(4) If any owner of zone 1 land fails or neglects to file a fire protection plan, or to comply with the standard of protection approved by the county governing body, the governing body shall provide for forest protection pursuant to ORS 476.320.

- (2) The authority of the State Board of Forestry may be extended to include the establishment of forest protection on lands lying within zone 1 for lands not subject to a fire protection plan under ORS 476.310. For such purposes the board of forestry may contract with individuals, associations, agencies, corporations, rural fire protection districts, counties, cities, federal agencies, or any of them. The State Fire Marshal, upon the request of any county court or board of county commissioners, shall meet with and advise such county court or board of county commissioners as to the establishment and maintenance of fire fighting and fire protection equipment and facilities.

The notice shall be published by four insertions in the newspaper and 12 months shall elapse between each insertion.
- (3) While the county court or board of county commissioners of any county is maintaining fire fighting and fire protection equipment and facilities, the court or board annually shall levy a tax upon the taxable property lying within zone 2 in the county, not to exceed one-fourth of one percent (0.0025) of the real market value of all taxable property within the zone, computed in accordance with ORS 308.207, for the purpose of furnishing such fire protection.

(c) Relieves a person who has obtained permission to start a fire, or the agent of the person, from legal liability for property damage resulting from the fire.

(d) Permits an act within a city or regional air quality control authority area that otherwise is unlawful pursuant to an ordinance of the city or rule, regulation or order of the regional authority.

- (4) The State Fire Marshal may enter into a cooperative agreement with any state or local agency that allows the agency to act as an authorized representative of the State Fire Marshal for enforcement purposes under this section.
- (5)(a) The State Fire Marshal or an authorized representative, upon oral or written demand, may inspect the inventory of cigarette manufacturers, wholesale or retail dealers and transporters as the State Fire Marshal or an authorized representative deems necessary to ensure compliance with this section. The State Fire Marshal may adopt rules to require reports, in a form prescribed by the State Fire Marshal, by cigarette manufacturers, wholesale or retail dealers and transporters for the purpose of ensuring compliance with this section.

**2023 Oregon Revised Statutes Volume : 14 - Drugs and Alcohol, Fire Protection, Natural Resources Chapter 476 - State Fire Marshal; Protection From Fire Generally Section 476.770 - Determination of cigarette variety ignition propensity; reduced ignition propensity standard; listing; cigarette design; rules.**

- (1) For each variety of cigarette sold or proposed for sale in this state, the State Fire Marshal shall determine whether that variety of cigarette has reduced ignition propensity.
- (2) Any cigarette variety certified by a manufacturer under ORS 476.780 shall be determined to have reduced ignition propensity.
- (3) Except as provided in this section, ignition propensity testing certified, conducted or accepted by a manufacturer or the State Fire Marshal must be performed using ASTM International specification E2187-04, Standard Test Method for Measuring the Ignition Strength of Cigarettes. The ignition propensity testing must be conducted on 10 layers of filter paper. Forty replicate tests shall constitute a complete test trial for each cigarette variety tested. The fire safety performance standard described in subsection (6) of this section applies only to a completed test trial.
- (4) The State Fire Marshal may adopt an ignition propensity testing method developed by ASTM International as a modification or replacement of the method designated by subsection (3) of this section if the State Fire Marshal, by rule, deems the modified or replacement method acceptable for determining cigarette fire safety. However, the State Fire Marshal may not adopt a modified or replacement method that in repeated testing results in a change in the percentage of cigarettes exhibiting full-length burns from the percentage produced on the same variety of cigarettes by use of the ASTM E2187-04 method or that otherwise affects the ability of the cigarette to meet the fire safety performance standard described in subsection (6) of this section.
- (5) If the State Fire Marshal determines that ignition propensity testing cannot be performed on a cigarette using a method described in subsection (3) or (4) of this section, the manufacturer may propose an alternative testing method and an alternative fire safety performance standard for the variety. If the State Fire Marshal approves the alternative testing method and determines that the alternative fire safety performance standard is equivalent to the fire safety performance standard described in subsection (6) of this section, the manufacturer may use the alternative testing method and the alternative fire safety performance standard for the purpose of certifying the variety of cigarette under ORS 476.780. Except as provided under the approved alternative testing method and the alternative fire safety performance standard, a cigarette variety described in this subsection remains subject to ORS 476.755 to 476.790 and 476.995.
- (6) For a cigarette variety to be declared to have reduced ignition propensity, no more than 25 percent of the cigarettes in a complete test trial conducted in accordance with an ignition propensity testing method described in this section shall exhibit full-length burns.
- (7) The State Fire Marshal shall issue, keep current and make available to the public a list of the cigarette varieties the State Fire Marshal has determined to have reduced ignition propensity.
- (8) A cigarette listed in a certification under ORS 476.780 that uses lowered permeability bands in the cigarette paper to achieve compliance with the fire safety performance standard described in subsection (6) of this section must have at least two nominally identical bands on the paper surrounding the tobacco column. If the bands are not positioned on the cigarette by design, at least one complete band must be at least 15 millimeters from the lighting end of the cigarette. If the bands are positioned on the cigarette by design, the cigarette must have at least two bands that are entirely located at least 15 millimeters from the lighting end and:
  - (a) If the cigarette is filtered, that are located at least 10 millimeters from the filter end of the tobacco column; or
  - (b) If the cigarette is nonfiltered, that are located at least 10 millimeters from the labeled end of the tobacco column. [2007 c.34 §5]

**2023 Oregon Revised Statutes Volume : 14 - Drugs and Alcohol, Fire Protection, Natural Resources Chapter 476 - State Fire Marshal; Protection From Fire Generally Section 476.775 - Laboratories; ignition propensity testing.**

- (1) A laboratory that conducts ignition propensity testing for purposes of ORS 476.770 must have a quality control and assurance program. The program shall be designed to ensure the testing repeatability value for all test trials used to certify a cigarette variety. The repeatability value of ignition propensity testing may not be greater than 0.19.
- (2) Ignition propensity testing used in a manufacturer certification submitted under ORS 476.780 must be conducted in a laboratory that has been accredited under:
  - (a) The ISO/IEC 17025 standard of the International Organization for Standardization, as amended and in effect on April 17, 2007; or
  - (b) A standard recognized in State Fire Marshal rules as comparable to prevailing international accreditation standards. [2007 c.34 §6]

Note:

See note under 476.755.

**2023 Oregon Revised Statutes Volume : 14 - Drugs and Alcohol, Fire Protection, Natural Resources Chapter 476 - State Fire Marshal; Protection From Fire Generally Section 476.780 - Cigarette variety certification by manufacturer; retesting; record retention; unfavorable determination by State Fire Marshal.**

(1) A manufacturer shall submit a written certification attesting that each variety of cigarette listed in the certification has been subjected to ignition propensity testing described in ORS 476.770 and meets the fire safety performance standard described in ORS 476.770 (6).

(2) The certification shall provide the following information for each variety of cigarette listed:

- (a) The brand name shown on the cigarette packaging.
- (b) The style, such as light or ultralight.
- (c) The length in millimeters.
- (d) The circumference in millimeters.
- (e) The flavor, such as menthol or chocolate, if applicable.
- (f) Whether the cigarette is filtered or nonfiltered.
- (g) A packaging description, such as soft pack or box.
- (h) A description of the packaging marking approved by the State Fire Marshal under ORS 476.785.
- (i) The name, address and telephone number of the laboratory conducting the ignition propensity testing, if other than the laboratory of the manufacturer.
- (j) The date of the ignition propensity testing.

(3) The certification of a cigarette variety is valid for three years from the date of receipt by the State Fire Marshal.

(4) If the manufacturer certifies a cigarette variety and later makes any change that is likely to alter the cigarette variety's compliance with the fire safety performance standard described in ORS 476.770 (6), before distributing the changed cigarette variety in this state the manufacturer shall retest the ignition propensity of that variety. Notwithstanding subsection (3) of this section, a manufacturer may not sell a cigarette variety described in this subsection unless that variety continues to meet the fire safety performance standard described in ORS 476.770 (6).

(5) A manufacturer shall retain copies of all ignition propensity test data for cigarette varieties listed in the certification, including any retesting performed under subsection (4) of this section. The manufacturer shall retain the test data for not less than three years. The manufacturer shall provide copies of the test data upon request to the State Fire Marshal and to the Attorney General. Failure of a manufacturer to provide copies of ignition propensity test data requested by the State Fire Marshal or the Attorney General creates a rebuttable presumption that a cigarette variety does not meet the fire safety performance standard described in ORS 476.770 (6).

(6) The State Fire Marshal may determine that a cigarette variety certified under this section does not have reduced ignition propensity only if:

- (a) The test data provided to the State Fire Marshal by the manufacturer demonstrate that the cigarette variety does not meet the fire safety performance standard described in ORS 476.770 (6); or
- (b) The State Fire Marshal conducts ignition propensity testing on the cigarette variety and the test results demonstrate that the cigarette variety does not meet the fire safety performance standard described in ORS 476.770 (6).

(7) Ignition propensity testing by the State Fire Marshal under subsection (6) of this section shall be conducted in accordance with the testing requirements applicable to manufacturers by a laboratory meeting the requirements described under ORS 476.775.

(8) Upon a determination by the State Fire Marshal under subsection (6) of this section, the State Fire Marshal may seek the remedies described in ORS 476.765. [2007 c.34 §7]

Note:

See note under 476.755.

**2023 Oregon Revised Statutes Volume : 14 - Drugs and Alcohol, Fire Protection, Natural Resources Chapter 476 - State Fire Marshal; Protection From Fire Generally Section 476.785 - Cigarette packaging markings.**

(1) A manufacturer shall place a single type of marking on all packaging for cigarettes of the manufacturer sold in this state to indicate that cigarettes of the manufacturer sold in this state meet the fire safety performance standard established in ORS 476.770 (6).

(2) A manufacturer shall submit to the State Fire Marshal a proposal for marking cigarette packaging. The proposed marking must be in an eight-point font or larger and consist of one of the following:

- (a) Modification of the universal product code to indicate a visible mark printed at or around the universal product code. The mark may consist of alphanumeric or symbolic characters permanently printed, stamped, engraved or embossed in conjunction with the universal product code.
- (b) A visible combination of alphanumeric or symbolic characters permanently stamped, engraved or embossed upon the packaging or cellophane wrapping.
- (c) Printed, stamped, engraved or embossed text indicating that the cigarettes meet the fire safety performance standard established in ORS 476.770 (6).

(3) The State Fire Marshal shall approve or disapprove the proposal for packaging marking. In determining whether to approve or disapprove a proposal for packaging marking, the State Fire Marshal:

- (a) Shall give preference to packaging marking that is consistent with the packaging marking in use and approved for that cigarette variety in the State of New York; and
- (b) Shall approve packaging marking that bears the letters "FSC."
- (4) A proposal for packaging marking is approved unless the State Fire Marshal disapproves the proposal on or before the 10th day after receipt. The approved packaging marking may be used for the cigarette variety upon receipt by the State Fire Marshal of the manufacturer certification for that variety under ORS 476.780.
- (5) A manufacturer may not modify the approved packaging marking unless the modification has been submitted to and approved by the State Fire Marshal. [2007 c.34 §8]

**2023 Oregon Revised Statutes Volume : 14 - Drugs and Alcohol, Fire Protection, Natural Resources Chapter 476 - State Fire Marshal; Protection From Fire Generally Section 476.790 - Providing copies of cigarette certification and illustration of packaging markings.**

(1) A manufacturer selling cigarettes to a wholesale dealer in this state shall provide the wholesale dealer with a copy of the certification for those cigarettes submitted to the State Fire Marshal under ORS 476.780. The manufacturer shall also provide the wholesale dealer with copies of an illustration of the packaging marking required under ORS 476.785. The manufacturer shall supply copies of the illustration to the wholesale dealer in sufficient number to allow one copy for each retail dealer receiving the cigarettes from the wholesale dealer.

(2) A wholesale dealer shall provide a copy of the illustration described in subsection (1) of this section to each retail dealer that receives cigarettes of the manufacturer from the wholesale dealer. A wholesale dealer is not required to provide a retail dealer of the cigarettes of a manufacturer with more than one copy of the illustration for that manufacturer. [2007 c.34 §9]

(1) All forestland that by reason of its lack of adequate fire protection endangers life, forest resources or property is declared to be a public nuisance.

(2) Whenever the forester learns thereof, the forester may direct the owner or operator of such forestland to take proper steps for its protection and advise the owner or operator of means to that end. In case of refusal or neglect by either to take precautions against fire required by law or when so directed by the forester in writing, within such time as is specified in the writing, then the forester may have such work done as the forester considers necessary for the protection of life, forest resources or property, without the necessity of court action.

(3) The cost of work under subsection (2) of this section and the expense of any patrol rendered necessary by the want of adequate protection of such forestland shall be recoverable from the offender by an action prosecuted in the name of the state.

(4) All moneys collected under this section shall be paid into the State Treasury, credited to the State Forestry Department Account and expended as other moneys in that account are expended. [Formerly 477.032; 1965 c.253 §50; 1997 c.274 §2]

**2023 Oregon Revised Statutes Volume : 14 - Drugs and Alcohol, Fire Protection, Natural Resources Chapter 477 - Fire Protection of Forests and Vegetation Section 477.064 - Uncontrolled fire declared nuisance.**

Any fire on any forestland in Oregon burning uncontrolled or without proper action being taken to prevent its spread, notwithstanding its origin, is declared a public nuisance by reason of its menace to life, forest resources or property. The spread of fire in forestland across an ownership boundary is prima facie evidence of fire burning uncontrolled. [Formerly 477.034; 1997 c.274 §3]

(1) Each owner and operator of forestland on which a fire exists or from which it may have spread, notwithstanding the origin or subsequent spread thereof, shall immediately proceed to control and extinguish such fire when its existence comes to the knowledge

of the owner or operator, without awaiting instructions from the forester, and shall continue until the fire is extinguished.

(2) If the forester determines the fire is either burning uncontrolled or the owner or operator does not then have readily and immediately available personnel and equipment to control or extinguish the fire, the forester, or any forest protective association or agency under contract or agreement with the State Board of Forestry for the protection of forestland against fire, and within whose protection area the fire exists, shall summarily abate the nuisance thus constituted by controlling and extinguishing the fire.

(3) An owner may request in writing that the forester employ alternate fire prevention and suppression strategies or techniques on the owner's forestland. The forester may employ some or all of the requested strategies or techniques when, in the judgment of the forester, conditions warrant the use of the alternate strategies or techniques. (1) In case an owner or operator fails to perform the duty required by ORS 477.066, or is willful, malicious or negligent in the origin or subsequent spread of the fire, the actual cost incurred by the forester or a forest protective association or agency in controlling or extinguishing the fire shall be paid by the owner or operator within 90 days after the date on which the first written demand for payment of the actual cost is mailed by the State Forester to the owner or operator. If the actual cost is not paid within such 90-day period, such amount shall bear interest at 10 percent per year from the date on which the first written demand for the payment of the actual costs was mailed by the State Forester and the actual cost together with such interest may be recovered from such owner or operator by an action prosecuted in the name of the State of Oregon, or such forest protective association or agency, or both.

(2) An itemized statement of the actual cost incurred by the forester or association or agency, or both, certified to by the forester, shall be accepted as prima facie evidence of the actual cost in any proceeding authorized by this section.

(3) The actual cost in cases covered by ORS 477.066 shall constitute a general lien upon the real and personal property of such owner or operator. A written notice of the lien, containing a description of the property and a statement of the actual cost, shall be certified under oath by the forester or any warden and filed in the office of the county clerk of the county in which the lands and personal property are situated within 12 months after the calendar year within which the fire originated, and may be foreclosed in the manner provided by law for foreclosure of liens for labor and material. In any proceeding to foreclose a lien created under this subsection, recovery for the plaintiff shall include, in addition to the amount of the actual cost, interest on such amount at the rate of 10 percent per year from the date of the filing of the written notice of the lien.

(4) Upon request of the forester, the district attorney for the district in which the lands and personal property are situated or the Attorney General shall prosecute such action or foreclose the lien in the name of the State of Oregon or such forest protective association or agency, or both. Liens provided for in this section shall cease to exist unless suit for foreclosure is instituted within 12 months from the date of filing under subsection (3) of this section.

(5) In any action under subsection (1) of this section to recover actual cost and in any proceeding to foreclose any lien created by subsection (3) of this section, the court shall award, in addition to costs and disbursements, reasonable attorney fees at trial and on appeal to the prevailing party. - (2) The proclamation shall designate the area to which and the period during which the restrictions apply, and require that the area be subject to use only upon the condition that entrants comply with all the restrictions for the area.
- (3) The proclamation shall designate the type of closure as:
- (a) Regulated closure;
  - (b) Permit closure; or
  - (c) Absolute closure.
- (4) For the purpose of consistency and coordination between all affected agencies in the administration of forestland restrictions, a plan shall be developed by the forester, in cooperation with federal, state and local governmental agencies, landowners and organizations affected by the restrictions. The primary objective of the plan is uniformity of regulations regardless of land ownership. The plan must recognize variation in fire danger and must specify levels of closure by unique but easily recognizable geographic boundaries. - (1) Regulated closures require entrants into designated areas to comply with the requirements set forth in the proclamation under ORS 477.535, which requirements in the judgment of the forester are necessary to prevent danger to life, forest resources or property.
- (2) Permit closures make the area subject to entry only through permit issued by the forester. The permit shall contain requirements which in the judgment of the forester are necessary to prevent danger to life, forest resources or property. The forester may, during periods of fire hazard conditions, refuse, suspend, revoke or restrict such permits.

(3) Absolute closures restrict the areas to all forms of use and shall be designated only during periods of extreme fire hazard conditions endangering life, forest resources or property. [Formerly 477.158; 1967 c.429 §47; 1969 c.204 §6; 1997 c.274 §16]

(1) Following the issuance of a permit pursuant to ORS 477.625, and after slashing has been created in an operation area inside or within one-eighth of one mile of a forest protection district, the forester may make a determination if such slashing and debris exists on the operation area in sufficient quantity and arrangement as to constitute an additional fire hazard that endangers life, forest resources or property, and if such area is in need of additional work or protection to reduce, abate or offset the additional fire hazard. Whenever practical, the forester shall make the determination referred to in this subsection during the administration and enforcement of the Oregon Forest Practices Act.

(2) If the forester determines that an additional fire hazard exists on the operation area sufficient to endanger life, forest resources or property, and that such area is in need of additional work or protection to reduce, abate or offset the additional fire hazard, the forester shall so notify the landowner and operator or their representatives in writing of such determination. Pursuant to rules promulgated by the State Forester, the notice to the landowner or operator shall contain provisions for offsetting the additional fire hazard by burning, improvements, extra protection or other means. The notice shall also specify a reasonable time for completion of the provisions contained therein.

(3) When the forester finds that the provisions set forth in subsection (2) of this section have been complied with or that the additional hazard has been, in the opinion of the forester, sufficiently reduced by other means to offset the hazard, the forester shall immediately issue to the operator or landowner a release from all obligations imposed by ORS 477.120 (2)(c).

(4) If the forester determines that an additional fire hazard exists, the forester shall, at the request of the owner or operator, with the approval of the owner, grant a release upon payment by the owner or operator of such sum of money as the forester finds necessary to provide additional protection or means necessary to reduce or offset the additional hazard created by such slashing and other debris. In no event may this sum exceed the least of:

(a) \$6 for each 1,000 board feet of timber harvested in an operation;

(b) The forester's estimated cost of reducing or providing other means to offset the additional hazard; or

(c) \$10 for each acre in a stand improvement operation where no timber is harvested.

(5) Moneys received under subsection (4) of this section shall be placed in the State Treasury, credited to the State Forestry Department Account and used exclusively for the purposes of forest protection within the district.

(6) Any owner of forestland may make written request to the forester to assume all obligations for the disposal or reduction of any additional fire hazard determined to exist thereon. If the forester then determines that the owner can comply with such obligation, the forester shall immediately issue to all other persons involved a written release of such obligations.

(7) Any order or determination made by the forester pursuant to this section is final unless modified or vacated in an appeal to the State Board of Forestry taken within 30 days after issuance of the order. (1) Every person conducting an operation inside or within one-eighth of one mile of a forest protection district that uses fire in any form or power-driven machinery shall first obtain from the forester a written permit, which shall require that the holder of the permit:

(a) Take reasonable precautions that in the judgment of the forester are necessary in the use of fire and power-driven machinery to prevent the spread of fire on or from an operation area.

(b) Designate a representative authorized to act on all matters having to do with fire control, which representatives shall be available at all times by direct means of communication with the forester.

As used in this subsection "routine road maintenance" means grading, cleaning ditches, culvert cleaning, spot rocking or mechanical brushing along the roadside to maintain visibility.

(3)(a) The forester may waive the requirement to obtain a written permit under this section when in the judgment of the forester the operation will not constitute a fire hazard sufficient to justify the requirement.

(b) Waiver of the requirement to obtain a written permit under this section does not relieve the owner and operator of the responsibility for complying with other applicable duties, requirements or penalties of this chapter. [Formerly 477.286; 1991 c.634 §1; 1997 c.274 §21]

**2023 Oregon Revised Statutes Volume : 14 - Drugs and Alcohol, Fire Protection, Natural Resources Chapter 478 - Rural Fire Protection Districts Section 478.880 - Legislative findings.**

The Legislative Assembly finds and declares that:

(1) The best interest of the state is served by providing financial incentives for the installation of fire safety systems in multifamily housing.

(2) The design and nature of multifamily housing creates a higher fire risk than the risk to single family housing and exposes tenants to fire risks that are not within the control of the tenants.

(3) The presence of fire safety systems helps to defray costs for fire district equipment and equipment maintenance.

(4) Although the state building code allows local jurisdictions to require the installation of fire safety systems in new construction on a cost-neutral basis, there is no equivalent program for retrofitting or remodeling existing multifamily structures.

(5) A fire safety incentive program serves the purpose of providing financial incentive for the installation of fire safety systems in existing multifamily housing. [2001 c.614 §1]

Note:

478.880 and 478.885 were enacted into law by the Legislative Assembly but were not added to or made a part of ORS chapter 478 or any series therein by legislative action. See Preface to Oregon Revised Statutes for further explanation.

**2023 Oregon Revised Statutes Volume : 14 - Drugs and Alcohol, Fire Protection, Natural Resources Chapter 478 - Rural Fire Protection Districts Section 478.885 - Payment or repayment for cost of fire safety system installation in multifamily housing.**

(1) As used in this section:

(a) "District" means a rural fire protection district organized pursuant to ORS chapter 478.

(b) "Fire safety system" means a device or series of devices that protects structures from damage or destruction by fire, protects people from injury by fire or minimizes the effects of fire. "Fire safety system" includes, but is not limited to, automatic fire sprinkler systems.

(c) "Multifamily housing" means a structure established primarily to provide residential spaces and that provides more than one living unit. "Multifamily housing" does not include nursing homes, adult foster homes, hospitals, motels or hotels, dormitories or state institutions.

(d) "Owner" includes a purchaser under a recorded instrument of sale.

(2) A district may, by ordinance, establish a program that pays or repays to landlords part of the costs of installing fire safety systems in multifamily housing existing within the district on the effective date of the ordinance. Except as provided in this subsection, the district may establish the parameters of the program. A payment or repayment rate under the program may not exceed 50 percent of the cost of installing the fire safety system. The payment or repayment amount available for a property may not exceed the total amount paid during the preceding 10 years for all property taxes on the property, less any payment or repayment amount already provided for fire safety system installation on the property. The program must provide for the owner of the multifamily housing to apply on a form approved by the district. The program must include a uniform process for the evaluation of an application submitted by the owner of the multifamily housing. The uniform process must provide for a public hearing to determine whether the property qualifies for payment or repayment by the district. [2001 c.614 §2]

**2023 Oregon Revised Statutes Volume : 14 - Drugs and Alcohol, Fire Protection, Natural Resources Chapter 478 - Rural Fire Protection Districts Section 478.924 - Approval of code by city or county required.**

The provisions of a fire prevention code adopted by a district after October 4, 1977, shall not apply within any city or county within the district unless the governing body of the city or county approves the fire code by resolution. [1977 c.292 §5]

**2023 Oregon Revised Statutes Volume : 14 - Drugs and Alcohol, Fire Protection, Natural Resources Chapter 478 - Rural Fire Protection Districts Section 478.927 - Building permit review for fire prevention code.**

A district adopting a fire prevention code shall provide plan review at the agency of the city or county responsible for the issuance of building permits for the orderly administration of that portion of the fire prevention code that requires approval prior to the issuance of building permits. [1977 c.292 §4]

**2023 Oregon Revised Statutes Volume : 14 - Drugs and Alcohol, Fire Protection, Natural Resources Chapter 478 - Rural Fire Protection Districts Section 478.930 - Violation of code; failure to remove hazards; burning waste without permit prohibited.**

When a district has adopted a fire prevention code as provided in ORS 478.910:

- (1) No person shall violate the provisions of the code or fail to remove hazards found on inspection within the time set by the inspecting officer, after written notice to either the owner or occupant of the premises.
- (2) No person shall burn waste materials or trash in an unguarded manner without a permit, when a permit is required by the district code or this chapter. [Amended by 1969 c.667 §56]

**2023 Oregon Revised Statutes Volume : 14 - Drugs and Alcohol, Fire Protection, Natural Resources Chapter 478 - Rural Fire Protection Districts Section 478.960 - Burning of certain materials permitted only with permission of fire chief; damage or injury; burning schedules and restrictions.**

- (1) No one, within the boundaries of a district, shall cause or permit to be initiated or maintained on one's own property, or cause to be initiated or maintained on the property of another, any open burning of commercial waste, demolition material, domestic waste, industrial waste, land clearing debris or field burning without first securing permission from the fire chief of the district and complying with the direction of the fire chief. A deputy of a fire chief has the power to perform any act or duty of the fire chief under this section.
- (2) The fire chief shall prescribe conditions upon which permission is granted and which are necessary to be observed in setting the fire and preventing it from spreading and endangering life or property or endangering the air resources of this state. The Environmental Quality Commission shall notify the State Fire Marshal of the type of and time for burning to be allowed on each day under schedules adopted pursuant to ORS 468A.570 and ORS 468A.595. The State Fire Marshal shall cause all fire chiefs and their deputies in the affected area to be notified of the type and time for burning to be allowed on each day with updating messages each day as required. A fire chief or deputy shall grant permission only in accordance with the schedule of the Environmental Quality Commission but may reduce hours to be allowed for burning if necessary to prevent danger to life or property from fire. The State Fire Marshal may refuse, revoke or postpone permission when necessary in the judgment of the State Fire Marshal to prevent danger to life or property from fire, notwithstanding any determination by the fire chief.
- (3) Nothing in this section relieves a person starting a fire from responsibility for providing adequate protection to prevent injury or damage to the person or property of another. If such burning results in the escape of fire and injury or damage to the person or property of another, such escape and damage or injury constitutes prima facie evidence that the burning was not safe.
- (4) Within a district, no person shall, during the fire season declared under ORS 477.505, operate any equipment in forest harvesting or agricultural operations powered by an internal combustion engine on or within one-eighth of one mile of forestland unless each piece of equipment is provided with a fire extinguisher of sufficient size and capacity and with such other tools and fire-fighting equipment as may be reasonably required by the fire chief of the district. The provisions of this subsection do not apply to machinery regulated by ORS chapter 477.
- (5) No person shall dispose of any building or building wreckage within a district by fire without having first secured permission therefor from the fire chief. No person shall refuse to comply with any reasonable requirements of the fire chief as to the safeguarding of such fire from spreading.
- (6) This section is not intended to limit the authority of a district to adopt a fire prevention code as provided in ORS 478.910 to 478.940 or to issue permits when the burning is done by mechanical burners fired by liquefied petroleum gas.
- (7) The fire chief shall maintain records of all permits and the conditions thereof, if any, that are issued for field burning under this section and shall submit at such times, as the Environmental Quality Commission shall require such records or summaries thereof to the commission. The Environmental Quality Commission shall provide forms for the reports required under this subsection.
- (8) Notwithstanding any other provision of this section:
  - (a) A permit is required for field burning authorized pursuant to ORS 468A.550 to 468A.620 and 468A.992.
  - (b) For a permit for the propane flaming of mint stubble, the fire chief may only prescribe conditions necessary to prevent the spread of fire or to prevent endangering life or property and may refuse, revoke or postpone permission to conduct the propane flaming only when necessary to prevent danger to life or property from fire. [1955 c.469 §§1,2; 1959 c.363 §16; 1967 c.420 §1; 1967 c.438 §1; 1969 c.613 §3; 1969 c.667 §57; 1971 c.563 §9; 1973 c.832 §7b; 1975 c.635 §4; 1979 c.321 §1; 1989 c.615 §2; 1991 c.920 §22; 1997 c.274 §40; 1997 c.473 §6; 2009 c.790 §2]

**2023 Oregon Revised Statutes Volume : 14 - Drugs and Alcohol, Fire Protection, Natural Resources Chapter 478 - Rural Fire Protection Districts Section 478.965 - Recovery by district of costs of suppressing unlawful fire; attorney fees.**

- (1) If the fire-fighting apparatus or personnel, or either of a district, are required to respond and be used actively or on a standby basis in connection with the extinguishment or control of a fire that has been started or allowed to spread in willful violation of ORS

478.960 (1) to (5), the person responsible therefor shall be liable to the district furnishing such apparatus or personnel, or both, for the actual costs incurred by the district in controlling, extinguishing or patrolling the fire. Such costs may be recovered in an action prosecuted in the name of the district. The court may award reasonable attorney fees to the district if the district prevails in an action under this section. The court may award reasonable attorney fees to a defendant who prevails in an action under this section if the court determines that the district had no objectively reasonable basis for asserting the claim or no reasonable basis for appealing an adverse decision of the trial court.

(2) An itemized statement of the actual costs incurred by the district, certified under oath by the treasurer of the district, shall be accepted as prima facie evidence of such costs in the action authorized by this section. [1967 c.420 §6; 1969 c.667 §58; 1981 c.897 §55; 1995 c.696 §24]

If any person is aggrieved by a decision made upon inspection under authority of ORS 455.148, 455.150 or 479.510 to 479.945 and 479.995 of an electrical product or electrical inspection, the person may appeal the decision. The following apply to an appeal under this section:

- (1) An appeal under this section is subject to ORS chapter 183.
- (2) An appeal under this section must be made first to the Chief Electrical Inspector of the Department of Consumer and Business Services. The decision of the Chief Electrical Inspector may be appealed to the Electrical and Elevator Board. The decision of the Electrical and Elevator Board may be appealed to the Director of the Department of Consumer and Business Services only if codes in addition to the electrical code are at issue.
- (3) If the Electrical and Elevator Board determines that a decision by the Chief Electrical Inspector is a major code interpretation, then the inspector shall distribute the decision in writing to all public and private electrical inspection authorities in the state. The decision shall be distributed within 60 days after the board's determination, and there shall be no charge for the distribution of the decision. As used in this subsection, a "major code interpretation" means a code interpretation decision that affects or may affect more than one job site or more than one inspection jurisdiction.
- (4) If an appeal is made under this section, an inspection authority shall extend the electrical plan review deadline by the number of days it takes for a final decision to be issued for the appeal.
- (5) Unless the department determines that the electrical product or electrical installation presents an immediate fire or life safety hazard, a person may operate an electrical product or electrical installation that is the subject of an appeal under this section until the appeal process is complete. If the department determines that an immediate fire or life safety hazard exists and the product or installation may not be operated during appeal, the department shall provide the person with a written report detailing the problems found by the department. If a determination is made under this subsection that products described in ORS 479.540 (11) may not be operated during appeal, that determination may be appealed immediately under the procedure established in subsection (2) of this section without first completing any appeal procedure established by a city or county. **2023 Oregon Revised StatutesVolume : 14 - Drugs and Alcohol, Fire Protection, Natural ResourcesChapter 479 - Protection of Buildings From Fire; Electrical Safety LawSection 479.855 - City and county inspection and enforcement programs.**

- (1) In addition to the provisions of ORS 455.010 to 455.310 and 455.410 to 455.740, any inspection and enforcement program established by a city or county under ORS 455.148 or 455.150 is subject to the provisions of this section. Where the provisions of this section conflict with provisions under ORS 455.010 to 455.310 and 455.410 to 455.740, the provisions of this section shall control.

(2)(a) Except as otherwise provided in this section, any city or county that wishes to establish a program under ORS 455.150 to enforce and administer ORS 479.510 to 479.945 and 479.995, including a program for inspection under a master permit pursuant to ORS 479.560 (3), must first make application to the Department of Consumer and Business Services. The program for inspection under a master permit shall be delegated separately from the general electrical program authorization. The department may authorize the city or county to administer and enforce the provisions of this section and ORS 479.540 and 479.560 if it finds that the city or county can comply with the minimum standards and meet the qualifications for inspections, permit applications and other matters to assure adequate administration and enforcement of electrical inspection programs. The department may authorize the city or county to administer and enforce ORS 479.510 to 479.945 and 479.995 if the department finds that the city or county:

(A) Can comply with minimum standards adopted by the Electrical and Elevator Board by rule for inspections, permit applications and other matters to assure adequate administration and enforcement of ORS 479.510 to 479.945 and 479.995.

(B) Can conduct the electrical plan review, if required by the city or county, in a timely manner and by qualified personnel who meet the standards adopted by rule by the board.

(b) The city or county must assume full responsibility allowed under ORS 455.010 to 455.310 and 455.410 to 455.740 for the enforcement, inspection and administration of the electrical safety laws under that specialty code and ORS 479.510 to 479.945 and 479.995. This subsection does not require a city or county to assume full responsibility for enforcement, inspection and administration of the electrical safety laws if the only enforcement performed by the city or county involves manufactured dwelling electrical utility connections.

(3) The department, subject to ORS chapter 183, shall revoke any authority of a city or county to carry on inspections, enforcement or administration of electrical installations and electrical products under ORS 455.148 or 455.150 if the department determines that the city or county fails to comply with standards adopted by the board or otherwise is not effectively carrying out duties assumed by the city or county under this section.

(4)(a) Except as provided in paragraph (b) of this subsection, a city or county may not contract with competing electrical contractors to provide permit inspection of electrical installations.

(b) A city or county may contract with competing electrical contractors to provide permit inspection of electrical installations on a temporary basis by a supervising electrician if:

(A) Emergency circumstances exist; and

(B) The city or county has requested that the department perform permit inspections and the department is unable to respond in a timely manner.

(c) Nothing in this subsection prohibits a city or county from contracting with another city or county to perform permit inspections of electrical installations by a supervising electrician.

(5) A city or county that performs electrical installation inspections shall perform license enforcement inspections as a part of routine installation inspections. [1981 c.815 §37; 1987 c.575 §1; 1991 c.368 §3; 1991 c.373 §1; 1991 c.439 §1; 1993 c.451 §3; 2001 c.573 §20]

(b) Who is employed by an industrial plant may design, plan and lay out electrical installations for that industrial plant.

(2) The Director of the Department of Consumer and Business Services, after consultation with the Electrical and Elevator Board and the State Board of Examiners for Engineering and Land Surveying, may adopt rules designating classes of board licensees that may design, plan and lay out noncomplex electrical installations. (1) The installer shall notify the State Fire Marshal, before the last day of each month, of all new installations made during the preceding month of containers or receptacles for liquefied petroleum gas, including installations for private homes and apartments. The installer shall certify on a form provided by the State Fire Marshal that all of the new installations are duly and properly reported. The State Fire Marshal may require that the notification include the location and description of the installation and the name of the user. All fees due and payable must accompany the notification. The replacement of empty containers or receptacles with other containers constructed in accordance with United States Department of Transportation specifications is not a new installation or change in the original installation that requires notification to the State Fire Marshal or necessitates further inspection of the installation. The State Fire Marshal shall collect from the installer an installation fee of \$50 for each tank installed or for all tanks at the installation if the total combined capacity is 200 gallons or less. The State Fire Marshal or deputies of the fire marshal or assistants shall inspect a reasonable number of the installations and maintain a record of the inspections in the records of the Department of the State Fire Marshal.

(2) In addition to any installation or inspection fee, the State Fire Marshal may charge a plan review fee, not to exceed \$100, for any liquefied petroleum gas container and receptacle plan review required under a uniform fire code prescribed by the State Fire Marshal by rule.

(3) After the initial installation, liquefied petroleum gas containers may be inspected once every 10 years except when changes have been made in the original installation. An installer making changes must notify the State Fire Marshal of the changes in the same manner provided in this section for new installations. The State Fire Marshal shall collect from the owner a fee of \$50 for the inspection of each container. The manner of inspection, requirement of corrections, satisfaction of requirements and collection of fees due and payable must conform with the provisions of ORS 480.410 to 480.460 for new installations. Upon request of the State Fire Marshal, LP gas installation licensees shall furnish a list of the locations of 10-year old installations that they service.

(4) If, upon inspection of any tank, the new installation does not comply with the requirements of the State Fire Marshal, the State Fire Marshal shall instruct the installer as to what corrections are necessary for compliance with the State Fire Marshal's requirements. The installer of the new installation shall, within the time set by the State Fire Marshal, not to exceed 60 days after notification, notify the State Fire Marshal that the new installation complies with the requirements of the fire marshal. If the installer fails to notify the State Fire Marshal, or the State Fire Marshal has reason to believe that the corrections have not been made, the State Fire Marshal shall reinspect the new installation and shall collect from the installer an additional fee of \$125. The user, not the installer, shall pay the additional fee resulting from actions of the user that require correction to achieve compliance with the requirements of the State Fire Marshal.

(5) A person who receives notice from the State Fire Marshal must correct any improper installation within the time set by the State Fire Marshal, not to exceed 60 days after receipt of the notice.

(6) If the fees provided for in this section are due and payable and are not paid within 30 days after service of written notice by the State Fire Marshal therefor, or if the installer fails to notify the State Fire Marshal by the last day of the month succeeding the month a new installation is made or a change is made requiring an inspection, the fees are delinquent and a penalty equal to the greater of 10 percent of the fee amount or \$30, is imposed for the delinquency. The State Fire Marshal shall collect all fees and penalties in the name of the State of Oregon in the same manner that other debts are collected.

(7) The provisions of this section do not apply to liquefied petroleum gas installations if made entirely within the jurisdiction of a governmental subdivision granted the exemption provided by ORS 476.030 (3) and written evidence of the licensing of the installation by the approved authority is submitted to the State Fire Marshal. The provisions of this section do not apply to LP gas installations made in manufactured dwellings that are constructed or altered in accordance with applicable rules of the Department of Consumer and Business Services. The provisions of this section do not apply to LP gas installations in a recreational vehicle as defined in ORS 174.101. Provided that if the Board of Boiler Rules finds that there is a variation from the minimum safety standards which is dangerous to health or safety, it may order that all vessels having a like variation be brought into conformity with the rules created under this section, or adopted after July 1, 1961, without variation.

(3) The Board of Boiler Rules shall adopt minimum safety standards for pressure piping substantially equal to the published codification of standard engineering practices and formulae known as the "Code for Pressure Piping" of the American Society of Mechanical Engineers, numbered B 31.1, B 31.3, B 31.5, B 31.7 and B 31.9 together with the published revisions and interpretations thereof. However, before suspending or revoking a permit, the department shall first notify the person concerned of the department's intention. The notice must be in writing and advise the person concerned of the right to appeal in writing within 10 days and that the appeal will be heard by the Board of Boiler Rules. If there is a timely appeal, the department may not suspend or revoke the permit pending the appeal unless the reason for suspension or revocation constitutes an immediate menace to health or safety or the person concerned fails to prosecute an appeal with diligence.

(4)(a) Except as provided in ORS 480.510 to 480.670, a person may not operate a boiler or pressure vessel unless a valid temporary operation authorization or valid operating permit issued under this section is attached to the boiler or pressure vessel or posted in a conspicuous place in the room where the boiler or pressure vessel is located.

(b) A person may not permit or suffer the operation of a boiler or pressure vessel on property the person owns, controls, manages or supervises unless a valid temporary operation authorization or valid operating permit issued under this section is attached to the boiler or pressure vessel or posted in a conspicuous place in the room where the boiler or pressure vessel is located.

(1) May accept, from whatever source, appropriations, gifts or grants of money or other property for the purposes of wildlife management, and use such money or property for wildlife management purposes.

(2) May sell or exchange property owned by the state and used for wildlife management purposes when the commission determines that such sale or exchange would be advantageous to the state wildlife policy and management programs.

(3) May acquire, introduce, propagate and stock wildlife species in such manner as the commission determines will carry out the state wildlife policy and management programs.

(4) May by rule authorize the issuance of such licenses, tags and permits for angling, taking, hunting and trapping and may prescribe such tagging and sealing procedures as the commission determines necessary to carry out the provisions of the wildlife laws or to obtain information for use in wildlife management. Permits issued pursuant to this subsection may include special hunting permits for a person and immediate family members of the person to hunt on land owned by that person in areas where permits for deer or elk are limited by quota. As used in this subsection, "immediate family members" means spouses in a marriage, parents, brothers, brothers-in-law, sisters, sisters-in-law, sons, sons-in-law, daughters, daughters-in-law, stepchildren and grandchildren. A landowner who is qualified to receive landowner preference tags from the commission may request two additional tags for providing public access and two additional tags for wildlife habitat programs. This request shall be made to the Access and Habitat Board with supporting evidence that the access is significant and the habitat programs benefit wildlife. The board may recommend that the commission grant the request. When a landowner is qualified under landowner preference rules adopted by the commission and receives a controlled hunt tag for that unit or a landowner preference tag for the landowner's property and does not use the tag during the regular season, the landowner may use that tag to take an antlerless animal, when approved by the State Department of Fish and Wildlife, to alleviate damage that is presently occurring to the landowner's property.

(5) May by rule prescribe procedures requiring the holder of any license, tag or permit issued pursuant to the wildlife laws to keep records and make reports concerning the time, manner and place of taking wildlife, the quantities taken and such other information as the commission determines necessary for proper enforcement of the wildlife laws or to obtain information for use in wildlife management.

- (6) May establish special hunting and angling areas or seasons in which only persons less than 18 years of age or over 65 years of age are permitted to hunt or angle.
- (7) May acquire by purchase, lease, agreement or gift real property and all appropriate interests therein for wildlife management and wildlife-oriented recreation purposes.
- (8) May acquire by purchase, lease, agreement, gift, exercise of eminent domain or otherwise real property and all interests therein and establish, operate and maintain thereon public hunting areas.
- (9) May establish and develop wildlife refuge and management areas and prescribe rules governing the use of such areas and the use of wildlife refuge and management areas established and developed pursuant to any other provision of law.
- (10) May by rule prescribe fees for licenses, tags, permits and applications issued or required pursuant to the wildlife laws, and user charges for angling, hunting or other recreational uses of lands owned or managed by the commission, unless such fees or user charges are otherwise prescribed by law. No fee or user charge prescribed by the commission pursuant to this subsection shall exceed \$250.
- (11) May enter into contracts with any person or governmental agency for the development and encouragement of wildlife research and management programs and projects.
- (12) May perform such acts as may be necessary for the establishment and implementation of cooperative wildlife management programs with agencies of the federal government.

- (14) May by rule prescribe fees for falconry licenses issued pursuant to the wildlife laws, unless such fees are otherwise prescribed by law. Fees prescribed by the commission pursuant to this subsection shall be based on actual or projected costs of administering falconry regulations and shall not exceed \$250.
- (15) May establish special fishing and hunting seasons and bag limits applicable only to persons with disabilities.
- (16) May adopt optimum populations for deer and elk consistent with ORS 496.012. These population levels shall be reviewed at least once every five years.
- (17) Shall establish a preference system so that individuals who are unsuccessful in controlled hunt permit drawings for deer and elk hunting have reasonable assurance of success in those drawings in subsequent years. In establishing the preference system, the commission shall consider giving additional preference points to persons who have been issued a resident annual pioneer combination license pursuant to ORS 497.132 or resident disabled veteran hunting license under ORS 497.102.
- (18) May sell advertising in State Department of Fish and Wildlife publications, including annual hunting and angling regulation publications.
- (19) May, notwithstanding the fees required by ORS 497.112, provide free hunting tags to an organization that sponsors hunting trips for terminally ill children. Except as provided under ORS 497.116, the State Department of Fish and Wildlife may not issue more than 15 tags annually under this subsection.
- (20) Shall, after consultation with the State Department of Agriculture, adopt rules prohibiting the use of the World Wide Web, other Internet protocols or broadcast or closed circuit media to remotely control a weapon for the purpose of hunting any game bird, wildlife, game mammal or other mammal. The rules may exempt the State Department of Fish and Wildlife or agents of the department from the prohibition.
- (21) May adopt rules establishing a schedule of civil penalties, not to exceed \$6,500 per violation, for violations of provisions of the wildlife laws or rules adopted by the commission under the wildlife laws. - (23)(a) May by rule establish annual and daily Columbia Basin salmon, steelhead and sturgeon recreational fishing endorsements with a fee not to exceed \$9.75 per annual license and \$1 per day per daily license. An endorsement is required to fish for salmon, steelhead or sturgeon in portions of the Columbia Basin as designated by rule and is in addition to and not in lieu of angling licenses and tags required under the wildlife laws. Amounts collected as fees under this subsection must be deposited in the Columbia River Fisheries Enhancement Fund established under section 7, chapter 672, Oregon Laws 2013.
- (b) Notwithstanding paragraph (a) of this subsection, if the commission adopts rules that decrease fishery impacts or the share of salmon allocated to Columbia River recreational fisheries or that expand the areas and seasons where nontribal gillnets are permitted in mainstem lower Columbia River nontribal fisheries as compared to regulatory restrictions in place from 2017 to 2020, the commission may not require or collect the endorsements, beginning in the following calendar year.
- (24) May by rule establish multiyear licenses and may prescribe fees for such licenses. Fees prescribed by the commission for multiyear licenses may provide for a discount from the annual license fees that would otherwise be payable for the period of time covered by the multiyear license.
- (25) May by rule establish a program to offer unique fishing opportunities through drawings, raffles or auctions and charge application and participation fees for the program. Section 2, chapter 460, Oregon Laws 1995, provides:

Sec. 2.

Notwithstanding any other provision of the wildlife laws, the following provisions apply with regard to the issuance and use of landowner preference tags referred to in ORS 496.146 (4):

(1) Landowner preference tags shall be issued for the hunting of deer, elk or antelope.

(2) Landowner preference tags may be used only for hunting on the landowner's property.

(3) Subject to subsection (6) of this section, landowner preference tags for the hunting of deer or elk may be transferred to any person of the landowner's choosing and shall be used for the taking of antlerless animals.

(4) Landowner preference tags for the hunting of antelope are not transferable and may not be used for the taking of buck antelope.

(5) Each landowner preference tag for the hunting of deer may be used to take two antlerless animals before, during or after the hunting season for which the tags are valid for the purpose of alleviating damage that is presently occurring to the landowner's property, in accordance with such rules as the State Fish and Wildlife Commission may adopt.

(6) Landowner preference tags for the hunting of deer or elk may be transferred to a person of the landowner's choosing as follows:

(a) A landowner who is issued only one tag may not transfer that tag.

(b) A landowner who is issued two or more tags may transfer not more than 50 percent of the tags to a person who is not an immediate family member, as defined in ORS 496.146 (4). If the calculation of the number of tags eligible for transfer under the provisions of this paragraph results in a fraction, the commission shall round up the number of tags to the next whole number.

(7)(a) As specified pursuant to a formula determined by the commission by rule, the number of landowner preference tags issued for mule deer must be based upon the management, research and habitat needs set forth in the wildlife management plan for mule deer.

(b) If the population of mule deer in a wildlife management unit is greater than the goal specified in the wildlife management plan for mule deer, a landowner who is issued a landowner preference tag is eligible, pursuant to criteria established by rule of the commission, for the number of tags that corresponds to the number of acres that landowner has registered with the State Department of Fish and Wildlife for participation in the program.

(c) The commission may specify by rule a formula for determining the number of landowner preference tags that are available for controlled hunts for mule deer in a wildlife management unit in which the population of mule deer is less than the goal specified for that wildlife management unit in the wildlife management plan for mule deer.

(8) Landowners shall pay the applicable fee under ORS 497.061 to register for participation in the program.

(9) A landowner shall pay the applicable fee under ORS 497.061 to modify the landowner's tag distribution. [1995 c.460 §2; 2001 c.227 §1; 2009 c.349 §1; 2009 c.832 §2a; 2013 c.363 §1; 2015 c.779 §10; 2021 c.208 §1]

Notwithstanding any other provision of the wildlife laws, the State Fish and Wildlife Commission by rule shall establish a system for allocating hunting permits that are limited by maximum number for the taking of deer and elk by nonresident hunters so that a number equal to one-half of the number of those permits issued to nonresident hunters in the previous year are made available to the holders of registrations issued pursuant to ORS chapter 704, and who are certified pursuant to ORS 704.060, for the use of the clients of those registration holders. Such a system shall include but not be limited to:

- (1) Provisions to prevent misuse of the permits by the registrant or by employees of the registrant.

Upon a change in the use of such land from farm use, the commission may acquire such property, and interests therein, by exercise of the power of eminent domain without first obtaining legislative approval therefor. As used in this section, "farm use" has the meaning for that term provided in ORS 215.203.

(2) For the purposes of this section, "transportation" means any method of helping anadromous fish to pass dams and other obstacles so as to reduce the mortality associated with passage.

(3) Nothing in subsection (1) of this section prevents the cooperation of the commission with the federal government in programs financed pursuant to ORS 506.405. [1977 c.653 §2]

- (3) Considers elk overpopulation.
- (4) Limits the use of damage tags to taking antlerless elk.
- (5) Limits the use of damage tags to taking elk on property owned, leased or rented by the landowner complaining of elk damage or on property owned, leased or rented by a business entity that includes the landowner as a principal partner or shareholder.
- (6) Allows exchange of unused general season elk tags or controlled hunt elk tags for damage tags.
- (7) Does not impose a limit on the number of total damage tags available for each landowner, except that no more than five damage tags may be valid at any one time.
- (8) Does not impose a minimum acreage requirement for landowner participation.

- (9) Allows landowners to register for participation in the program at any time prior to the issuance of damage tags.
- (10) Establishes a \$30 fee for landowners to register for participation in the program.

- (12) Authorizes department biologists to sell and exchange damage tags.
- (13) Authorizes department biologists to establish the period of validity for damage tags through negotiation with landowners.

- (1) After investigation of the supply and condition of wildlife, the State Fish and Wildlife Commission, at appropriate times each year, shall by rule:

As used in this subsection, "predatory animal" has the meaning for that term provided in ORS 610.002.
- (4) In carrying out the provisions of this section, before prescribing the numbers of deer and elk to be taken, the commission shall consider:
  - (a) The supply and condition of deer and elk herds;
  - (b) The availability of forage for deer, elk and domestic livestock on public and private range and forest lands;

(1) Subject to rules prescribed by the State Fish and Wildlife Commission, in rendering recompensable assistance to an agency, the State Department of Fish and Wildlife shall:

(a) For fiscal years beginning on or after July 1, 2015, and before July 1, 2019, track and prepare statements reporting the number of hours spent by department personnel performing recompensable assistance for any executive department agency, including an hourly rate that would be charged, based on the class of department personnel performing the services. The department shall send statements to the agency receiving services, but may not charge for services. This paragraph does not prohibit the department from charging another state agency for services pursuant to an interagency agreement that is in effect between the department and the other agency at any time during the period beginning July 1, 2015, and ending July 1, 2021.

(b) For fiscal years beginning on or after July 1, 2019, track and prepare statements reporting the number of hours spent by department personnel performing recompensable assistance for any executive department agency, including an hourly rate that would be charged, based on the class of department personnel performing the services.

(2)(a) The charges for which statements are prepared and, after July 1, 2019, billed include, but are not limited to, costs of providing professional, investigatory, administrative and clerical services and capital outlay.

(b) An executive department agency may not submit an invoice to a private entity, a member of the public or an applicant for a state-issued permit for services performed by the department, unless the invoice is authorized by a statute, rule or interagency agreement executed:

(A) Prior to June 25, 2015; or

(B) Following consultation with persons representative of those private entities, members of the public or permit applicants that are subject to invoicing under this paragraph.

(3) As used in this section:

(a) "Agency" means any department, board, commission, agency or officer of the executive department.

(b) "Executive department" has the meaning given that term in ORS 174.112.

The State Department of Fish and Wildlife shall estimate in advance the expenses that the department will incur during a biennium under ORS 496.167, and shall render to executive department agencies and other entities described in ORS 496.167 an invoice for their share of such expenses for periods within the biennium and in sufficient amounts to provide reasonable cash operating requirements for the department within the biennial period. Each agency or other entity described in ORS 496.167 shall pay to the credit of the department such invoice as an administrative expense from funds or appropriations available to the invoiced agency or entity in the same manner as other claims against the state are paid. If the estimated expenses for the agency or other entity described in ORS 496.167 are more or less than actual expenses for the period covered by the invoice, the difference shall be reflected in the next following estimate of expenses. **2023 Oregon Revised Statutes Volume : 14 - Drugs and Alcohol, Fire Protection, Natural Resources Chapter 496 - Application, Administration and Enforcement of Wildlife Laws Section 496.169 - Citizen involvement for wildlife management on private lands.**

The Legislative Assembly finds, in the interest of all Oregonians, a necessity to improve Oregon's resource access and wildlife habitat through the further involvement of its citizens, through voluntary partnership between the State Department of Fish and Wildlife and landowners to manage wildlife on private lands and through support by additional financial revenues. Notwithstanding ORS 496.004, with respect to state agency actions taken under ORS 496.171 to 496.182 after July 17, 1995, as used in ORS 496.171 to 496.182:

- (1) "Conservation" means the use of methods and procedures necessary to bring a species to the point at which the measures provided under ORS 496.171 to 496.182 are no longer necessary. Such methods and procedures include, but are not limited to, activities associated with scientific resource management such as research, census taking, law enforcement, habitat acquisition and maintenance, propagation and transplantation.
- (2) "Native" means indigenous to Oregon, not introduced.
- (3) "Species" means any group or population of wildlife that interbreeds and is substantially reproductively isolated.
- (4) "Verifiable" means scientific information reviewed by a scientific peer review panel of outside experts who do not otherwise have a vested interest in the process. [1995 c.590 §2]

**2023 Oregon Revised Statutes Volume : 14 - Drugs and Alcohol, Fire Protection, Natural Resources Chapter 496 - Application, Administration and Enforcement of Wildlife Laws Section 496.172 - Commission management authority for threatened or endangered species; rules.**

In carrying out the provisions of the wildlife laws with regard to the management of wildlife that is a threatened species or an endangered species, the State Fish and Wildlife Commission:

- (1) Shall conduct investigations of wildlife species native to this state and shall determine whether any such species is a threatened species or an endangered species.
- (2) By rule, shall establish and publish, and from time to time may revise, a list of wildlife species that are threatened species or endangered species. Listed threatened species or endangered species shall be protected as provided in ORS 496.182.
- (3) Shall work cooperatively with state agencies that have land management authority or regulatory authority to determine their roles within their statutory obligations in the conservation of endangered species, as described in ORS 496.182 (8).
- (4) By rule, shall establish a system of permits for scientific taking of threatened species and endangered species and shall establish a system of state permits for incidental taking of state-designated threatened species and endangered species not listed by the federal government under such terms and conditions as the commission determines will minimize the impact on the species taken. An incidental taking permit or statement issued by a federal agency for a species listed under the federal Endangered Species Act of 1973 (P.L. 93-205, 16 U.S.C. 1531), as amended, shall be recognized by the state as a waiver of any state protection measures or requirements otherwise applicable to the actions allowed under the federal permit.
- (5) Shall cooperate with the State Department of Agriculture in carrying out the provisions of ORS 564.105.
- (6) Shall adopt administrative rules to carry out the provisions of ORS 496.171 to 496.182 and 498.026. [1987 c.686 §3; 1995 c.590 §3]

**2023 Oregon Revised Statutes Volume : 14 - Drugs and Alcohol, Fire Protection, Natural Resources Chapter 496 - Application, Administration and Enforcement of Wildlife Laws Section 496.176 - Listing species; procedure; matters to be considered; periodic review.**

- (1) The lists of threatened species or endangered species established pursuant to ORS 496.172 (2) shall include:
  - (a) Those species of wildlife listed as of May 15, 1987, as a threatened species or an endangered species pursuant to the federal Endangered Species Act of 1973 (P.L. 93-205, 16 U.S.C. 1531), as amended; and
  - (b) Those species determined as of May 15, 1987, by the State Fish and Wildlife Commission to be threatened species or endangered species.
- (2) The commission, by rule, may add or remove any wildlife species from either list, or change the status of any species on the lists, upon a determination that the species is or is not a threatened species or an endangered species.
- (3) A determination that a species is a threatened species or an endangered species shall be based on documented and verifiable scientific information about the species' biological status. To list a species as a threatened species or an endangered species under ORS 496.004 and 496.171 to 496.182, the commission shall determine that the natural reproductive potential of the species is in danger of failure due to limited population numbers, disease, predation or other natural or human actions affecting its continued existence and, to the extent possible, assess the relative impact of human actions. In addition, the commission shall determine that one or more of the following factors exists:
  - (a) That most populations are undergoing imminent or active deterioration of their range or primary habitat;
  - (b) That overutilization for commercial, recreational, scientific or educational purposes is occurring or is likely to occur; or
  - (c) That existing state or federal programs or regulations are inadequate to protect the species or its habitat.
- (4) Determinations required by subsection (3) of this section shall be made by the commission on the basis of verifiable scientific and other data after consultation with federal agencies, other interested state agencies, private landowners, affected cities, affected counties, affected local service districts as defined in ORS 174.116, other states having a common interest in the species and interested persons and organizations.
- (5)
  - (a) Any person may petition the commission to, by rule, add, remove or change the status of a species on the list.
  - (b) A petition shall clearly indicate the action sought and shall include documented scientific information about the species' biological status to justify the requested action.
  - (c) Within 90 days of receipt of a petition, the commission shall respond in writing to the petitioner indicating whether the petition presents substantial scientific information to warrant the action requested.
  - (d) If the petition is found to present such information, the commission shall commence rulemaking.

- (e) A final determination by the commission concerning the action requested in a petition shall be provided within one year from the date of receipt of the petition, with the option for an additional 12-month extension of time to complete the listing if the commission determines that limited information or other appropriate considerations require the extension.
- (f) If the petition is denied, the petitioner may seek judicial review as provided in ORS 183.484.
- (6) The commission may determine not to list a species as a threatened species or an endangered species in any of the following cases:
- (a) If the species has been listed pursuant to the federal Endangered Species Act of 1973 (P.L. 93-205, 16 U.S.C. 1531), as amended.
- (b) If the species is currently on the list as a sensitive species, or is a candidate species or has been petitioned for listing pursuant to the federal Endangered Species Act of 1973 (P.L. 93-205, 16 U.S.C. 1531), as amended.
- (c) If the species has been determined, pursuant to the federal Endangered Species Act of 1973 (P.L. 93-205, 16 U.S.C. 1531), as amended, to not qualify as a threatened species or an endangered species.
- (7)(a) Notwithstanding subsections (1) to (5) of this section, the commission shall take emergency action to add a species to the list of threatened species or endangered species if it determines there is a significant threat to the continued existence of the species within the state.
- (b) The commission shall publish notice of such addition in the Secretary of State's bulletin and shall mail notice to affected or interested persons whose names are included on the commission's mailing list for such purposes.
- (c) Such emergency addition shall take effect immediately upon publication in the Secretary of State's bulletin and shall remain valid for a period no longer than one year, unless during the period the commission completes rulemaking procedures as provided in subsection (5) of this section.
- (8) The commission shall periodically review the status of all threatened species and endangered species listed under ORS 496.171 to 496.192. Each species shall be reviewed at least once every five years to determine whether verifiable scientific information exists to justify its reclassification or removal from the list, according to the criteria listed under subsections (3) and (4) of this section. If a determination is made to reclassify a species or remove it from the list, the commission, within 90 days, shall commence rulemaking to change the status of the species.
- (9) Notwithstanding the provisions of this section, the commission:
- (a) May decide not to list a species that otherwise qualifies as a threatened or endangered species within this state if the commission determines that the species is secure outside this state or the species is not of cultural, scientific or commercial significance to the people of this state.
- (b) May not include *Branta canadensis leucopareia*, commonly known as the Aleutian Canada goose, on the lists of threatened species or endangered species. [1987 c.686 §4; 1995 c.590 §4; 2005 c.402 §1; 2011 c.319 §20; 2012 c.40 §1]

**2023 Oregon Revised Statutes Volume : 14 - Drugs and Alcohol, Fire Protection, Natural Resources Chapter 496 - Application, Administration and Enforcement of Wildlife Laws Section 496.182 - Protection and conservation programs; mitigation of adverse impact on local economies; compliance by state agencies; rules.**

- (1) The burden of protecting and recovering threatened species or endangered species can be a significant cost to the citizens of this state and it is therefore the policy of this state to minimize duplication and overlap between state and federal laws dealing with threatened species or endangered species. To this end, nothing in this section is intended to prevent the adoption of cooperative state or federal programs when such programs provide protection for listed species without significant impact on the primary uses of state lands.
- (2)(a) At the time the State Fish and Wildlife Commission adds a species to the list of threatened species or endangered species under ORS 496.172, the commission shall establish by rule quantifiable and measurable guidelines that it considers necessary to ensure the survival of individual members of the species. These guidelines may include take avoidance and protecting resource sites such as spawning beds, nest sites, nesting colonies or other sites critical to the survival of individual members of the species.
- (b) The commission shall work with private landowners, affected cities, affected counties and affected local service districts, as defined in ORS 174.116, to mitigate the adverse impact on local economies when the commission adds a species to the list of threatened species or endangered species pursuant to ORS 496.172.
- (3) For threatened species listed under ORS 496.172 and in the absence of an approved endangered species management plan described in subsection (8) of this section for an endangered species, if a state agency determines that a proposed action on land it owns or leases, or for which it holds a recorded easement, has the potential to violate the guidelines established under subsection (2) of this section, it shall notify the State Department of Fish and Wildlife. Within 90 days of such notice, the department shall recommend reasonable and prudent alternatives, if any, to the proposed action which are consistent with the guidelines.
- (4) If a state agency fails to adopt the recommendations made under subsection (3) of this section, it shall, after consultation with the department, demonstrate that:
- (a) The potential public benefits of the proposed action outweigh the potential harm from failure to adopt the recommendations; and
- (b) Reasonable mitigation and enhancement measures shall be taken, to the extent practicable, to minimize the adverse impact of the action on the affected species.
- (5) When an action under this section is initiated by a person other than a state agency, the agency shall provide final approval or denial of the proposed action within 120 days of receipt of a written request for final determination.
- (6) The provisions of this section do not apply to lands acquired through foreclosures of loans made pursuant to programs of the

Department of Veterans' Affairs.

(7) State land owning or managing agencies shall set priorities for establishing endangered species management plans required by subsection (8) of this section after consultation with the commission on the level of biological threat and, in consideration of available funds, the immediacy and seriousness of the threat to any listed species.

(8)(a)(A) Within four months of the listing of an endangered species, the commission, in consultation and cooperation with the state land owning or managing agency, shall determine if state land can play a role in the conservation of endangered species. The commission and the land owning or managing agency shall consider species biology and geography of the land base to determine if the species or its habitat is found on state land. If the species or its habitat is not found on state land, the commission shall determine that state land has no role to play in the conservation of the species.

(B) If the species or its habitat is found on state land, the land owning or managing agency, in consultation with the State Department of Fish and Wildlife, shall determine the role its state land shall serve in the conservation of the endangered species. This role may include, but is not limited to conservation, contribution toward conservation or take avoidance. To carry out its consulting role under this subsection, the department shall provide state agencies with an assessment of the conservation needs of the endangered species. In making this determination, the land owning or managing agency shall balance the statutory requirements, rules and policies applicable to the agency's programs, the social and economic impacts that conservation would have on the state, the conservation needs of the species, the purpose of the land and the roles of other ownership categories. The agency shall balance these factors consistent with the commission's rules related to the biological aspects of species management and the statutory obligations of the land owning or managing agency, including the statutory purpose of the land.

(C) After determining the role its state land shall serve in conservation of the species, the land owning or managing agency, in consultation with the State Department of Fish and Wildlife and consistent with the commission's rules related to endangered species management plans, shall develop and approve an endangered species management plan within 18 months from the date the species is first listed as endangered. Endangered species management plans shall be based on the statutes, rules and policies applicable to the agency's programs and shall take into account any social or economic impacts that the plan may have on the state. The land owning or managing agency shall submit the plan to the commission for review and approval as provided in subparagraph (D) of this paragraph.

(D) The commission shall review the endangered species management plan approved by the land owning or managing agency under subparagraph (C) of this paragraph to determine whether the plan achieves the role defined for the land under subparagraph (B) of this paragraph. Based on the biology of the endangered species the commission may modify the endangered species management plan if necessary to be consistent with the role the land owning or managing agency has defined for the land under subparagraph (B) of this paragraph and shall approve the plan as submitted or modified within 24 months from the date the species is listed as endangered.

(b) For state agencies other than land owning or managing agencies, the commission, in consultation and cooperation with the agency, shall determine whether the agency can serve a role in the conservation of endangered species. If the commission determines that the agency has a role to play in conservation of the endangered species, the agency shall determine what role it shall serve in conservation of the endangered species. The agency shall make this determination as provided in the commission's rules related to the biological aspects of species management and in a manner consistent with the agency's statutory obligations. **2023 Oregon Revised Statutes Volume : 14 - Drugs and Alcohol, Fire Protection, Natural Resources Chapter 496 - Application, Administration and Enforcement of Wildlife Laws Section 496.264 - Findings.**

The Legislative Assembly finds and declares that:

- (1) Many small streams in eastern Oregon were historically inhabited by beaver populations and strongly influenced by beavers' unique ability to modify their physical surroundings. Beaver dams had the effect of slowing the flow of water, allowing for natural overflow onto surrounding ancient floodplains and providing many positive benefits to stream ecosystems and to the hydrologic functioning of streams and adjacent water tables.
- (2) Due, in part, to the near eradication of the once prevalent beaver populations, many stream systems have become severely

degraded during the past century, developing deeply eroded and incised stream channels that have lost connectivity with the natural ancient floodplain. These changes to the stream systems have resulted in adverse environmental and economic impacts.

(3) The public policy of the State of Oregon is to encourage and support a program for voluntary stream restoration actions by landowners that can help restore both environmental and economic health to eastern Oregon through the construction of environmental restoration weirs, provided that the voluntary stream restoration actions do not have significant adverse consequences for the environment or existing water rights.

(4) Environmental restoration weirs constructed pursuant to ORS 496.266 may provide benefits to stream restoration that include:

- (a) Improving habitat conditions;
- (b) Slowing stream runoff;
- (c) Decreasing the chance of catastrophic wildfire;
- (d) Improving carbon sequestration; and
- (e) Improving economic productivity of the adjacent ancient floodplain. [2021 c.63 §2]

Note:

496.264 and 496.266 were added to and made a part of the wildlife laws by legislative action but were not added to ORS chapter 496 or any series therein. See Preface to Oregon Revised Statutes for further explanation.

**2023 Oregon Revised Statutes Volume : 14 - Drugs and Alcohol, Fire Protection, Natural Resources Chapter 496 - Application, Administration and Enforcement of Wildlife Laws Section 496.266 - Environmental restoration weirs; rules.**

(1) As used in this section and ORS 496.264:

(a) "Ancient floodplain" means channel adjacent areas and surfaces constructed by fluvial processes that functioned as floodplains or areas for overbank deposition prior to channel incision.

(b) "Environmental restoration weir" means one or more structures that are constructed:

- (A) For the purpose of delaying or slowing, but not preventing, streamflow to promote restoration of stream and habitat conditions;
- (B) Such that the structures do not store or appropriate water in a manner that would require a permit from the Water Resources Department;

(C) To be no larger than necessary to cause overbank flooding onto the lands constituting the ancient floodplain during ordinary periods of high streamflow; and

(D) From wood, earth, dirt, rock or other natural materials.

(c) "Healthy native migratory fish population" means a population of native migratory fish that, as determined by the State Department of Fish and Wildlife:

- (A) Demonstrates appropriate life stages throughout the year; and
- (B) Reproduces at sufficient levels to be a self-sustaining population into the foreseeable future.

(d) "Incised or eroded stream" means a stream that has been scoured by erosion to the extent that the channel bed elevation has lowered relative to its ancient floodplain and the stream has lost connectivity with the ancient floodplain, as characterized by:

- (A) The loss of natural wetland, riparian or meadow conditions in the adjacent surfaces;
- (B) The absence of overbank flooding or deposition during ordinary periods of high streamflow;
- (C) The loss of diversity of fish or other species; or
- (D) The presence of invasive dry land species that have encroached from adjacent uplands, including but not limited to sagebrush, bunch grass, juniper and pine.

(e) "Native migratory fish" has the meaning given that term in ORS 509.580.

(f) "Qualifying stream" means an incised or eroded stream, a designated reach of an incised or eroded stream or a designated set of adjacent reaches of an incised or eroded stream that, prior to commencement of a project authorized pursuant to subsection (2) of this section:

(A) Has an estimated median monthly natural streamflow of less than one cubic foot per second during at least two months of the year;

(B) Has not had a healthy native migratory fish population for at least three years prior to the time of authorization; and

(C) Is incised or eroded to the extent that the channel bed elevation has lowered by two feet or more relative to the elevation of the ancient floodplain.

(g) "Reach" means a section of a stream that is similar in flow topography and habitat characteristics and is between 50 and 500 feet in length.

(h) "Summit of the Cascade Mountains" has the meaning given that term in ORS 321.805.

(2) The State Department of Fish and Wildlife shall adopt by rule and administer a program for authorizing voluntary projects for stream restoration and habitat improvement through the construction of environmental restoration weirs. The department may only authorize a project under the program if:

(a) The project involves construction of environmental restoration weirs on one or more qualifying streams located in any closed basin:

(A) From which water does not flow to the Pacific Ocean; and

(B) That is located east of the summit of the Cascade Mountains;

(b) Construction of the environmental restoration weirs will be completed no later than July 1, 2031; and

(c) The project complies with local floodplain regulations if the project is located within an area subject to floodplain management.  
(3) Rules adopted under subsection (2) of this section shall identify criteria for evaluating voluntary projects undertaken pursuant to the program.

(4) If the department determines that native migratory fish are present in a qualifying stream prior to the date of construction of environmental restoration weirs, the person engaging in the proposed voluntary project shall provide fish passage pursuant to ORS 509.585.

(5)(a) If the department determines that native migratory fish are not present in a qualifying stream prior to the date of construction of environmental restoration weirs, the person engaging in the proposed voluntary project is exempt from meeting the requirements of ORS 509.585.

(b) If, after construction of environmental restoration weirs, the department determines that native migratory fish have returned to the qualifying stream, the department may require the person engaging in the authorized voluntary restoration project to:

(A) Provide fish passage that:

(i) Is economically practicable to the person engaging in the voluntary restoration project; and

(ii) Can be constructed from locally available natural materials; or

(B) Provide mitigation that, as determined by the department, provides a net benefit to native migratory fish.

(6) For a period of up to 10 years after construction of the environmental restoration weirs is complete, the department:

(a) Shall require the person that engaged in an authorized voluntary project to maintain the environmental restoration weirs for their stream restoration and habitat improvement values;

(b) May require the person to engage in photo monitoring of the environmental restoration weirs; and

(c) May, subject to subsection (9) of this section, require the person to allow a third party to engage in monitoring of the environmental restoration weirs.

(7) The department shall, in coordination with the Water Resources Department, require the person to modify the environmental restoration weirs if the environmental restoration weirs are found:

(a) By the Water Resources Department to result in injury to an existing water right; or

(b) By the State Department of Fish and Wildlife to be having a significant detrimental impact on native migratory fish.

(8)(a) Before authorizing a proposed voluntary project, the State Department of Fish and Wildlife shall coordinate with the Department of Transportation to consider any potential impacts of the project on transportation infrastructure or planned transportation infrastructure, including but not limited to potential impacts on roads, culverts and bridges.

(b) The State Department of Fish and Wildlife, in coordination with the Department of Transportation, may at any time require the person engaging in the authorized voluntary restoration project to modify environmental restoration weirs if the environmental restoration weirs are found to adversely impact transportation infrastructure or planned transportation infrastructure.

(9) If the State Department of Fish and Wildlife requires third-party monitoring of environmental restoration weirs under subsection (6)(c) of this section:

(a) The third party must be chosen through mutual agreement between the person engaging in the voluntary restoration project and the department;

(b) The person engaging in the voluntary restoration project may not unreasonably withhold consent for the third party to engage in monitoring;

(c) The third-party monitoring may not result in a financial cost to the person engaging in the voluntary restoration project; and

(d) The third party engaging in the monitoring must be covered by sufficient liability and casualty insurance.

(10) Planting or removal of brush and trees from stream banks and riparian areas as part of an authorized voluntary project are not subject to riparian management requirements established under the Oregon Forest Practices Act.

(11) Nothing in this section creates any new requirement or exemption with respect to obtaining a permit or certificate to use, store or appropriate water. [2021 c.63 §3]

Note:

See note under 496.264.

Note:

(1) The Legislative Assembly hereby declares the necessity to review all options and means for the protection and restoration of Oregon's salmon resource that promote local economic development and enjoyment by all the citizens of Oregon. Options and means shall include operation of salmon production facilities, in cooperation with the State Department of Fish and Wildlife, by both public and private nonprofit agencies as well as by public local partnerships, to meet local production and harvest needs as well as to help restore and maintain natural salmon spawning populations. Such cooperative production projects shall be operated using scientifically sound hatchery practices and shall be consistent with objectives to protect and restore natural fish production.

(2) The State Department of Fish and Wildlife shall:

(a) Review and revise existing state administrative rules so that the different forms of hatchery production are recognized as a necessary and critical element in the state's salmon production system in order to provide harvest opportunities for Oregon's citizens. In so doing, the department shall identify low natural production areas and, using genetically compatible stocks approved by the department, encourage volunteer efforts such as the salmon and trout enhancement program to maintain and to enhance production.

(b) Identify existing private and public salmon production facilities that are currently either underutilized or subject to decommissioning and that may be appropriate for other forms of operation.

(c) Inventory other appropriate local sites, identify possible types of production facilities, recommend stock selection and release size, and assist in securing the acquisition of brood stock approved by the department that maximizes local production.

(d) Investigate and implement ways to improve hatchery smolt survival and reduce predation by such means as night releases, net pen acclimation, alternate release sites, volitional and other release strategies, transport and other means that may be effective and consistent with the conservation of native salmon and genetic resources.

(e) Make recommendations on methods by which operations of facilities referred to in this subsection and subsection (3) of this section can generate revenue for sustainable production, including but not limited to state bonding, license surcharges, ad valorem taxes, local economic development funds, service districts, sale of excess eggs and salmon, and gifts, grants and donations.

(f) Identify needed monitoring and evaluation activities to ensure protection of natural spawning fish populations and to assess the contribution of such cooperative projects to public fisheries.

(g) Assist in developing, for department approval, plans of operation for such cooperative hatchery projects consistent with applicable rules and standards of sound, scientific fish management practice.

(3) The department shall encourage and assist in planning hatchery facilities that seek to implement innovative plans or programs designed to meet production for harvest needs consistent with conservation objectives.

(4) The State Fish and Wildlife Commission shall approve, prior to implementation, operational plans for any fish propagation facilities operated by contractor agreement with other state or federal agencies, local governments, special districts and nonprofit organizations. The notice shall contain a statement of the value of the property and a complete explanation of the method used in computing the amount claimed pursuant to subsection (1) of this section. Not later than November 15, the commission shall pay each amount, less a discount equivalent to that which is provided in ORS 311.505. Payment shall be made to the county treasurer, who shall distribute the payment to the taxing districts of the county in accordance with the schedule of percentages computed under ORS 311.390.

The Wildlife Violator Compact is hereby enacted into law and entered into on behalf of this state with all other states legally joining therein in a form substantially as follows:

## ARTICLE I

### FINDINGS, DECLARATION OF POLICY AND PURPOSE

(a) The party states find that:

- (1) Wildlife resources are managed in trust by the respective states for the benefit of all residents and visitors.
  - (2) The protection of their respective wildlife resources can be materially affected by the degree of compliance with state statute, law, regulation, ordinance or administrative rule relating to the management of those resources.
  - (3) The preservation, protection, management and restoration of wildlife contributes immeasurably to the aesthetic, recreational and economic aspects of these natural resources.
  - (4) Wildlife resources are valuable without regard to political boundaries, therefore, all persons should be required to comply with wildlife preservation, protection, management and restoration laws, ordinances and administrative rules and regulations of all party states as a condition precedent to the continuance or issuance of any license to hunt, fish, trap or possess wildlife.
  - (5) Violation of wildlife laws interferes with the management of wildlife resources and may endanger the safety of persons and property.
  - (6) The mobility of many wildlife law violators necessitates the maintenance of channels of communications among the various states.
  - (7) In most instances, a person who is cited for a wildlife violation in a state other than the person's home state:
    - (i) Must post collateral or bond to secure appearance for a trial at a later date; or
    - (ii) If unable to post collateral or bond, is taken into custody until the collateral or bond is posted; or
    - (iii) Is taken directly to court for an immediate appearance.
  - (8) The purpose of the enforcement practices described in paragraph (7) of this subdivision is to insure compliance with the terms of a wildlife citation by the person who, if permitted to continue on the person's way after receiving the citation, could return to the person's home state and disregard the person's duty under the terms of the citation.
  - (9) In most instances, a person receiving a wildlife citation in the person's home state is permitted to accept the citation from the officer at the scene of the violation and to immediately continue on the person's way after agreeing or being instructed to comply with the terms of the citation.
  - (10) The practice described in paragraph (7) of this subdivision causes unnecessary inconvenience and, at times, a hardship for the person who is unable at the time to post collateral, furnish a bond, stand trial or pay the fine, and thus is compelled to remain in custody until some alternative arrangement can be made.
  - (11) The enforcement practices described in paragraph (7) of this subdivision consume an undue amount of law enforcement time.
- (b) It is the policy of the party states to:
- (1) Promote compliance with the statutes, laws, ordinances, regulations and administrative rules relating to management of wildlife resources in their respective states.
  - (2) Recognize the suspension of wildlife license privileges of any person whose license privileges have been suspended by a party state and treat this suspension as if it had occurred in their state.
  - (3) Allow violators to accept a wildlife citation, except as provided in subdivision (b) of Article III, and proceed on the violator's way without delay whether or not the person is a resident in the state in which the citation was issued, provided that the violator's home state is party to this compact.
  - (4) Report to the appropriate party state, as provided in the compact manual, any conviction recorded against any person whose home state was not the issuing state.
  - (5) Allow the home state to recognize and treat convictions recorded for their residents which occurred in another party state as if they had occurred in the home state.
  - (6) Extend cooperation to its fullest extent among the party states for obtaining compliance with the terms of a wildlife citation issued in one party state to a resident of another party state.
  - (7) Maximize effective use of law enforcement personnel and information.
  - (8) Assist court systems in the efficient disposition of wildlife violations.

**2023 Oregon Revised Statutes Volume : 14 - Drugs and Alcohol, Fire Protection, Natural Resources Chapter 497 - Licenses, Tags and Permits Section 497.071 - Dedication of certain license, tag and permit fee increases.**

The Legislative Assembly finds it imperative that the wildlife resources of the State of Oregon be augmented to a level sufficient to provide Oregonians the recreational benefits of hunting and angling, an abundance of wildlife, and the reasonable expectation that their efforts will result in the taking of game or fish. The intent of this legislation is to provide adequate revenue to the State Fish and Wildlife Commission whereby game mammal herds and game fish populations may be increased for the benefit of Oregon hunters and anglers. Concomitant with the purposes for which the Legislative Assembly approves this legislation, the State Fish and Wildlife Commission is directed to expend the revenues created by this section and ORS 497.102 to 497.134 in achieving wildlife management objectives including, but not limited to the following:

- (1) Habitat management.
- (2) Predator control.
- (3) Replenishment of fish and game populations.
- (4) Reduction of the anadromous bag limit.
- (5) Adjustment of seasons and deadlines to protect returning anadromous adults.
- (6) Supplemental wildlife feeding.
- (7) Protection of game mammals and game birds with characteristics of high reproductive potential.
- (8) Enforcement of closings necessitated by herd or population depletion.
- (9) Expansion of the road and access closure program when necessary to reduce hunting pressure in specific areas. [1975 c.454 §1]
