation under ORS 822.205. This subsection does not:

(a) Limit any authority of a city or county to license and collect a general and nondiscriminatory license fee levied upon all businesses or to levy a tax based upon business conducted by any person within the city or county.

(b) Limit the authority of any city or county to impose any requirements or conditions as part of any contract to perform towing or recovering services for the city or county.

(c) Limit the authority of any city or county to impose requirements and conditions that govern the towing of a vehicle by a towing business under ORS 98.812 so long as those requirements and conditions are consistent with the provisions of ORS 822.230.

(3) No city, county or other political subdivision of this state, nor any state agency, may adopt a regulation or ordinance that imposes a special fee for the use of public lands or waters by snowmobiles or Class I all-terrain vehicles, or for the use of any access thereto that is owned by or under the jurisdiction of either the United States, this state or any such city, county or other political subdivision. The registration fees provided by ORS 821.320 are in lieu of any personal property or excise tax imposed on snowmobiles by this state or any political subdivision. No city, county or other municipality, and no state agency shall impose any other registration or license fee on any snowmobile in this state. This subsection does not prohibit any city, county or other political subdivision, or any state agency from regulating the operation of snowmobiles or Class I all-terrain vehicles on public lands, waters and other properties under its jurisdiction and on streets or highways within its boundaries by adopting regulations or ordinances of its governing body if such regulations are not inconsistent with ORS 821.150 to 821.292.

(4) The provisions of ORS 819.110 to 819.215 relating to towing of vehicles that are abandoned establish minimum requirements subject to the following:

(a) Notwithstanding paragraph (b) of this subsection, a county or incorporated city may supersede such provisions by ordinance or

charter provision.

(b) Any road authority described under ORS 810.010 may adopt rules or procedures that do not conflict with such provisions to provide for additional protection for the owner or person with an interest in a vehicle subject to such provisions or that more quickly accomplish the procedures established under such provisions.

(5) Any incorporated city may by ordinance require that the driver of a vehicle involved in an accident file with a designated city department a copy of any report required to be filed under ORS 811.725. All such reports shall be for the confidential use of the city department but subject to the same requirements for release of such reports as provided for the release of such reports by the department under ORS 802.220 and 802.240.

(6) Except as otherwise specifically provided in this section, in accordance with the provisions of ORS 801.041, the governing body of a county may establish by ordinance registration fees for vehicles registered at a residence or business address within the county.

(7) Except as otherwise specifically provided in this section, in accordance with the provisions of ORS 801.042, the governing body of a district may establish by ordinance registration fees for vehicles registered at a residence or business address within the district. [1983 c.338 §8; 1985 c.16 §7; 1985 c.171 §2; 1985 c.459 §2a; 1987 c.765 §3; 1989 c.864 §3; 1989 c.991 §22; 1995 c.758 §5; 1995 c.774 §6; 1999 c.977 §13; 2009 c.371 §1]

**2023 Oregon Revised Statutes Volume : 19 - Utilities, Vehicle Code, Watercraft, Aviation Chapter 801 - General Provisions and Definitions for Oregon Vehicle Code Section 801.041 - Terms and conditions for imposition of registration fee by county; rules.**

The following apply to the authority granted to counties by ORS 801.040 to establish registration fees for vehicles:

(1) An ordinance establishing registration fees under this section must be enacted by the county imposing the registration fee and filed with the Department of Transportation. Notwithstanding ORS 203.055 or any provision of a county charter, the governing body of a county with a population of 350,000 or more may enact an ordinance establishing registration fees. The governing body of a county with a population of less than 350,000 may enact an ordinance establishing registration fees after submitting the ordinance to the electors of the county for their approval. The governing body of the county imposing the registration fee shall enter into an intergovernmental agreement under ORS 190.010 with the department by which the department shall collect the registration fees, pay them over to the county and, if necessary, allow the credit or credits described in ORS 803.445 (5). The intergovernmental agreement must state the date on which the department shall begin collecting registration fees for the county.

(2) The authority granted by this section allows the establishment of registration fees in addition to those described in ORS 803.420 and 803.422. There is no authority under this section to affect registration periods, qualifications, cards, plates, requirements or any other provision relating to vehicle registration under the vehicle code.

(3) Except as otherwise provided for in this subsection, when registration fees are imposed under this section, they must be imposed on all vehicle classes. Registration fees as provided under this section may not be imposed on the following:

(a) Snowmobiles and Class I all-terrain vehicles.

(b) Fixed load vehicles.

(c) Vehicles registered under ORS 805.100 to disabled veterans.

(d) Vehicles registered as antique vehicles under ORS 805.010.

(e) Vehicles registered as vehicles of special interest under ORS 805.020.

(g) School buses or school activity vehicles registered under ORS 805.050.

(h) Law enforcement undercover vehicles registered under ORS 805.060.

(i) Vehicles registered on a proportional basis for interstate operation.

(j) Vehicles with a registration weight of 26,001 pounds or more described in ORS 803.420 (14)(a) or (b).

(k) Vehicles registered as farm vehicles under the provisions of ORS 805.300.

(L) Travel trailers, campers and motor homes.

(m) Vehicles registered to an employment address as provided in ORS 802.250 when the eligible public employee or household member's residence address is not within the county of the employment address. The department may adopt rules it considers necessary for the administration of this paragraph.

(n) Vehicles registered under ORS 805.110 to former prisoners of war.

The intergovernmental agreement must state the registration fees and, if necessary, how the revenue from the fees shall be apportioned among counties and the districts. Before the governing body of a county can enter into such an intergovernmental agreement, the county shall consult with the cities in its jurisdiction.

(2) If a district raises revenues from a registration fee for purposes related to highways, roads, streets and roadside rest areas, the governing body of that district shall establish a Regional Arterial Fund and shall deposit in the Regional Arterial Fund all such registration fees.

The intergovernmental agreement must state the date on which the department shall begin collecting registration fees for the district.

(6) The authority granted by this section allows the establishment of registration fees in addition to those described in ORS 803.420 and 803.422. **2023 Oregon Revised Statutes Volume : 19 - Utilities, Vehicle Code, Watercraft, Aviation Chapter 802 - Administrative Provisions Section 802.530 - Authority of department for reciprocal agreements concerning traffic offenses; permitted provisions; fees; limitations; rules; report.**

The Department of Transportation is authorized to enter into bilateral or multilateral reciprocal agreements with other jurisdictions to provide mutual assistance in the disposition of traffic offenses committed by residents of one jurisdiction while in another jurisdiction. Agreements authorized by this section are subject to the following:

(1) An agreement may provide for the sharing of information between and among jurisdictions concerning driving records, vehicle registration records and records concerning the granting, denial, revocation or suspension of driving privileges.

(2) An agreement may provide that a jurisdiction will suspend the driving privileges of a resident of the jurisdiction if the resident does not comply with the requirements and responsibilities created by citation for or conviction of a traffic offense in another jurisdiction.

(3) An agreement may provide that a jurisdiction will refuse to issue or renew a driver license or permit or to issue a duplicate or replacement license or permit for a resident of the jurisdiction if the resident does not comply with the requirements and responsibilities created by citation for or conviction of a traffic offense in another jurisdiction.

(4) An agreement may be limited to certain traffic offenses.

(5) An agreement may provide for the establishment of fees for and collection of fees from persons cited for traffic offenses or convicted of traffic offenses who are subject to the terms of the agreement. Any agency of this state that participates in a program established by an agreement authorized by this section is granted authority to establish fees for and collect fees from persons subject to an agreement. Fees established for purposes of this subsection must be established by rule. No fee established for purposes of this subsection may exceed an amount necessary to recover the actual cost incurred by participation in the program established by the agreement.

(6) An agreement may provide that residents of one jurisdiction who are issued citations for traffic offenses in another jurisdiction will be released on recognizance without requirement of security deposit or bail. Nothing in this subsection authorizes an agreement that prohibits a court from releasing on security release, as defined in ORS 135.230, a person charged with a traffic crime.

(7) An agreement may provide that one jurisdiction will act as agent for another jurisdiction in the disposition of traffic offenses committed in the other jurisdiction. No provision described under this subsection may be established that requires the participation of courts of this state unless the Oregon Supreme Court establishes rules under ORS 1.002 to provide procedures for court participation.

(8) No agreement may be established under this section to provide for assistance in dealing with:

(a) Offenses other than traffic offenses.

(b) Parking offenses.

(c) Bicycle offenses.

(d) Pedestrian offenses.

(9) Any agreement established under this section must provide that this state may withdraw from the agreement upon notice of not more than 90 days.

(10) An agreement may include any other provision that the department determines will assist in the disposition of traffic offenses committed by residents of one jurisdiction while in another jurisdiction or will increase the convenience for residents of this state in complying with requirements and responsibilities created by citation for or conviction of a traffic offense in another jurisdiction.

(11) The department may adopt rules necessary to implement any agreement established under this section.

(12) The department must submit a report on any agreement proposed under this section to the presiding officers of each house of the Oregon Legislative Assembly at least 30 days before the agreement may take effect. An agreement described under this section cannot take effect in this state unless the department complies with this subsection. [1985 c.396 §2; 1993 c.102 §1; 1999 c.1051 §85]

**2023 Oregon Revised Statutes Volume : 19 - Utilities, Vehicle Code, Watercraft, Aviation Chapter 802 - Administrative Provisions Section 802.540 - Driver License Compact.**

The Driver License Compact is enacted into law and entered into on behalf of this state with all other states legally joining therein in

a form substantially as follows:

---

ARTICLE I  
FINDINGS AND DECLARATION  
OF POLICY

(a) The party states find that:

- (1) The safety of their streets and highways is materially affected by the degree of compliance with state laws and local ordinances relating to the operation of motor vehicles.
- (2) Violation of such a law or ordinance is evidence that the violator engages in conduct which is likely to endanger the safety of persons and property.
- (3) The continuance in force of a license to drive is predicated upon compliance with laws and ordinances relating to the operation of motor vehicles, in whichever jurisdiction the vehicle is operated.

(b) It is the policy of each of the party states to:

- (1) Promote compliance with the laws, ordinances, and administrative rules and regulations relating to the operation of motor vehicles by their operators in each of the jurisdictions where such operators drive motor vehicles.
- (2) Make the reciprocal recognition of licenses to drive and eligibility therefor more just and equitable by considering the overall compliance with motor vehicle laws, ordinances and administrative rules and regulations as a condition precedent to the continuance or issuance of any license by reason of which the licensee is authorized or permitted to operate a motor vehicle in any of the party states.

ARTICLE II  
DEFINITIONS

As used in this compact:

- (a) "State" means a state, territory or possession of the United States, the District of Columbia, or the Commonwealth of Puerto Rico.
- (b) "Home state" means the state which has issued and has the power to suspend or revoke the use of the license or permit to operate a motor vehicle.
- (c) "Conviction" means a conviction of any offense related to the use or operation of a motor vehicle which is prohibited by state law, municipal ordinance or administrative rule or regulation, or a forfeiture of bail, bond or other security deposited to secure appearance by a person charged with having committed any such offense, and which conviction or forfeiture is required to be reported to the licensing authority.

ARTICLE III  
REPORTS OF CONVICTION

The licensing authority of a party state shall report each conviction of a person from another party state occurring within its jurisdiction to the licensing authority of the home state of the licensee. Such report shall clearly identify the person convicted; describe the violation specifying the section of the statute, code or ordinance violated; identify the court in which action was taken; indicate whether a plea of guilty or not guilty was entered, or the conviction was a result of the forfeiture of bail, bond or other security; and shall include any special findings made in connection therewith.

ARTICLE IV  
EFFECT OF CONVICTION

- (a) The licensing authority in the home state, for the purposes of suspension, revocation or limitation of the license to operate a motor vehicle, shall give the same effect to the conduct reported, pursuant to Article III of this compact, as it would if such conduct had occurred in the home state, in the case of convictions for:
  - (1) Manslaughter or negligent homicide resulting from the operation of a motor vehicle;
  - (2) Driving a motor vehicle while under the influence of intoxicating liquor or a narcotic drug or a controlled substance, or under the influence of any other drug or substance to a degree which renders the driver incapable of safely driving a motor vehicle;
  - (3) Any felony in the commission of which a motor vehicle is used;
  - (4) Failure to stop and render aid in the event of a motor vehicle accident resulting in the death or personal injury of another.
- (b) As to other convictions, reported pursuant to Article III, the licensing authority in the home state shall give such effect to the conduct as is provided by the laws of the home state.
- (c) If the laws of a party state do not provide for offenses or violations denominated or described in precisely the words employed in subdivision (a) of this Article, such party state shall construe the denominations and descriptions appearing in subdivision (a) hereof as being applicable to and identifying those offenses or violations of a substantially similar nature and the laws of such party state shall contain such provisions as may be necessary to insure that full force and effect is given to this Article.

ARTICLE V  
APPLICATIONS FOR NEW LICENSES

Upon application for a license to drive, the licensing authority in a party state shall ascertain whether the applicant has ever held, or is the holder of a license to drive issued by any other party state. The licensing authority in the state where application is made shall not issue a license to drive to the applicant if:

- (1) The applicant has held such a license, but the same has been suspended by reason, in whole or in part, of a violation and if such

suspension period has not terminated.

(2) The applicant has held such a license, but the same has been revoked by reason, in whole or in part, of a violation and if such revocation has not terminated, except that after the expiration of one year from the date the license was revoked, such person may make application for a new license if permitted by law. The licensing authority may refuse to issue a license to any such applicant if, after investigation, the licensing authority determines that it will not be safe to grant to such person the privilege of driving a motor vehicle on the public highways.

(3) The applicant is the holder of a license to drive issued by another party state and currently in force unless the applicant surrenders such license.

#### ARTICLE VI

##### APPLICABILITY OF OTHER LAWS

Except as expressly required by provisions of this compact, nothing contained herein shall be construed to affect the right of any party state to apply any of its other laws relating to licenses to drive to any person or circumstance, nor to invalidate or prevent any driver license agreement or other cooperative arrangement between a party state and a nonparty state.

#### ARTICLE VII

##### COMPACT ADMINISTRATOR AND INTERCHANGE OF INFORMATION

(a) The head of the licensing authority of each party state shall be the administrator of this compact for his state. The administrators, acting jointly, shall have the power to formulate all necessary and proper procedures for the exchange of information under this compact.

(b) The administrator of each party state shall furnish to the administrator of each other party state any information or documents reasonably necessary to facilitate the administration of this compact.

#### ARTICLE VIII

##### ENTRY INTO FORCE AND WITHDRAWAL

(a) This compact shall enter into force and become effective as to any state when it has enacted the same into law.

(b) Any party state may withdraw from this compact by enacting a statute repealing the same, but no such withdrawal shall take effect until six months after the executive head of the withdrawing state has given notice of the withdrawal to the executive heads of all other party states. No withdrawal shall affect the validity or applicability by the licensing authorities of states remaining party to the compact of any report of conviction occurring prior to the withdrawal.

#### ARTICLE IX

##### CONSTRUCTION AND SEVERABILITY

This compact shall be liberally construed so as to effectuate the purposes thereof. The provisions of this compact shall be severable and if any phrase, clause, sentence or provision of this compact is declared to be contrary to the constitution of any party state or of the United States or the applicability thereof to any government, agency, person or circumstance is held invalid, the validity of the remainder of this compact and the applicability thereof to any government, agency, person or circumstance shall not be affected thereby. If this compact shall be held contrary to the constitution of any state party thereto, the compact shall remain in full force and effect as to the remaining states and in full force and effect as to the state affected as to all severable matters.

### ARTICLE V

#### OBJECTIVES OF THE PARTICIPATING JURISDICTIONS

##### SECTION 1.

##### Objectives.

The participating jurisdictions hereby declare that:

(a) It is the objective of the participating jurisdictions to obtain more efficient and more economical transportation by motor vehicles between and among the participating jurisdictions by encouraging the adoption of standards that will, as minimums, allow the operation on all State highways, except those determined through engineering evaluation to be inadequate, with a single-axle weight of 20,000 pounds, a tandem-axle weight of 34,000 pounds, and a gross vehicle or combination weight of that resulting from application of the formula:

$$W = 500 \left( \frac{LN}{N} - 1 \right) + 12N + 36$$

where W = maximum weight in pounds carried on any group of two or more axles computed to nearest 500 pounds.

L = distance in feet between the extremes of any group of two or more consecutive axles.

N = number of axles in group under consideration.

(b) It is the further objective of the participating jurisdictions that the operation in interstate commerce of a vehicle or combination of vehicles that exceeds statutory maximum weights or statutory maximum lengths be authorized under special permit authority by each participating jurisdiction.

(c) It is the further objective of the participating jurisdictions to facilitate and expedite the operation of any vehicle or combination of vehicles between and among the participating jurisdictions under the provisions of subsection (a) or (b) of this section, and to that end the participating jurisdictions hereby agree, through their designated representatives, to meet and cooperate in the consideration of vehicle size and weight related matters including, but not limited to, the development of: uniform enforcement procedures; additional vehicle size and weight standards; operational standards; agreements or compacts to facilitate regional application and administration of vehicle size and weight standards; uniform permit procedures; uniform application forms; rules and regulations for the operation of vehicles, including equipment requirements, driver qualifications, and operating practices; and such other matters as may be pertinent.

(d) It is the further objective of the participating jurisdictions to authorize the cooperating committee to recommend that the participating jurisdictions jointly secure congressional approval of this agreement and, specifically, of the vehicle size and weight standards set forth in subsection (a) of this section.

(e) It is the further objective of the participating jurisdictions to:

(1) Establish transportation laws and regulations to meet regional economic needs and to promote an efficient, safe and consistent transportation network;

(2) Develop standards that facilitate the most efficient and environmentally sound operation of vehicles on highways consistent with and in recognition of principles of highway safety; and

(3) Establish programs to increase productivity and reduce congestion, fuel consumption and related transportation costs and enhance air quality through the uniform application of state vehicle regulations and laws.

(f) It is the further objective of the participating jurisdictions that in carrying out subsection (e) of this section, the participating jurisdictions shall give priority to ensuring the long term financial stability of the highway infrastructure, considering the net benefits across all modes and all segments of industry and society and not focusing on incremental changes where there is no long term guiding policy.

#### ARTICLE VI

##### ENTRY INTO FORCE AND WITHDRAWAL

SECTION 1. This agreement shall enter into force when enacted into law by any two (2) or more jurisdictions. Thereafter, this agreement shall become effective as to any other jurisdiction upon its enactment thereof, except as otherwise provided in section 8, Article III.

(b) The vehicle is transferred to a vehicle dealer and the vehicle will become part of the dealer's inventory for resale. Upon the transfer of a vehicle to a dealer, however, the dealer shall immediately notify the department of such transfer. This exemption from the requirement to apply for title does not apply if the department determines that application for title is necessary in order to comply with odometer disclosure requirements. If the department determines that application for title is not required, it may require filing of documents under ORS 803.126.

(c) The vehicle is to be titled in another jurisdiction.

(e) The transfer involves the creation or termination of a leasehold interest in a vehicle that is proportionally registered under ORS 826.009 or 826.011, if the department is furnished with satisfactory proof of the lease.

(3) Except as provided in subsection (2) of this section, the transferee shall:

(b) Submit the title transfer fees as required under ORS 803.090.

(c) Comply with the provisions of ORS 803.065 and any applicable rules of the department under that statute and submit the duplicate or replacement title fee as provided under ORS 803.090, if the transfer includes an application for duplicate or replacement title and transfer of title.

(d) Submit an odometer disclosure containing information required by the department for the kind of transaction involved.

(e) Submit any late presentation of certificate of title fee as provided under ORS 803.090 if such fee is required under ORS 803.105.

(b) A "transfer in bulk" is:

(A) The sale or assignment of, the grant of a security interest in, or any other transfer of either a group of loans secured by vehicles, leases of vehicles or both or a participation or other interest in the group of loans;

(B) The creation of asset-backed securities or other securing of assets involving the loans or leases; or

Such application shall be submitted to the department within 30 days of the date of transfer of interest.

(2) Notwithstanding subsection (1) of this section, application is not required under this section when:

(a) The change involves only a change in the security interest where the security interest holder or lessor is a financial institution, a financial holding company or a bank holding company, as those terms are defined in ORS 706.008, a licensee under ORS chapter 725, or any subsidiary or affiliate of any of the foregoing and the transfer of the interest of the security interest holder or lessor:

(b) Submit the title transfer fees as required under ORS 803.090.

(c) Comply with the provisions of ORS 803.065 and any applicable rules of the department under that statute and submit the duplicate or replacement title fee as provided under ORS 803.090, if the transfer includes an application for duplicate or replacement title and transfer of title.

(d) Submit an odometer disclosure containing information required by the department for the kind of transaction involved.

(e) Submit any late presentation of certificate of title fee as provided under ORS 803.090 if such fee is required under ORS 803.105.

(b) When the primary security interest holder receives an electronic title, within 30 days of the release of the security interest the primary security interest holder shall electronically submit the release of interest to the department in the manner provided by the department by rule.

(c) A duly certified copy of the department's electronic record of the title reflecting the lien is admissible in any civil, criminal or administrative proceeding in this state as evidence of the existence of a lien.

[2023 c.428 §5]

Sec. 6.

Section 5 of this 2023 Act is repealed January 2, 2027.

[2023 c.428 §6]

**RegistrationSection 803.094 - Release or assignment of title interest; rules; when and by whom required; exceptions.**

(1) Except as otherwise provided in this section, upon the transfer of any interest shown on an Oregon title any person whose interest is released, terminated, assigned or transferred, shall release or assign that interest in a manner specified by the Department of Transportation by rule. Rules adopted for purposes of this subsection shall be designed, as much as possible, to protect the interests of all parties to the transfer. If required under ORS 803.102, the person shall also complete an odometer disclosure statement.

(2) Notwithstanding subsection (1) of this section:

(a) In the case of a transfer by operation of law of any interest shown on an Oregon title, the personal representative, receiver, trustee, sheriff or other representative or successor in interest of the person whose interest is transferred shall release or assign interest and if required by the department by rule, as provided under ORS 803.102, complete an odometer disclosure statement and shall provide the certificate, if any, and disclosure statement if required to the transferee. The representative or successor shall also provide the transferee with information satisfactory to the department concerning all facts entitling such representative or successor to transfer title. If there is no person to assign interest, the person to whom interest is awarded or otherwise transferred shall be responsible for the requirements of this paragraph.

(b) In the case of a transfer at death of the interest of the owner, lessor or security interest holder if the estate is not being probated and title is not being transferred under the provisions of ORS 114.547, interest may be assigned through the use of an affidavit. The affidavit shall be on a form prescribed by the department and signed by all of the known heirs of the person whose interest is being transferred stating the name of the person to whom the ownership interest has been passed. If any heir has not arrived at the age of majority or is otherwise incapacitated, the parent or guardian of the heir shall sign the affidavit. In the case of a transfer under this paragraph, one of the heirs or any other person designated by the department by rule shall complete any odometer disclosure statement required under ORS 803.102.

(c) In the case of a transfer at death of the interest of the owner, lessor or security interest holder where transfer occurs under the provisions of ORS 114.547, the affiant as defined in ORS 114.505 is the person required to assign interest. The department may designate by rule the affiant or any other person to complete any odometer disclosure statement required under ORS 803.102.

(d) Upon the termination of a lease, in lieu of the lessee releasing interest, the lessor may provide information satisfactory to the department that the lease has been terminated. The lessor shall provide an odometer disclosure statement if required under ORS 803.102. If the lessor does not take possession of the vehicle upon termination of the lease, the information in the odometer disclosure given by the lessor may be taken from an odometer disclosure given by the lessee to the lessor under ORS 803.102 unless the lessor has reason to believe that the disclosure by the lessee does not reflect the actual mileage of the vehicle.

(e) A security interest holder or lessor, without the consent of the owner, may assign interest of the holder or lessor in a vehicle to a person other than the owner without affecting the interest of the owner or the validity or priority of the interest. A person not given notice of such assignment is protected in dealing with the security interest holder or lessor as the holder of the interest until the assignee files in accordance with ORS chapter 79. This paragraph does not exempt such assignments from title transfer requirements.

(3) Nothing in this section requires the release or assignment of title upon the creation or termination of a leasehold interest for a vehicle that is proportionally registered under ORS 826.009 or 826.011 if the department is furnished with satisfactory proof of the lease for such vehicle.

(4) The department by rule may allow odometer disclosure statements to be on a form other than the certificate of title.

(5) Persons subject to the provisions of this section shall provide to the transferee a title certificate, if one has been issued and is in their possession, the release or assignment of interest, and any required odometer disclosure statement. If an odometer disclosure statement is required, the transferee shall provide a signed disclosure to the transferor in a form determined by the department by rule. [1989 c.148 §2; 1991 c.67 §213; 1991 c.873 §13; 1993 c.233 §30; 2001 c.675 §10; 2003 c.655 §103; 2019 c.165 §29]

**2023 Oregon Revised Statutes Volume : 19 - Utilities, Vehicle Code, Watercraft, Aviation Chapter 803 - Vehicle Title and Registration Section 803.097 - Perfection of security interest in vehicle; rules.**

(1) Except as provided in subsection (5) of this section, the exclusive means for perfecting a security interest in a vehicle is by application for notation of the security interest on the title in accordance with this section. The application may accompany the application for a title or may be made separately at any time prior to issuance of title and must be accompanied by evidence of ownership as defined by the Department of Transportation by rule unless the department is in possession of evidence of ownership when it receives the application. If title to the vehicle has been issued in a form other than a certificate, and the title reflects a security interest, the application for perfection shall include authorization from the previous security interest holder for the new security interest to be recorded on the title. Authorization under this subsection is not required if:

(a) A release of interest is submitted by the prior security interest holder or the department is otherwise satisfied that the prior holder no longer holds an interest or is otherwise not entitled to title to the vehicle;

(b) The security interest is being added to the title in conjunction with the cancellation of previous title or other action the department takes to correct ownership information reflected on a title; or

(c) Title is being transferred by operation of law.

(2) When the department processes an application for a security interest the department shall mark on the application or otherwise

indicate on the record the date the application was first received by the department. The department shall determine by rule what constitutes receipt of an application for purposes of this subsection.

(3) If the department has the evidence required by subsection (1) of this section and if the application contains the name of each owner of the vehicle, the name and address of the secured party and the vehicle identification number of the collateral, the security interest is perfected as of the date marked on the application or indicated in the record by the department. If the application does not contain the information required by this subsection, or if the department does not have the required evidence, the department shall indicate on the application or on the record that the date placed on the application or the record pursuant to subsection (2) of this section is not the date of perfection of the security interest.

(4) The security interest remains effective until released or terminated by the secured party.

(5) A security interest in a vehicle may not be perfected as described under this section but is subject to the perfection provisions under ORS chapter 79 if:

(a) The debtor who granted the security interest is in the business of selling vehicles and the vehicle constitutes inventory held for sale or lease; or

(b) The vehicle is exempt from titling requirements under ORS 803.030. [1987 c.750 §2; 1989 c.148 §13; 1993 c.233 §31; 2001 c.445 §184; 2001 c.675 §11a; 2003 c.655 §104; 2012 c.12 §23]

### **2023 Oregon Revised Statutes Volume : 19 - Utilities, Vehicle Code, Watercraft, Aviation Chapter 803 - Vehicle Title and Registration Section 803.098 - Certain transactions that do not create security interest.**

Notwithstanding any other provision of law, in the case of motor vehicles or trailers, a transaction does not create a sale or security interest merely because it provides that the rental price is permitted or required to be adjusted under the agreement either upward or downward by reference to the amount realized upon sale or other disposition of the motor vehicle or trailer. [1993 c.646 §25]

### **2023 Oregon Revised Statutes Volume : 19 - Utilities, Vehicle Code, Watercraft, Aviation Chapter 803 - Vehicle Title and Registration Section 803.100 - Application of Uniform Commercial Code.**

(1) Except as provided in subsection (2) of this section, the rights and remedies of all persons in vehicles subject to security interests established under ORS 803.097 are determined by the provisions of the Uniform Commercial Code.

(2)(a) If perfection of a security interest in a vehicle occurs on or before 30 days after attachment of the security interest, the secured party takes priority over the rights of a transferee in bulk or a lien creditor that arise between the time the secured party's interest attaches and the time of perfection of the security interest.

(b) This subsection applies to any security interest in a vehicle that is not a purchase money security interest. [1983 c.338 §190; 1985 c.16 §66; 1989 c.148 §14; 1999 c.818 §3; 2001 c.675 §12; 2003 c.655 §105; 2005 c.261 §1]

### **2023 Oregon Revised Statutes Volume : 19 - Utilities, Vehicle Code, Watercraft, Aviation Chapter 803 - Vehicle Title and Registration Section 803.102 - Odometer disclosure statement upon transfer of interest; when required; rules.**

(1) As used in this section:

(a) "Transferee" means any person to whom ownership of a motor vehicle is transferred by purchase, gift or any other means other than by creation of a security interest and any person who, as an agent, signs an odometer disclosure statement for the transferee.

(b) "Transferor" means any person who transfers ownership of a motor vehicle by sale, gift or any means other than by creation of a security interest and any person who, as an agent, signs an odometer disclosure statement for the transferor.

(2) Except as otherwise provided in this section, upon transfer of any interest in a motor vehicle, an odometer disclosure statement shall be made by the transferor to the transferee. The disclosure shall be in a form that complies with the provisions of ORS 803.120 and shall contain the information required under ORS 803.122.

(3) If a transfer requiring a disclosure statement involves a leased vehicle, the lessor shall notify the lessee that the lessee is required to provide odometer disclosure. The lessee shall furnish the lessor with a form that complies with the requirements of ORS 803.120 and shall provide the information required by ORS 803.122 except that for purposes of the required information, the lessee shall be considered the transferor, the lessor shall be considered the transferee and the date shall be the date of the disclosure statement.

(4) Where an interest in a vehicle is transferred by operation of law, the Department of Transportation shall determine by rule whether an odometer disclosure statement is required and if so, who is required to provide it.

(5) The department, by rule, may exempt vehicles from the odometer disclosure requirements of this section in accordance with federal laws, rules or regulations pertaining to odometer disclosure requirements. [1989 c.148 §4; 1991 c.67 §214; 1991 c.873 §1; 2013 c.659 §1; 2021 c.630 §30; 2023 c.400 §24]

**2023 Oregon Revised Statutes Volume : 19 - Utilities, Vehicle Code, Watercraft, Aviation Chapter 803 - Vehicle Title and Registration Section 803.400 - Duration of registration periods.**

This section establishes and distinguishes registration periods. Each registration period determines the period of validity for vehicle registration. Registration under the following registration periods is valid during the described registration period:

(1)(a) Annual registration is valid for a one-year period. Except as provided in this subsection, the period starts on the first day of a calendar month and runs through the last day of the same calendar month one year later. Once a vehicle is registered under annual registration, the registration period of the vehicle begins and ends with that same calendar month each time the vehicle is reregistered or registration for the vehicle is renewed.

(b) Annual registration issued under ORS 803.415 (11) starts on the day a vehicle is registered and runs through the same day one year later. Once a vehicle is registered annually under ORS 803.415 (11), the registration period of the vehicle begins and ends with that same day each time the vehicle is reregistered or registration for the vehicle is renewed. Vehicles initially registered on February 29 will expire on the last day of February at the end of the registration period.

(2) Biennial registration is valid for a two-year period. The period starts on the day a vehicle is registered and runs through the same day two years later. Once a vehicle is registered under biennial registration, the registration period of the vehicle begins and ends with that same day each time the vehicle is reregistered or registration for the vehicle is renewed. Vehicles initially registered on February 29 will expire on the last day of February two years later.

(3) Calendar-year registration starts on January 1 of a year and runs through December 31 of the same year.

(4) Ownership registration starts on the day the vehicle is registered and is valid until the ownership of the vehicle changes.

(5) Permanent registration starts on the day the vehicle is registered and is valid for the life of the vehicle.

(6) Quarterly registration starts on the first day of any calendar quarter and runs through the last day of the last calendar quarter in the registration period. The number of calendar quarters in a quarterly registration is elected by the vehicle owner at the time of registration. A person may not establish quarterly registration periods for more than four quarters. If a vehicle is registered for a quarterly registration period of less than four calendar quarters, the Department of Transportation shall collect, when issuing or renewing registration of the vehicle, the additional fee for quarterly registration established under ORS 803.420.

(7) Four-year registration starts on the day a vehicle is registered and runs through the same day four years later. [1983 c.338 §222; 1989 c.76 §1; 1993 c.174 §4; 2001 c.124 §2; 2005 c.280 §1]

(1) The month in which any vehicle is initially registered under annual registration is the month established as the beginning and ending of registration periods for the vehicle unless the Department of Transportation adjusts the registration month of the vehicle upon initial registration under ORS 803.410.

(2) The day on which any vehicle is initially registered under biennial registration or when required under ORS 820.520 is the day established as the beginning and ending of registration periods for the vehicle unless the department adjusts the registration period of the vehicle upon initial registration under ORS 803.410. (2) The department may initially adjust the registration periods of trailers for hire registered as part of a fleet.

(3) The authority granted under this section includes authority to adjust the initial registration period of travel trailers and special use trailers that are required to be registered after being removed from assessment under the ad valorem tax laws by ORS 820.520.

**2023 Oregon Revised Statutes Volume : 19 - Utilities, Vehicle Code, Watercraft, Aviation Chapter 803 - Vehicle Title and Registration Section 803.600 - Trip permits; authority granted; types; records; rules; when not required.**

A trip permit grants authority to temporarily operate a vehicle on the highways of this state under circumstances where the operation would not otherwise be legal because the vehicle is not registered by this state or because provisions relating to the vehicle's registration do not allow the operation. The Department of Transportation shall provide for the issuance of trip permits in a manner consistent with this section. All of the following apply to permits issued under this section:

(1) The department shall issue the following types of trip permits to authorize the described type of operation and, except as provided in subsection (2) of this section, may not issue trip permits for any other purpose:

(a) A heavy motor vehicle trip permit may be issued for the following vehicles that are not registered in this state:

(A) Motor vehicles with a combined weight or loaded weight of more than 10,000 pounds;

(B) Truck tractors that are more than 8,000 pounds; or

(C) Fixed load motor vehicles.

(b) A permit described in paragraph (a) of this subsection is valid for 10 consecutive days.

(c) A heavy trailer trip permit may be issued for a trailer that will be operated on the highways at a loaded weight of more than 8,000 pounds or that is a fixed load vehicle, and that is not registered to allow operation of the vehicle in this state. A permit described in this paragraph is valid for 10 consecutive days. This paragraph does not apply to travel trailers.

(d) A light vehicle trip permit may be issued for a vehicle with a combined weight or loaded weight of less than 10,001 pounds that is not a fixed load vehicle and that is not registered to allow operation of the vehicle in this state. Permits described in this paragraph may be issued for a period of 21 consecutive days. The department may not issue more than two permits under this paragraph in a 12-month period for any one vehicle unless all registered owners of the vehicle are replaced by new owners. If there is a complete change in ownership of the vehicle, as shown by the registration records for the vehicle, a new owner may receive permits for the vehicle under this paragraph as if no permits had been issued for the vehicle. This paragraph does not apply to campers, travel trailers or motor homes, which are eligible for recreational vehicle trip permits under paragraph (e) of this subsection.

(e) A recreational vehicle trip permit may be issued for a period of up to 10 consecutive days for a camper, travel trailer or motor home that is not registered for operation in this state. A person buying a recreational vehicle trip permit must show proof satisfactory to the department that the person is the owner of the camper, travel trailer or motor home for which the permit will be granted. A person may not receive recreational vehicle trip permits authorizing more than 10 days of operation in any 12-month period. The department may determine by rule the method for ensuring a person has not exceeded the maximum number of days of operation allowed by the permit.

(f) A registration weight trip permit may be issued for a vehicle that is registered in this state, to allow the vehicle to be operated with a greater combined weight or loaded weight than is permitted by the registration weight established for the vehicle or at a greater combined weight or loaded weight than is otherwise permitted under the registration for the vehicle if the vehicle is not required to establish a registration weight. A permit issued under this paragraph does not authorize movements or operations for which a variance permit is required under ORS 818.200. A permit issued under this paragraph shall show the maximum registration weight allowed for operation under the permit. A permit issued under this paragraph is valid for 10 consecutive days.

(g) A registered vehicle trip permit may be issued for a vehicle that is registered in this state to allow the vehicle to operate under conditions or in ways not permitted by the terms of the vehicle registration. The department shall determine by rule the kinds of operation for which permits may be issued under this paragraph. A permit issued under this paragraph is valid for 10 consecutive days.

(2) The department shall allow a person issued a vehicle dealer certificate under ORS 822.020 or a towing business certificate under

ORS 822.205 to issue a 10-day trip permit to a person who buys a motor vehicle from the person with the certificate if the registration stickers are removed in accordance with ORS 803.565. The following apply to trip permits issued under this subsection:

- (a) A permit issued under this subsection allows operation of the motor vehicle in this state for the purpose of registering the vehicle.
- (b) A permit issued under this subsection is valid for a period of 10 consecutive days.
- (c) A person with a vehicle dealer certificate or a towing business certificate may not issue more than two permits under this subsection for the same motor vehicle.

- (b) Requirements for the department to maintain records concerning trip permits are established under ORS 802.200.
- (4) An owner or operator of a vehicle may obtain a trip permit. The fees for issuance of trip permits are as provided under ORS 803.645.
- (5) The department shall make the trip permits available to all field offices and agents maintained by the department and may make arrangements for the issuance of the permits by designated individuals, firms or associations for the convenience of the motoring public. This subsection does not require the department to make trip permits described in subsection (2) of this section available to anyone other than persons with vehicle dealer certificates or towing business certificates.
- (6) The department may also sell heavy motor vehicle, heavy trailer and registration weight trip permits in advance of issuance to contractors, transportation companies and other users for issuance to their own vehicles or vehicles under their control.
- (7) The department shall adopt rules for the issuance, sale and control of trip permits.

**2023 Oregon Revised Statutes Volume : 19 - Utilities, Vehicle Code, Watercraft, Aviation Chapter 807 - Driving Privileges and Identification Cards Section 807.745 - Findings regarding personal information contained in driver licenses, driver permits and identification cards.**

The Legislative Assembly finds that:

- (1) Oregon recognizes the importance of protecting the confidentiality and privacy of an individual's personal information contained in driver licenses, driver permits and identification cards.
- (2) Machine-readable features found on driver licenses, driver permits and identification cards are intended to facilitate verification of age or identity, not to facilitate collection of personal information about individuals nor to facilitate the creation of private databases of transactional information associated with those individuals.
- (3) Easy access to the information found on driver licenses, driver permits and identification cards facilitates the crime of identity theft, which is a major concern in Oregon. [2009 c.546 §1]

Note:

807.745 and 807.750 were enacted into law by the Legislative Assembly but were not added to or made a part of the Oregon Vehicle Code or any chapter or series therein by legislative action. See Preface to Oregon Revised Statutes for further explanation.

- (2) The department may cancel any driver license or permit that contains any error or defect or that is found to have been issued on

the basis of false information given to the department. Cancellation under this subsection is in addition to any suspension of driving privileges authorized for the same conduct.

(3) The department may suspend any driving privileges or right to apply for privileges or any identification card or right to apply for a card upon determining that the person issued or applying for the driving privileges or identification card has committed any of the following acts:

(a) Failed to give the required or correct information in the application for the driving privileges or for an identification card, in violation of ORS 807.430 or 807.530.

(1) A person whose driving privileges or right to apply for driving privileges or whose identification card or right to apply for an identification card has been suspended for one of the reasons specified in subsection (2) of this section may request that the person's driving privileges or right to apply for driving privileges or identification card or right to apply for an identification card be reinstated after the Department of Transportation determines the criteria are met under subsection (4) of this section.

(2) This section applies to suspensions imposed under:

(a) ORS 809.310 (3)(a);

(b) ORS 809.310 (3)(b); and

(c) ORS 809.415 (5) for committing an act that constitutes an offense described in ORS 809.310 (3)(a) or (b).

(3) To make a request under subsection (1) of this section, the person must provide sufficient proof for the department to make the determinations required in subsection (4) of this section. The department shall provide an administrative review to determine if the person's driving privileges or right to apply for driving privileges or identification card or right to apply for an identification card should be reinstated and may reinstate the person's suspended driving privileges or right to apply for driving privileges or identification card or right to apply for an identification card only as provided in subsection (4) of this section.

(4) The granting of an administrative review under this section does not stay the suspension. However, the department shall reinstate the person's driving privileges or right to apply for driving privileges or identification card or right to apply for an identification card if under objective criteria adopted by the department by rule, the department determines the suspension resulted from:

(a) An act described in ORS 809.310 (3)(a) or (b) committed by the person when the person was under 21 years of age; and

(b) The person committed the act solely for the purpose of:

(A) Attempting to purchase, purchasing, consuming or acquiring alcoholic beverages as described in ORS 471.430; or

(B) Unlawfully entering or attempting to enter any portion of a licensed premises that is posted or otherwise identified as being prohibited to the use of minors, as described in ORS 471.430.

(7) To reinstate an identification card or the right to apply for an identification card after the department determines that the person meets the objective criteria under subsection (4) of this section, the person shall pay the fee for reinstatement of an identification card as described in ORS 807.410.

(8) The department's authority to reinstate a suspension of a person's driving privileges or right to apply for driving privileges under this section does not impinge on a court's authority to impose a suspension under ORS 165.805 or 471.430. (3) Judicial review of orders denying, suspending or revoking a license, except where such suspension or revocation is mandatory, shall be as provided in ORS chapter 183.

(4) Whenever the department or a court has reason under any laws of this state to suspend or revoke the driving privileges of any person who does not hold current driving privileges to operate motor vehicles or whose driving privileges are due to expire during a suspension period, the department or court shall suspend or revoke the right of such person to apply for driving privileges to operate motor vehicles in this state. All of the following apply to a person whose driving privileges have been suspended:

(1) The period of suspension shall last as long as provided for that particular suspension by law.

(2) During the period of suspension, the person is not entitled to exercise any driving privileges in this state except as provided under this subsection. Unless otherwise specifically provided by law, a person whose driving privileges are suspended may obtain, if the person qualifies, a hardship driver permit under ORS 807.240, and exercise driving privileges under the driver permit.

(3) Upon expiration of the suspension, the Department of Transportation shall reissue, upon request of the person, the suspended driving privileges and any license or driver permit that evidences the driving privileges. The reissuance shall be without requalification by the person except that the department may require the person to furnish evidence satisfactory to the department that the person is qualified to continue to exercise driving privileges in this state before the department reissues the driving privileges.

(4) The department may not issue any driving privileges in contradiction to this section.

(5) If the person fails to surrender to the department any license or driver permit issued as evidence of driving privileges that are suspended, the person is subject to the penalties under ORS 809.500.

(6) No reinstatement of suspended driving privileges will be made by the department until the fee for reinstatement of suspended driving privileges established under ORS 807.370 is paid to or waived by the department. The department may waive the reinstatement fee for any of the following reasons:

(a) The suspension occurred under ORS 809.419 for failure to take an examination upon request of the department under ORS 807.340.

(b) The suspension occurred under ORS 809.419 for failure to obtain required medical clearance upon request of the department under ORS 807.070 or 807.090.

(c) The suspension occurred under ORS 809.419 for incompetence to drive a motor vehicle or having a mental or physical condition or impairment that affects the person's ability to safely operate a motor vehicle.

(d) The suspension occurred under ORS 809.419 upon notification by the superintendent of a hospital under ORS 807.700 that a person should not drive.

(e) The suspension occurred under ORS 809.419 upon notification by a court under ORS 810.375 that a person charged with a traffic offense has been found guilty except for insanity.

(f) The department committed an error in issuing the suspension.

- (g) The suspension was the result of an error committed by an insurance company in issuing or failing to issue a certification of insurance or in canceling a certification of insurance filed with the department under ORS 806.270.
- (h) The department issued the suspension without error because the person failed to respond as required under ORS 806.150 or to furnish proof of exemption under ORS 806.210 from the filing requirement of ORS 806.200, but the department later determines that the person in fact was in compliance with financial responsibility requirements as of the date specified by the department by rule under ORS 806.150 or at the time of an accident described in ORS 806.200.
- (i) The department issued the suspension without error because the person was not in compliance with financial responsibility requirements as of the date specified by the department by rule under ORS 806.150 or at the time of an accident described in ORS 806.200, but the department later determines that the person reasonably and in good faith believed that the person was in compliance with financial responsibility requirements on the date specified by the department by rule under ORS 806.150 or at the time of the accident.
- (j) The suspension was the result of an error committed by an insurance company in notifying the department regarding the correctness of proof of compliance with financial responsibility requirements provided under ORS 806.150.
- (k) The suspension occurred because the person failed to make future responsibility filings but the department later determines that the reason for the failure was that the person was a military reservist or a member of a national guard unit that was ordered to active military duty to a location outside of the United States. The effective date of the military orders must be prior to the effective date of a suspension issued by the department for failure to make a future responsibility filing.
- (L) The department issued the suspension without error because the department received a notice to suspend from a court under ORS 809.220, but the department later determines that the person in fact was in compliance with the requirements of the court prior to the effective date of the suspension. All of the following apply to a person whose driving privileges have been revoked:

- (1) The period of revocation shall last as long as required for the revocation by law.
- (2) During the period of revocation, the person is not entitled to exercise any driving privileges in this state or to apply for or receive any driving privileges in this state except when a person who has been determined to be a habitual offender is permitted to obtain driving privileges under ORS 807.240.
- (3) Upon expiration of the revocation period, the person must reapply for driving privileges in the manner established by law and must reestablish the person's eligibility for issuance of driving privileges.
- (4) The Department of Transportation may issue new driving privileges to a person before the expiration of the revocation period if the person is otherwise entitled to be issued driving privileges and when, with reference to a conviction upon which the revocation was based, the Governor has pardoned the person of the crime.
- (5) The department shall not issue any driving privileges in contradiction to this section.

Violation of a suspension or revocation imposed under this subsection shall have the same legal effects and consequences as it would if the offense committed in the other jurisdiction had been committed in this jurisdiction.
- (b) The department may not suspend or revoke driving privileges under this subsection unless notice of conviction is received within 180 days of the date of the conviction.
- (2) The department may suspend or revoke the driving privileges of any resident of this state upon receiving notice from another state, territory, federal possession or district or province of Canada that the person's driving privileges in that jurisdiction have been suspended or revoked. (b) Was operating the vehicle while under the influence of intoxicants.

(10) The authority to impound or immobilize a vehicle under this section is subject to the rights of a security interest holder under a security agreement executed before an arrest for violation of an offense for which the vehicle may be impounded or immobilized under this section. A vehicle shall be released for the purpose of satisfying a security interest if:

(a) A request in writing is made to the court; and

The police officer who ordered the vehicle impounded may submit an affidavit to the hearings officer in lieu of making a personal appearance at the hearing.

The hearings officer may also find the owner or person entitled to possession of the vehicle liable for costs of the hearing.

(5) If the hearings officer finds that impoundment of the vehicle was improper, the hearings officer shall order the vehicle released to the person entitled to possession and shall enter a finding that the owner or person entitled to possession of the vehicle is not liable for any towing or storage costs resulting from the impoundment. If there is a lien on the vehicle for towing and storage charges, the hearings officer shall order it paid by the impounding police agency.

(7) Nothing in this section or ORS 809.716 limits either the authority of a city or county to adopt ordinances dealing with impounding of uninsured vehicles or the contents of such ordinances except that cities and counties shall comply with the notice requirements of subsection (2) of this section and ORS 809.725.

(a) The department shall only establish weight and size limits under this subsection within the limits necessary to qualify for federal aid highway funds.

(b) The department shall exercise the authority either by adoption of a rule or resolution under ORS 810.060 or by issuance of variance permits under ORS 818.200. When the department exercises the authority under this paragraph, the weight limits or size limits established under this subsection shall apply.

(2) The department may by rule prohibit the movement on highways under its jurisdiction of vehicles or combinations of vehicles of a size or weight otherwise authorized by statute if the prohibition is necessary in order to qualify for federal aid highway funds.

(3) Road authorities other than the department may increase or decrease size and weight limits on their own highways if the department exercises the authority granted under this section. The exercise of authority under this subsection is subject to all of the following:

(a) A road authority may not exercise the authority to establish a size or weight limit that exceeds the maximum authorized by the department or to prohibit vehicles or combinations of vehicles that are not prohibited by the department under subsection (2) of this section.

(b) The road authority shall exercise the authority either by adoption of a rule, resolution or ordinance under ORS 810.060 or by issuance of variance permits under ORS 818.200.

The Oregon Transportation Commission shall act as road authority under this section in lieu of the Department of Transportation. The authority granted in this section is subject to all of the following:

(1) The commission has exclusive authority to regulate, control or prohibit the stopping, standing and parking on all state highways:

(a) Within the corporate limits of a city except where the highway is routed over a city street under ORS 373.010.

(b) Within the corporate limits of any city if access to or from the section of highway and real property abutting thereon was restricted, controlled or prohibited by the commission before the section of highway was included within the corporate limits of the city.

(2) Road authorities other than the commission may permit angle parking on any highway where parking is subject to their jurisdiction under this section. For cities, this subsection includes authority to permit angle parking on any city street selected and designated as the route of a state highway under ORS 373.010 and, subject to the authority of the commission under this section, any state highway within the corporate limits of the city. This subsection does not allow any road authority to permit angle parking on a state highway if the commission determines that the highway is not of sufficient width to permit angle parking without interfering with the free movement of traffic.

(3) All regulations, restrictions or prohibitions imposed by the commission under this section shall be by resolution or order entered in the commission's official records.

(4) Regulations, restrictions or prohibitions imposed by the commission under this section shall become effective and have the force of law when signs or markings giving notice thereof have been placed. The commission shall designate winter recreation parking locations under this section after consultation with the Winter Recreation Advisory Committee established under ORS 802.350 and with land management agencies managing adjacent land.

(2) The commission shall establish priorities for plowing the winter recreation parking locations established under this section. The commission shall establish priorities under this section after consultation with the Winter Recreation Advisory Committee established under ORS 802.350. The Department of Transportation shall provide for the removal of snow accumulating on winter recreation parking locations established under this section according to the priorities established by the commission under this section. Snow removal provided for under this subsection may be performed by any of the following:

(a) By the department itself.

(b) By persons with whom the department contracts. If the department contracts with persons for the removal of snow under this paragraph payments under the contracts shall be made from funds designated for that purpose under ORS 802.110.

**2023 Oregon Revised Statutes****Volume : 19 - Utilities, Vehicle Code, Watercraft, Aviation****Chapter 810 - Road Authorities; Courts; Police; Other Enforcement Officials****Section 810.180 - Designation of maximum speeds; rules.**

(1) As used in this section:

- (a) "Designated speed" means the speed that is designated by a road authority as the maximum permissible speed for a highway and that may be different from the statutory speed for the highway.
- (b) "Statutory speed" means the speed that is established as a speed limit under ORS 811.111, or is established as the speed the exceeding of which is prima facie evidence of violation of the basic speed rule under ORS 811.105.
- (2)(a) A designated speed established under this section is a speed limit if the highway for which the speed is designated is subject to a statutory speed limit under ORS 811.111 that is in addition to the speed limit established under ORS 811.111 (1)(b).
- (b) A speed greater than a designated speed established under this section is prima facie evidence of violation of the basic speed rule if the designated speed is established for a highway on which there is no speed limit other than the limit established under ORS 811.111 (1)(b).
- (3) The Department of Transportation may establish by rule designated speeds on any specified section of interstate highway if the department determines that speed limits established under ORS 811.111 (1) are greater or less than is reasonable or safe under the conditions that exist with respect to that section of the interstate highway. Designated speeds established under this subsection are subject to all of the following:
- (a) The department may not establish a designated speed under this subsection of more than:
- (A) Sixty-five miles per hour for vehicles described in ORS 811.111 (1)(b); and
- (B) Seventy miles per hour for all other vehicles.
- (b) If the department establishes designated speeds under this subsection that are greater than 65 miles per hour, the designated speed for vehicles described in ORS 811.111 (1)(b) must be at least five miles per hour lower than the designated speed for all other vehicles on the specified section of interstate highway.
- (c) The department may establish a designated speed under this subsection only if an engineering and traffic investigation indicates that the statutory speed for the interstate highway is greater or less than is reasonable or safe under conditions the department finds to exist.
- (d) A designated speed established under this subsection is effective when appropriate signs giving notice of the designated speed are posted on the section of interstate highway where the designated speed is imposed.
- (4)(a) The department may establish, pursuant to a process established by rule, a designated speed on a state highway outside of a city. The authority granted under this subsection includes, but is not limited to, the authority to establish different designated speeds for different kinds or classes of vehicles as the department determines reasonable and safe. A designated speed established under this subsection for any kind or class of vehicles may not exceed the speed limit for the highway for that kind or class of vehicles as established in ORS 811.111 or, if there is no speed limit for the highway other than the limit established in ORS 811.111 (1)(b), may not exceed 55 miles per hour.
- (b) The department may establish a designated speed under this subsection only if an engineering and traffic investigation indicates that the statutory speed for the highway is greater or less than is reasonable or safe under conditions the department finds to exist.
- (c) A designated speed established under this subsection is effective when appropriate signs giving notice of the designated speed are posted on the portion of highway where the designated speed is imposed.
- (5) After a written request is received from a road authority for a highway other than a highway described in subsection (3) or (4) of this section, the department, pursuant to a process established by rule, may establish a designated speed for the highway. The authority granted under this subsection includes, but is not limited to, the authority to establish different designated speeds for different kinds or classes of vehicles as the department determines reasonable and safe. The authority granted under this subsection is subject to all of the following:
- (a) The written request from the road authority must state a recommended designated speed.
- (b) The department may establish a designated speed under this subsection only if an engineering and traffic investigation indicates that the statutory speed for the highway is greater or less than is reasonable or safe under conditions the department finds to exist.
- (c) The department may not make a final decision to establish a designated speed under this subsection without providing the affected road authorities with notice and opportunity for a hearing.
- (d) A road authority may file a written objection to a designated speed that is proposed by the department under this subsection and that affects the road authority.
- (e) A designated speed established under this subsection is effective when appropriate signs giving notice of the designated speed are posted on the portion of the highway where the designated speed is imposed. The expense of erecting any sign under this subsection shall be borne by the road authority having jurisdiction over the portion of the highway where the designated speed is imposed.
- (f) The department, pursuant to a process established by rule, may delegate its authority under this subsection with respect to highways that are low volume or unpaved to a city or county with jurisdiction over the highway. The department shall delegate authority under this paragraph only if it determines that the city or county will exercise the authority according to criteria adopted by the department.
- (g) The department, pursuant to a process established by rule, may delegate its authority under this subsection to Clackamas County, Marion County, Multnomah County or a city with jurisdiction over the highway. The department shall delegate authority under this paragraph only if it determines that Clackamas County, Marion County, Multnomah County or the city will exercise the authority according to criteria adopted by the department. When Clackamas County, Marion County, Multnomah County or a city establishes a designated speed under this paragraph, the county or city shall provide written notice to the department. The designated speed

established under this paragraph is effective 30 days after the department receives the notice.

(6) The department may override the speed limit established for ocean shores under ORS 811.111 (1)(c) and establish a designated speed of less than 25 miles per hour on any specified section of ocean shore if the department determines that the speed limit established under ORS 811.111 (1)(c) is greater than is reasonable or safe under the conditions that exist with respect to that part of the ocean shore. The authority granted under this subsection is subject to all of the following:

(a) The department may make the determination required under this subsection only on the basis of an investigation.

(b) A designated speed established under this subsection is effective when posted upon appropriate fixed or variable signs on the portion of ocean shore where the designated speed is imposed.

(7) A road authority may adopt a designated speed to regulate the speed of vehicles in parks under the jurisdiction of the road authority. A road authority regulating the speed of vehicles under this subsection shall post and maintain signs at all park entrances to give notice of any designated speed.

(8) A road authority may establish by ordinance or order a temporary designated speed for highways in its jurisdiction that is lower than the statutory speed. A temporary designated speed may be established under this subsection if, in the judgment of the road authority, the temporary designated speed is necessary to protect any portion of the highway from being unduly damaged, or to protect the safety of the public and workers when temporary conditions such as construction or maintenance activities constitute a danger. The following apply to the authority granted under this subsection:

(a) Statutory speeds may be overridden by a temporary designated speed only:

(A) For a specific period of time for all vehicles; or

(B) For a specified period of time for a specific kind or class of vehicle that is causing identified damage to highways.

(b) This subsection may not be used to establish a permanent designated speed.

(c) The authority granted by this subsection may be exercised only if the ordinance or order that imposes the temporary designated speed:

(A) Specifies the hazard, damage or other condition requiring the temporary designated speed; and

(B) Is effective only for a specified time that corresponds to the hazard, damage or other condition specified.

(d) A temporary designated speed imposed under this subsection must be imposed by a proper written ordinance or order. A sign giving notice of the temporary designated speed must be posted at each end of the portion of highway where the temporary designated speed is imposed and at such other places on the highway as may be necessary to inform the public. The temporary designated speed shall be effective when signs giving notice of the temporary designated speed are posted.

(9) A road authority may establish an emergency speed on any highway under the jurisdiction of the road authority that is different from the existing speed on the highway. The authority granted under this subsection is subject to all of the following:

(a) A speed established under this subsection is effective when appropriate signs giving notice thereof are posted upon the highway or portion of highway where the emergency speed is imposed. All signs posted under this subsection must comply with ORS 810.200.

(b) The expense of posting any sign under this subsection shall be borne by the road authority having jurisdiction over the highway or portion of highway where the emergency speed is imposed.

(c) A speed established under this subsection may be effective for not more than 120 days.

(10) A road authority may establish by ordinance a designated speed for a highway under the jurisdiction of the road authority that is five miles per hour lower than the statutory speed. The following apply to the authority granted under this subsection:

(a) The highway is located in a residence district.

(b) The statutory speed may be overridden by a designated speed only if:

(A) The road authority determines that the highway has an average volume of fewer than 2,000 motor vehicles per day, more than 85 percent of which are traveling less than 30 miles per hour; and

(B) There is a traffic control device on the highway that indicates the presence of pedestrians or bicyclists.

(c) The road authority shall post a sign giving notice of the designated speed at each end of the portion of highway where the designated speed is imposed and at such other places on the highway as may be necessary to inform the public. The designated speed shall be effective when signs giving notice of the designated speed are posted.

(11) A city may establish by ordinance a designated speed for a highway under the jurisdiction of the city that is up to 10 miles per hour lower than the statutory speed, so long as the designated speed is not less than 20 miles per hour. The following apply to the authority granted under this subsection:

(a) The highway is located in a residence district.

(b) The highway is not an arterial highway.

(c) The designated speed is effective when appropriate signs giving notice of the designated speed are posted on the highway where the designated speed is imposed.

(12) Notwithstanding ORS 801.430, as used in subsection (11) of this section, "residence district" includes territory not comprising a business district that is contiguous to a highway and has access to dwellings provided by alleys. The commission is granted exclusive authority under this subsection to determine the character or type of device to be used.

(2) Each road authority shall place, maintain and control traffic control devices used upon its own highway as the road authority considers necessary for the safe and expeditious control of traffic, necessary to carry out the provisions of the vehicle code or local traffic ordinances or necessary to regulate, warn or guide traffic. The commission shall act as road authority under this section in lieu of the Department of Transportation. The authority granted under this subsection is subject to all of the following:

A jurisdiction that receives a certificate of innocence under this paragraph shall dismiss the citation without requiring a court appearance by the registered owner or any other information from the registered owner other than the swearing or affirmation and the photocopy. The citation may be reissued only once, only to the registered owner and only if the jurisdiction verifies that the registered owner appears to have been the driver at the time of the violation. The citation may then be issued and delivered by mail or otherwise to the employee, renter or lessee identified in the affidavit of nonliability.

This section establishes requirements for ORS 811.520. Except where an exemption under ORS 811.525 specifically provides otherwise, a vehicle that does not comply with this section is in violation of ORS 811.520. Where specific types of lighting equipment are mentioned in this section, those types are types described in ORS 816.040 to 816.290. The requirements under this section are as follows:

(1) Subject to any other provision of this section, any lighting equipment a vehicle is required to be equipped with under ORS 816.040 to 816.290 must be displayed when the vehicle is upon a highway within this state at any time limited visibility conditions exist. The provisions of this subsection apply during the times stated when the required visibility is measured on a straight, level unlighted highway.

(2) Parking lights and lights other than clearance, identification and marker lights that are mounted on the front of a vehicle and are designed to be displayed primarily when the vehicle is parked shall not be lighted when a vehicle is driven upon a highway at times when limited visibility conditions exist except when:

(a) The lights are being used as turn signals; or

(b) The headlights are also lighted at the same time.

(3) Any vehicle parked or stopped upon a roadway or shoulder adjacent thereto, whether attended or unattended, during times when limited visibility conditions exist must display parking lights.

(4) All vehicles not specifically required by ORS 816.320 to be equipped with lighting equipment shall at times when limited visibility conditions exist display exempt-vehicle safety lighting equipment. This section includes, but is not limited to, animal drawn vehicles and vehicles exempted from required lighting equipment under ORS 816.340.

A person violates this subsection if the person does not comply with the following:

(a) Whenever the driver of a vehicle approaches an oncoming vehicle within 500 feet, the driver must use a distribution of light or composite beam so aimed that the glaring rays are not projected into the eyes of the oncoming driver. The use of the low beams of the vehicle headlight system is in compliance with this paragraph at all times regardless of road contour and loading of the vehicle.

(b) Except when in the act of overtaking or passing, a driver of a vehicle following another vehicle within 350 feet to the rear must use the low beams of the vehicle headlight system.

(7) When a vehicle is upon a highway a person shall light not more than a total of four lights at any one time that are mounted on the front of a vehicle and that each projects a beam of intensity greater than 300 candlepower.

(8)(a) A light, other than a headlight, that projects a beam of light of an intensity greater than 300 candlepower shall not be operated

on a vehicle:

(A) Unless the beam is so directed that no part of the high intensity portion of the beam will strike the level of the roadway on which the vehicle stands at a distance of more than 75 feet from the vehicle; or
